

# ILLINOIS JOURNAL OF MATHEMATICS

Volume 57, Number 4

Winter 2013

---

<b>Hassan Allouba</b> , Time-fractional and memoryful $\Delta^{2^k}$ SIEs on $\mathbb{R}_+ \times \mathbb{R}^d$ : How far can we push white noise? .....	919
<b>Albert Clop and David A. Herron</b> , Mappings with subexponentially integrable distortion: Modulus of continuity, and distortion of Hausdorff measure and Minkowski content .....	965
<b>A. Mouhib</b> , On 2-class field towers of some real quadratic number fields with 2-class groups of rank 3 .....	1009
<b>Indranil Biswas and Harish Seshadri</b> , On the Kähler structures over Quot schemes .....	1019
<b>Fausto Di Biase, Toshihide Futamura and Tetsu Shimomura</b> , Lindelöf theorems for monotone Sobolev functions in Orlicz spaces.....	1025
<b>Debraj Chakrabarti and Kaushal Verma</b> , Condition R and holomorphic mappings of domains with generic corners .....	1035
<b>David Handelman</b> , Realizing dimension groups, good measures, and Toeplitz factors .....	1057
<b>João Pedro Boavida</b> , A spectral identity for second moments of Eisenstein series of $O(n, 1)$ .....	1111
<b>Matthew Daws</b> , Remarks on the quantum Bohr compactification .....	1131
<b>Spiros A. Argyros, Kevin Beanland and Pavlos Motakis</b> , Strictly singular operators in Tsirelson like spaces.....	1173

---
