NOTRE DAME JOURNAL OF FORMAL LOGIC

Founded by Bolesław Sobociński

V. Frederick Rickey, *Editor-in-Chief*

Michele Daugherty, *Business Manager*

Notre Dame Journal of Formal Logic is published quarterly by the University of Notre Dame in January, April, July and October of each year. The Journal is composed by Beljan, Dexter, Michigan and printed by Cushing-Malloy, Inc., Ann Arbor, Michigan. Second-class postage paid at Notre Dame, Indiana 46556.

Two copies of manuscripts being submitted and all editorial correspondence should be sent to *V. Frederick Rickey, Editor-in-Chief, P.O. Box 5, Notre Dame, Indiana 46556, U.S.A.* Authors should consult the "Guide to Authors" for editorial information.

Subscriptions are \$27.50 per year for institutions and \$20.00 for individuals. Back volumes are \$20.00 each for Volumes 1-10 and \$35.00 for Volumes 11-19. Orders for subscriptions and back volumes (accompanied by payment), and changes of address should be sent to the *Business Manager, P.O. Box 5, Notre Dame, Indiana 46556, U.S.A.*

NOTRE DAME JOURNAL OF FORMAL LOGIC

VOLUME XX, 1979

CONTENTS

Recursive equivalence types on recursive manifolds. By <i>Leon W. Harkleroad</i>	1
Extensional equivalence of simple and general utilitarian principles. By <i>Donald E. Nute</i>	32
Theory of objects and set theory: Introduction and semantics. By <i>André Chauvin</i>	37
On unsolvability in subrecursive classes of predicates. By <i>Forbes D. Lewis</i>	55
Negation as a sign of negative judgment. By <i>Kent Bendall</i>	68
A general propositional logic of conditionals. By <i>Scott K. Lehmann</i>	77
Peirce on the nature of logic. By <i>Frederick Michael</i> and <i>Emily Michael</i>	84
Axiomatics for implication. By <i>David Meredith</i>	89
The principle of the division into four figures in traditional logic. By <i>Demetrius J. Hadgopoulos</i>	92
A simple generalization of Turing computability. By <i>William J. Thomas</i>	95
Modus tollens. By <i>Richard Bosley</i>	103
A shortened proof of Sobociński's theorem concerning a restricted rule of substitution in the field of propositional calculi. By <i>Charles H. Lambros</i> . .	112
Domain restrictions in standard deductive logic. By <i>Peter Swiggart</i>	115
Quantification, domains of discourse, and existence. By <i>Thomas G. Nedzyski</i> . .	130
The extended calculus of indications interpreted as a three-valued logic. By <i>Francisco J. Varela</i>	141
The possibility of a conditional logic. By <i>James R. Bode</i>	147
On the logic of "few", "many", and "most". By <i>Philip L. Peterson</i>	155
The axiomatisation of theories of material necessity. By <i>J. P. Cleave</i>	180
Aristotle on predication: An analysis of <i>Anal. Post.</i> 83a. By <i>Kwame Gyekye</i> . . .	191
Semi-monotone series of ordinals. By <i>John L. Hickman</i>	196
The completeness of Stoic propositional logic. By <i>Ian Mueller</i>	201

The binary representation of m -valued logic with applications to universal decision elements. By <i>John Loader</i>	216
Alternative axiomatizations of elementary probability theory. By <i>William K. Goosens</i>	227
α -naming and α -speedup theorems. By <i>Barry E. Jacobs</i>	241
A binary Sheffer operator which does the work of quantifiers and sentential connectives. By <i>Robert B. Brandom</i>	262
An alternative semantics for knowledge. By <i>Gregory Mellema</i>	265
Does quotation sometimes permit substitution? By <i>William G. Lycan</i>	279
The ancestral relation without classes. By <i>Kenneth G. Lucey</i>	281
Geach on atomicity and singular propositions. By <i>J. David Wald</i>	285
Copi's method of deduction. By <i>Frederick A. Johnson</i>	295
Another way of diagramming switching circuits. By <i>James F. Zartman</i>	301
A note on Kripke's distinction between rigid designators and non-rigid designators. By <i>Sitansu S. Chakravarti</i>	309
Classes of universal decision elements using negative substitutions. By <i>J. C. Muzio</i>	314
An extended joint consistency theorem for free logic with equality. By <i>Raymond D. Gumb</i>	321
Necessary truth as analyticity, and the eliminability of monadic <i>De Re</i> formulas. By <i>Thomas Schwartz</i>	336
Presupposition: An alternative approach. By <i>B. L. Bunch</i>	341
Admissible sets and recursive equivalence types. By <i>Carl E. Bredlau</i>	355
A formal interpretation of Łukasiewicz' logics. By <i>Michael Byrd</i>	366
R -mingle and beneath. Extensions of the Routley-Meyer semantics for R . By <i>J. Michael Dunn</i>	369
Sentential notations: Unique decomposition. By <i>Jordan Howard Sobel</i>	377
Material implication, confirmation, and counterfactuals. By <i>Robert J. Farrell</i> . . .	383
Point monads and P -closed spaces. By <i>Robert A. Herrmann</i>	395
Local and global operators and many-valued modal logics. By <i>Charles G. Morgan</i>	401
A simple defense of material implication. By <i>Lee C. Archie</i>	412

The approaches to set theory. By <i>John Lake</i>	415
The decidability of one-variable propositional calculi. By <i>M. D. Gladstone</i>	438
A model-theoretic account of confirmation. By <i>John Paulos</i>	451
Łukasiewicz's twin possibility functors. By <i>Stanley J. Krolikoski</i>	458
A deduction theorem for rejection theses in Łukasiewicz's system of modal logic. By <i>Stanley J. Krolikoski</i>	461
Defining general structures. By <i>Jack C. Boudreaux</i>	465
The strong future tense. By <i>Storrs McCall</i>	489
The theory of homogeneous simple types as a second order logic. By <i>Nino B. Cocchiarella</i>	505
Necessary and contingent deduction. By <i>Anton Dumitriu</i>	525
Gödel's proof and the liar paradox. By <i>Jill Humphries</i>	535
A second deduction theorem for rejection theses in Łukasiewicz's system of modal logic. By <i>Stanley J. Krolikoski</i>	545
Metalogical cliches (proto-variables) and their restricted substitution in sixth century Buddhist logic. By <i>Douglas Dunsmore Daye</i>	549
On the possibility of epistemic logic. By <i>Earl McLane</i>	559
Intended model theory. By <i>Albert Sweet</i>	575
S5 without modal axioms. By <i>John Williamson</i>	593
A semantical account of the vicious circle principle. By <i>Philip Hugly</i> and <i>Charles Sayward</i>	595
A matrix decision procedure for three modal logics. By <i>Adrian Lerner</i>	599
On the equivalence of systems of rules and systems of axioms in illative combinatory logic. By <i>M. W. Bunder</i>	603
Scott's models and illative combinatory logic. By <i>M. W. Bunder</i>	609
Alternative forms of propositional calculus for a given deduction theorem. By <i>M. W. Bunder</i>	613
Generalized restricted generality. By <i>M. W. Bunder</i>	620
A modal natural deduction system for S4. By <i>O. A. Robinson</i>	625
\wedge -elimination in illative combinatory logic. By <i>M. W. Bunder</i>	628
Beyond non-normal possible worlds. By <i>Arnold vander Nat</i>	631

A note on Peirce on Boole's algebra of logic. By <i>Emily Michael</i>	636
A note on $p = mv$. By <i>Michael E. Levin</i>	639
Modal interpretations of three valued logics. I. By <i>Michael J. Duffy</i>	647
Model interpretations of three valued logics. II. By <i>Michael J. Duffy</i>	658
Two basic pure-implicational systems. By <i>J. Jay Zeman</i>	674
Normal implications, bounded posets, and the existence of meets. By <i>J. Jay Zeman</i>	685
On the necessity of S4. By <i>Kwasi Wiredu</i>	689
Deduction theorems in significance logics. By <i>M. W. Bunder</i>	695
A more relevant relevance logic. By <i>M. W. Bunder</i>	701
How to stop talking to tortoises. By <i>J. D. Mackenzie</i>	705
Note on a strong liberated modal logic and its relevance to possible world skepticism. By <i>Charles G. Morgan</i>	718
Quantum logic with implication. By <i>J. Jay Zeman</i>	723
Models of an extension of the theory ORD . By <i>Nicholas J. de Lillo</i>	729
The specific reading of A-propositions in a defense of William of Sherwood. By <i>Charles F. Kielkopf</i>	735
O-propositions and Ockham's theory of supposition. By <i>Alfred J. Freddoso</i>	741
Aristotle's syllogistic. By <i>Paul Thom</i>	751
A generalized theorem concerning a restricted rule of substitution in the field of propositional calculi. By <i>Charles H. Lambros</i>	760
A simplification procedure for alternational normal schemata. By <i>John Riser</i> . . .	765
Circular demonstration and von Wright-Geach entailment. By <i>John Woods</i> and <i>Douglas Walton</i>	768
Kripke on contingent A Priori truths. By <i>Sitansu S. Chakravarti</i>	773
Identity logics. By <i>John Corcoran</i> and <i>Stanley Ziewacz</i>	777
On full cylindric set algebras. By <i>Thomas A. Sudkamp</i>	785
Some considerations in medieval tense logic. By <i>Emily Michael</i>	794
An examination of the influence of Boole's algebra on Peirce's developments in logic. By <i>Emily Michael</i>	801

An intensional logic of predicates and predicate modifiers without modal operators. By <i>James Andrew Fulton</i>	807
Generalization in first-order logic. By <i>Hugues Leblanc</i>	835
The substitution interpretation and the expressive power of intensional logics. By <i>James W. Garson</i>	858
Equational two axiom bases for Boolean algebras and some other lattice theories. By <i>Bolesław Sobociński</i>	865
Variable binding term operators in λ -calculus. By <i>M. W. Bunder</i>	876
Repairing proofs of Arrow's general impossibility theorem and enlarging the scope of the theorem. By <i>R. Routley</i>	879
Beth's tableaux for relevant logic. By <i>J. F. Pabion</i>	891
The algebra of relatives. By <i>Chris Brink</i>	900
Two axiom systems for relation algebras. By <i>Chris Brink</i>	909
The Ω -system and the \mathbb{L} -system of modal logic. By <i>Jean Porte</i>	915
Entailment and proof. By <i>Hung Hin-Chung</i>	921
Leśniewski und Mally. By <i>Wolfgang Leopold Gombocz</i>	934
Author index III. Volumes XVI-XX (1975-1979). By <i>Michele Daugherty</i>	947
ERRATA.	240

NOTRE DAME JOURNAL OF FORMAL LOGIC

V. Frederick Rickey, *Editor-in-Chief*

Michele Daugherty, *Business Manager*

GUIDE TO AUTHORS

ARTICLES in all areas of philosophical and mathematical logic, as well as historical and expository works in these fields are invited. Works accessible and of interest to both philosophers and mathematicians are especially welcome.

MANUSCRIPTS must be double spaced (including quotations, footnotes, and references) with wide margins, and all pages should be numbered. For refereeing purposes two copies should be submitted, each with concise abstract and complete mailing address. Authors should exercise extreme care in preparing manuscripts; improperly prepared manuscripts will be returned for retyping. Manuscripts should be submitted to only one journal at a time, and authors should retain a copy of everything submitted. We regret that manuscripts cannot be returned unless postage is included.

FOOTNOTES should be indicated by consecutive superscript numerals and listed on a separate page at the end of the article. A footnote acknowledging a foundation or individuals should be indicated by an asterisk attached to the first sentence of the text.

REFERENCES should be listed in alphabetical order by author, numbered consecutively in square brackets, on a separate page after the footnotes. Citations should be made by using the numbers in the text rather than by footnotes.

PAGE PROOFS are sent to authors for correction of errors that occur in composition. However, any special composition costs arising out of an author's revision of the text of an article in proof will be charged to the author.

FIFTY REPRINTS, without covers, of each article will be supplied free of charge. Additional offprints or covers for offprints may be purchased.

EDITORIAL CORRESPONDENCE and manuscripts for submission should be sent to V. Frederick Rickey, Editor-in-Chief, Box 5, Notre Dame, Indiana 46556, U.S.A.

The Journal is published quarterly by the University of Notre Dame. Subscriptions are \$27.50 per year for institutions and \$20.00 for individuals. Back volumes are \$20.00 for Volumes 1-10 and \$35.00 for Volumes 11-19. Orders for subscriptions and back volumes (accompanied by payment), and changes of address should be sent to the Business Manager, P.O. Box 5, Notre Dame, Indiana 46556, U.S.A.

Linguistics and Philosophy

An International Journal

Managing Editor: ROBERT WALL

Executive Editorial Committee: MAX CRESSWELL, ÖSTEN DAHL, HANS KAMP, LAURI KARTTUNEN, ASA KAHSER, and STANLEY PETERS

Linguistics and Philosophy is devoted to the study of natural language and will interest linguists as well as philosophers. Topics which fall within the scope of the journal include:

- traditional areas in the philosophy of language such as meaning and truth, reference, description, entailment, speech acts;
- traditional areas of linguistics such as syntax, semantics and pragmatics;
- systems of logic with strong connections to natural language;
- philosophically interesting problems at the intersection of linguistics and other disciplines;
- philosophical questions raised by linguistics as a science.

Subscription Information: 1979, volume 4 (four issues). Private rate: Dfl. 50,— / US \$ approx. 22.50. Institutional rate: Dfl. 138,50 / US \$ approx. 67.00. Prices include postage and handling.

Private subscriptions should be sent direct to the publishers.

AUSTRALASIAN JOURNAL OF PHILOSOPHY

EDITOR: BRIAN ELLIS

SPECIAL ISSUE

The editors hope to produce a special issue of the *Australasian Journal of Philosophy* on one of the following topics.

RATIONALITY

MEANING

ENVIRONMENTAL ETHICS

Articles submitted for inclusion in such an issue should be received by 1 March 1980. It is hoped to produce the first special issue in December of that year. Authors submitting papers for inclusion in a special issue should indicate whether they also wish their papers to be considered for publication in a normal issue. The editors make no commitment to produce a special issue on any of these topics unless they are satisfied that enough material of sufficient quality has been received

SUBSCRIPTION RATES

Individuals:	A\$12.00	US\$14.00	£Stg 7.00
Institutions:	A\$18.00	US\$20.00	£Stg 10.00
Students:	A\$ 6.00	US\$ 7.00	£Stg 3.50

COMMUNICATIONS

Manuscripts, subscriptions and inquiries should be addressed to the Editor, Department of Philosophy, La Trobe University, Bundoora, Melbourne, Victoria, Australia, 3083.
