Nagoya Mathematical Journal is, in principle, the official organ of the Department of Mathematics, Nagoya University, designed solely for the publication of research papers. However, some invited papers and other original papers in mathematics from all over the world are also regularly published in Nagoya Mathematical Journal. Currently, 4 volumes are published each year.

All manuscripts should be typewritten in English, French, or German with sufficient space between lines, and special letters such as bold-face, German, Greek, and script should be clearly marked. All single letters used in formulas will appear in italic, and mathematical symbols will appear in the standard style usual for mathematical literature. Therefore, it is not required to mark such letters and symbols. Instructions which conflict with the general printing rules of the journal will not be accepted. For example, each paragraph title should appear in bold-face. Good reproductions of a typewritten manuscript are acceptable.

As soon as we receive a manuscript, a receipt will be sent to the author. When a manuscript has been sent to a referee, the author will receive another notice. These receipts and notices, however, do not mean anything regarding the acceptability of the paper for publication. If the editorial committee has decided to accept a paper, the author will receive a notice containing the number of the volume in which the paper will appear.

Each author, as well as each co-author, will have 100 reprints, while only one set of proof will be prepared per paper for proof-reading by the author(s). Therefore, a joint paper must carry instructions as to whom the proof should be sent. Attached to the proof, an order form will be sent to the author for the additional reprints which are available at approximately 3¢ per page.

The actual business of the Nagoya Mathematical Journal is performed by the managing editor with the cooperation of editors residing in Nagoya.

The manuscript and general correspondence should be addressed to: Managing editor, Nagoya Mathematical Journal, Department of Mathematics, Faculty of Science, Nagoya University, Chikusa-ku, Nagoya, 464, Japan.

CONTENTS

Uniform densities on hyperbolic Riemann surfaces ... M. NAKAI 1

Contracted ideals from integral extensions of regular rings... ..... M. HOCHSTER 25

Sur une famille sous-ordonnée au noyau de convolution de Hunt donné ..... M. ITÔ 45

On some degenerate parabolic equations ..... T. MATSUZAWA 57

Two theorems on the class number of positive definite quadratic forms ..... Y. KITAOKA 79

An operator valued function space integral applied to multiple integrals of functions of class L_1..... .....R.H. CAMERON and D.A. STORVICK 91

Primeable entire functions .... F. GROSS, C.-C. YANG and C. OSGOOD 123

Dirichlet finite biharmonic functions on the plane with distorted metrics..... M. NAKAI 131

Rigidity for elliptic isometric imbeddings ..... N. TANAKA 137

Bäcklund transformations of the first kind associated with Monge-Ampère's equations ..... M. MATSUDA 161

Restricted principal cluster sets of a certain holomorphic function ..... J.T. GRESSER 185

Order of functions bounded on a spiral ..... J. WARREN 191
