

A MEMORIAL
to
JOHN VON NEUMANN

has been published by the
AMERICAN MATHEMATICAL SOCIETY
in the form of a supplement to the May 1958 issue of the Bulletin

"We do not erect statues of great scientists. Instead, the American Mathematical Society publishes this volume as a memorial to John von Neumann. Some of his friends describe his brilliant mind, his warm personality, his work which will live on in mathematics and in other sciences to which he has contributed so much.

CONTENTS

| | |
|---|--------------------------------|
| John von Neumann, 1903-1957..... | By S. Ulam |
| Von Neumann and Lattice Theory..... | By Garrett Birkhoff |
| Theory of Operators, Part I. Single Operators..... | By F. J. Murray |
| Theory of Operators, Part II. Operator Algebras..... | By Richard V. Kadison |
| Von Neumann on Measure and Ergodic Theory.... | By Paul R. Halmos |
| Von Neumann's Contributions to Quantum Theory..... | By Léon Van Hove |
| John von Neumann's Work in the Theory of Games and Mathematical Economics..... | By H. W. Kuhn and A. W. Tucker |
| Von Neumann's Contributions to Automata Theory..... | By Claude E. Shannon |

NOTE: At the end of the first article there is a complete bibliography of von Neumann's publications. Valuable bibliographical material also appears elsewhere in the Memorial.

129 pp. \$3.20

25% discount to members of the Society

The Memorial is being distributed free of charge to all subscribers to Volume 64 (1958) of the BULLETIN of the American Mathematical Society.

Contents Parts 3 and 4, December 1958

Memoirs:

BAYES, THOMAS. Essay towards solving a problem in the doctrine of chances. [Reproduced from Roy. Soc. Phil. Trans. 1763, 53, 370-418]. Studies in the history of probability and statistics. IX. With a biographical note by G. A. Barnard. LESLIE, P. H. AND GOWER, J. C. The properties of a stochastic model for two competing species. TANNER, J. C. A problem in the combination of accident frequencies. DARROCH, J. N. The multiple-recapture census. I. Estimation of a closed population. BULMER, M. G. Confidence intervals for distance in the analysis of variance. FINNEY, D. J. The efficiencies of alternative estimators for an asymptotic regression equation. PATTERSON, H. D. The use of autoregression in fitting an exponential curve. HAIGHT, FRANK A. Two queues in parallel. SHENTON, L. R. Moment estimators and maximum likelihood. SRIVASTAVA, A. B. L. Effect of non-normality on the power function of t -test. PEARSON, E. S. Note on Mr. Srivastava's paper on the power function of Student's test. BARTON, D. E. AND CASLEY, D. J. A quick estimate of the regression coefficient. ZINGER, A. AND St-PIERRE, J. On the choice of the best amongst three normal populations with known variances. DRONKERS, J. J. Approximate formulae for the statistical distributions of extreme values. HOOPER, J. W. The sampling variance of correlation coefficients under assumptions of fixed and mixed variates. JOHNSON, N. L. The mean deviation, with special reference to samples from a Pearson Type III population. MERRINGTON, MAXINE AND PEARSON, E. S. An approximation to the distribution of non-central t . FOSTER, F. C. Upper percentage points of the generalized beta distribution. III. MENDENHALL, WILLIAM AND HARDER, E. J. Estimation of parameters of mixed exponentially distributed failure time distributions from censored life test data. MENDENHALL, WILLIAM. A bibliography on life testing and related topics. *Miscellaneous:* Contributions by D. E. BARTON & F. N. DAVID, D. R. COX, EDWIN L. CROW, H. E. DANIELS & M. G. KENDALL, IRWIN GUTTMAN, D. G. KABE, ROY LEIPNIK, RITA MAURICE, T. A. RAMASUBBAN, S. N. ROY & R. GNANDESIKAN, M. SANKARAN, B. V. SUKHATME

Corrigenda: N. L. JOHNSON, A. R. KAMAT, J. SAW

CUESTIONES Y EJERCICIOS.

For everything in connection with works, exchanges and subscription write to Professor Sixto Ríos, Instituto de Investigaciones Estadísticas, Consejo Superior de Investigaciones Científicas (Serrano, 123), Madrid, Spain. The Review is composed of three fascicles published three times a year (about 350 pages), and its annual price is 100 pesetas for Spain and South America and \$4.00 U.S.A. for all other countries.

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

OFFICERS

President:

J. Wolfowitz, Department of Mathematics, Cornell University, Ithaca, New York

President-Elect:

John W. Tukey, Department of Mathematics, Princeton University, (mail to Box 708, Princeton, New Jersey), and Bell Telephone Laboratories, Inc., Murray Hill, New Jersey

Secretary:

G. E. Nicholson, Jr., Department of Statistics, University of North Carolina, Chapel Hill, North Carolina

Treasurer:

A. H. Bowker, Department of Statistics, Stanford University, Stanford, California

Editor:

W. H. Kruskal, Department of Statistics, Eckhart Hall, University of Chicago, Chicago 37, Illinois

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS OF MATHEMATICAL STATISTICS are \$10.00 per year for residents of the United States or Canada and \$5.00 per year for residents of other countries. There are special rates for students and for some other classes of members. Inquiries regarding membership in the Institute should be sent to the Secretary of the Institute.

MEETINGS OF THE INSTITUTE TENTATIVE SCHEDULE

CENTRAL REGIONAL MEETING—Cleveland, Ohio, April 2-4, 1959.
EASTERN REGIONAL MEETING—Pittsburgh, Pennsylvania, March
19-21, 1959. (With Biometric Society and ASA Physical Science Section)

Abstracts should be submitted in duplicate to the Editor, preferably on abstract blanks, which can be obtained from the IMS Secretary. Abstracts must be received at least 50 days before the first day of the meeting at which they are to be presented, indicating whether presented by title or in person. (Only one contributed paper may be given in person at any one meeting.) They may be printed prior to the publication of the report of the meeting. Those received by April 30 will appear in the September *Annals*, by July 31 in December, etc. Abstracts should be limited to 200 words or the equivalent, and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if transmitted by members.
