

# THE ANNALS *of* MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938

EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE  
OF MATHEMATICAL STATISTICS

## *Contents*

	PAGE
Werner Gautschi, 1927-1959 . . . . .	J. R. BLUM 557
The Capacities of Certain Channel Classes Under Random Coding DAVID BLACKWELL, LEO BREIMAN AND A. J. THOMASIAN	558
On the Estimation of the Spectrum of a Stationary Stochastic Process K. R. PARTHASARATHY	568
Expectation of Functionals on a Stochastic Process EDWARD NELSON AND DALE VARBERG	574
Ergodicity of Queues in Series . . . . .	J. SACKS 579
Queues for a Fixed-Cycle Traffic Light . . . . .	C. F. NEWELL 589
Probability Content of Regions Under Spherical Normal Distribution, I HAROLD RUBEN	598
Graphs for Bivariate Normal Probabilities MARVIN ZELEN AND NORMAN C. SEVERO	619
Charts of Some Upper Percentage Points of the Distribution of the Largest Characteristic Root . . . . .	D. L. HECK 625
Correction for Bias Introduced by a Transformation of Variables JERZY NEYMAN AND ELIZABETH L. SCOTT	643
On a Problem of J. Neyman and E. Scott . . . . .	L. SCHMETTERER 656
Estimates With Prescribed Variance Based on Two-Stage Sampling ALLAN BIRNBAUM AND WILLIAM C. HEALY, JR.	662
A Monotonicity Property of the Sequential Probability Ratio Test ROBERT A. WIJSMAN	677
Locally Most Powerful Rank Tests for Two-Sample Problems HIROFUMI UZAWA	685
On the Structure of Distribution-Free Statistics . . . . .	C. B. BELL 703
Small Sample Distributions for Multi-Sample Statistics of the Smirnov Type . . . . .	Z. W. BIRNBAUM AND R. A. HALL 710
Polya Type Distribution of Convolutions SAMUEL KARLIN AND FRANK PROSCHAN	721
The Poisson Approximation to the Poisson Binomial Distribution J. L. HODGES, JR. AND LUCIEN LECAM	737
Confidence Bounds Connected with ANOVA and MANOVA for Balanced and Partially Balanced Incomplete Block Designs . . . . .	V. P. BHAPKAR 741
A Class of Factorial Designs with Unequal Cell-Frequencies GIDEON SCHWARZ	749

*(Continued on back cover)*

Vol. 31, No. 3 — September, 1960

# THE ANNALS OF MATHEMATICAL STATISTICS

**Subscription Rates.** Current issues are \$15 per volume (four issues of one calendar year) in the U. S. and Canada, \$10 per volume elsewhere. Single issues are \$4. Back numbers for all issues up to and including 1956 (Vol. XXVII) are \$12 per volume, \$3.50 per issue, \$200 for the first 25 volumes, \$10 per additional volume purchased at the same time as Volume I through XXV.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues, etc.**, should be addressed to Gerald J. Lieberman, Treasurer, Institute of Mathematical Statistics, Department of Statistics, Stanford University, Stanford, Calif.

Communications concerning **membership, changes of address, etc.**, should be addressed to George E. Nicholson, Jr., Secretary, Department of Statistics, University of North Carolina, Chapel Hill, N. C. Changes of address which are to become effective for a given issue of the *Annals* should be reported to the Secretary on or before the 10th of the month preceding the month of issue.

**Editorial Office**, Department of Statistics, Eckhart Hall, University of Chicago, Chicago 37, Illinois. William Kruskal, Editor.

**Preparation of manuscripts.** Manuscripts should be submitted to the editorial office. Each manuscript should be typewritten, double spaced, with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or a bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow current *Annals* style, and should be numbered alphabetically according to authors' names.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ('), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g.,  $\log \bar{x}$ ) and underlined letters (e.g.,  $\underline{x}$ ) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions *in the body of the text* (as opposed to displayed expressions) and fractions occurring in the numerators or denominators of fractions are preferably written with the solidus; thus  $(a + b)/(c + d)$  rather than  $\frac{a + b}{c + d}$ .

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

---

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

---

COMPOSED AND PRINTED AT THE  
WAVERLY PRESS, INC., BALTIMORE, MARYLAND, U. S. A.

Second-class postage paid at Baltimore, Maryland
