

MATHEMATICAL REVIEWS

an international journal to abstract and review current mathematical literature, including the *Theory of Probability* and *Theoretical Statistics* and applications

Volume 1 is now being published

MICROFILM SERVICE

A microfilm copy of any paper reviewed can be obtained at a nominal cost.

Subscription Rates:

\$6.50 per year to members of sponsoring organizations	\$13.00 per year to others

BIOMETRIKA

A Journal for the Statistical Study of Biological Problems

Volume XXXI, Parts I and II

CONTENTS

I. Random and systematic arrangements. HAROLD JEFFREYS. II. A note on normal correlation. E. J. G. PITMAN. III. A test for the significance of the difference between the two variances in a sample from a normal bivariate population. W. A. MORGAN. IV. The distribution of range in samples from a normal population, expressed in terms of an independent estimate of standard deviation. D. NEWMAN. V. On a comprehensive test for the homogeneity of variances and covariances in multivariate problems. D. J. BISHOP. VI. Observed and theoretical ratios in Mendelian inheritance. E. ROBERTS, W. M. DAWSON and MARGARET MADDEN. VII. Note on the preceding analysis of Mendelian segregations. J. B. S. HALDANE. VIII. The use of statistical methods in the investigation of problems of classification in anthropology. Part I. The general nature of the material and the form of intraracial distributions of metrical characters. G. M. MORANT. IX. A study of the cranial and other human remains from Palestine excavated at Tell Duweir (Lachish) by the Wellcome-Marston Archaeological Research Expedition. D. L. RISDON. X. Estimating bacterial populations by the dilution method. ROBERT DEAN GORDON. XI. Note on the inverse and direct methods of estimation in R. D. Gordon's problem. E. S. PEARSON. XII. On the distribution of maximum likelihood estimates. B. L. WELCH. XIII. On Neyman's "smooth" test for goodness of fit. I. Distribution of the criterion χ^2 when the hypothesis tested is true. F. N. DAVID. XIV. Tests of hypotheses concerning location and scale parameters. E. J. G. PITMAN. *Miscellanea.* (i) On the calculation of the cumulants of the χ -distribution. N. L. JOHNSON AND B. L. WELCH. (ii) Note on discriminant functions. B. L. WELCH. (iii) Review of E. W. Sinnott and L. C. Dunn's *Principles of Genetics*. (iv) Corrections to formulae in papers on the moments of χ^2 . J. B. S. HALDANE.

The subscription price, payable in advance, is 45s. inland, 54s. export, per volume (including postage). Cheques should be drawn to Biometrika and sent to "The Secretary, Biometrika Office, Department of Statistics, University College, London, W.C.1." All foreign cheques must be in sterling and on a bank having a London agency.

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

OFFICERS FOR 1940

President:

S. S. WILKS, Princeton University, Princeton, N. J.

Vice-Presidents:

C. C. CRAIG, University of Michigan, Ann Arbor, Michigan.

A. T. CRAIG, University of Iowa, Iowa City, Iowa.

Secretary-Treasurer:

P. R. RIDER, Washington University, St. Louis, Mo.

The purpose of the Institute of Mathematical Statistics is to stimulate research in the mathematical theory of statistics and to promote coöperation between the field of pure research and the fields of application.

Membership dues including subscription to the ANNALS OF MATHEMATICAL STATISTICS are \$5.00 per year. The dues and inquiries regarding membership in the Institute should be sent to the Secretary-Treasurer of the Institute.
