

CONTENTS

P. R. Cromwell , A note on Morton's conjecture concerning the lowest degree of a 2-variable knot polynomial	201
R. Exel , The soft torus and applications to almost commuting matrices	207
M. Furi and M. P. Pera , A continuation principle for periodic solutions of forced motion equations on manifolds and applications to bifurcation theory	219
K. Kikuchi , Positive 2-spheres in 4-manifolds of signature $(1, n)$	245
J. Palmer , Tau functions for the Dirac operator in the Euclidean plane	259
M. F. Singer , Moduli of linear differential equations on the Riemann sphere with fixed Galois groups	343
