

Submitting manuscripts

Original research papers in pure and applied mathematics intended for publication in this journal may be written in English, French or German. The submission of a paper implies the author's assurance that it has not been published or submitted for publication elsewhere.

Submit two copies of your manuscript, double spaced, to the Illinois Journal of Mathematics, 1409 West Green St., University of Illinois, Urbana, Illinois 61801 (ijm@math.uiuc.edu) or directly to one of the editors listed on the inside front cover.

Include your e-mail address with your covering letter.

Sending electronic files

Once your paper is accepted you will be given instructions for sending your electronic file, to be used in the typesetting process. But do not send any electronic files until then. We prefer a version of \TeX but can use any electronic files, including ChiWriter, T³, WordPerfect and Microsoft Word.

Proof

Authors will receive only galley proof. Proof sent to North American addresses will be accompanied by manuscript and sent by first class mail. To other addresses, proof will be sent by airmail, and manuscript will be sent only if requested. Authors are asked to return proof (and manuscript if sent) by the same class of mail that was used in sending it to them.

Page charges

To cover a part of the cost of production, the author's institution will be billed for \$40 per page.

Offprints

One hundred offprints are supplied to the sole author of a paper; fifty free offprints are supplied to each author of a joint paper. Additional offprints may be purchased.

	Page
On complex interpolation of compact operators By MICHAEL CWIKEL, NATAN KRUGLJAK AND MIECZYSLAW MASTYŁO	353
Poincaré inequalities and Steiner symmetrization By PEKKA KOSKELA AND ALEXANDER STANOYEVITCH	365
Some results on the topology of four-manifolds with nonnegative curvature By MARIA HELENA NORONHA	390
Day points for quotients of the Fourier algebra $A(G)$, extreme nonergodicity of their duals and extreme non Arens regularity By EDMOND E. GRANIRER	402
Comparaison de normes pour les polynômes homogènes en plusieurs variables By EPHREM RAZAFIMANANTSOA	420
Connections between additive cocycles and Bishop operators By HERBERT A. MEDINA	432
Approximation by entire functions and Arakelyan-type examples for moving targets By ALEXANDER RUSSAKOVSKII	439
Finite criteria for weak F-regularity By MORDECHAI KATZMAN	453
Mixed automorphic forms on semisimple Lie groups By MIN HO LEE	464
A new proof of the restriction theorem for weak type (1,1) multi- pliers on \mathbf{R}^n By KRZYSZTOF WOŹNIAKOWSKI	479
Boundedness of some sublinear operators on Herz spaces By XINWEI LI AND DACHUN YANG	484
Polynomial parametrization and étale exoticity By RONEN PERETZ	502
Arithmetic Macaulayfications using ideals of dimension one By IAN M. ABERBACH	518
