

CONTENTS

	Page
C. J. Titus and G. S. Young An extension theorem for a class of differential operators	195
Paul Erdős and George Piranian Sequences of linear fractional transformations	205
Raoul Bott On a theorem of Lefschetz	211
J. E. L. Peck Doubly stochastic measures	217
Chr. Pommerenke On some problems by Erdős, Herzog and Piranian	221
E. H. Rothe Some remarks on fundamental solutions of parabolic differential equations of second order	227
E. C. Dade and K. Goldberg The construction of Hadamard matrices	247
S. A. Amitsur On the semi-simplicity of group algebras	251
D. G. Higman On isomorphisms of orders	255
Herbert Busemann Minkowski's and related problems for convex surfaces with boundaries . .	259
Paul Conrad Right-ordered groups	267
Amnon Jakimovski A generalization of the Lototsky method of summability	277
Vladeta Vučković The mutual inclusion of Karamata-Stirling methods of summation	291

The Michigan Mathematical Journal is published by the University of Michigan Press, Ann Arbor, Michigan, U. S. A. Each volume consists of two or more issues of about 100 pages each. The price per issue is \$1 on direct orders from individuals, and \$3 on orders from institutions.
