CONTENTS

A – ALGEBRA AND NUMBER THEORY

R. H. Hudson, *Class numbers of imaginary cyclic quartic fields and related quaternary systems* 129

B – ANALYSIS

J. Appell and M. P. Pera, *Noncompactness principles in nonlinear operator approximation theory* 13
E. N. Dancer, *Order intervals of self-adjoint linear operators and nonlinear homeomorphisms* 57
R. deLaubenfels, *Well-behaved derivations on* $C[0,1]$ 73
D. Feyel and A. de La Pradelle, *Sur certaines extensions du théorème d'approximation de Bernstein* 81
Y. Friedman and B. Russo, *Conditional expectation without order* 351
C. C. Graham and B. M. Schreiber, *Bimeasure algebras on LCA groups* 91
W. Julian, *ϵ-continuity and monotone operations* 385
G. Ladas, Y. G. Sficas and I. P. Stavroulakis, *Nonoscillatory functional differential equations* 391
A. de La Pradelle, See D. Feyel and A. de La Pradelle
A. Miyachi, *Weak factorization of distributions in H^p spaces* . . . 165
C. N. Mutchler, *The flat Cauchy problem for radially hyperbolic operators from a characteristic manifold of high codimension* 421
K. Nakagawa, *On the orders of automorphisms of a closed Riemann surface* 435
E. S. Noussair and C. A. Swanson, *Global positive solutions of semilinear elliptic problems* 177
M. P. Pera, See J. Appel and M. P. Pera
W. Ricker, *Representation of vector-valued functions by Laplace transforms* 445
B. Russo, See Y. Friedman and B. Russo
B. M. Schreiber, See C. C. Graham and B. M. Schreiber
Y. G. Sficas, See G. Ladas, Y. G. Sficas and I. P. Stavroulakis
J. C. Snader, *Strongly analytic subspaces and strongly decomposable operators* 193
J. G. Stampfli, *One-dimensional perturbations of operators* 481
I. P. Stavroulakis, See G. Ladas, Y. G. Sficas and I. P. Stavroulakis
C. A. Swanson, See E. S. Noussair and C. A. Swanson

B. Tomaszewski, *A construction of inner maps preserving the Haar measure on spheres* 203
A. Uchiyama, *The Fefferman-Stein decomposition of smooth functions and its application to* $H^p(\mathbf{R}^n)$ 217

D – GEOMETRY

E. Akyildiz, *Gysin homomorphism and Schubert calculus* 257
C. Andradas and J. M. Gamboa, *A note on projections of real algebraic varieties* 1
M. Breen, *Clear visibility and unions of two starshaped sets in the plane* 267
H. Busemann and B. B. Phadke, *A general version of Beltrami's Theorem in the large* 299
J. M. Gamboa, See C. Andradas and J. M. Gamboa
B. B. Phadke, See H. Buseman and B. B. Phadke

E – LOGIC AND FOUNDATIONS

T. Carlson, *Extending Lebesgue measure by infinitely many sets* . 33
C. G. Jockusch, Jr. and I. Kalantari, *Recursively enumerable sets and van der Waerden's theorem on arithmetic progressions* . 143
I. Kalantari, See C. G. Jockusch, Jr. and I. Kalantari
A. W. Miller and K. Prikry, *When the continuum has cofinality* ω_1 399
J. Mohrherr, *Density of a final segment of the truth-table degrees* 409
K. Prikry, See A. W. Miller and K. Prikry

F – PROBABILITY AND STATISTICS

J. D. Samur, *On semigroups of convolution operators in Hilbert space* 463

G – TOPOLOGY

R. F. Brown, *Retraction methods in Nielsen fixed point theory* . . 277
D. S. Coram and P. F. Duvall, *Non cell like decompositions of* S^3 47
P. F. Duvall, See D. S. Coram and P. F. Duvall
G. A. Edgar and R. F. Wheeler, *Topological properties of Banach spaces* 317
R. Goggins, *Cobordism of manifolds with strong almost tangent structures* 361
M. Hoffman, *Noncoincidence index of manifolds* 373
J. F. McClendon, *On non-contractible valued multifunctions* . . . 155
R. F. Wheeler, See G. A. Edgar and R. F. Wheeler

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners or publishers and have no responsibility for its content or policies.

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be in typed form or offset-reproduced (not dittoed), double spaced with large margins. Please do not use built up fractions in the text of the manuscript. However, you may use them in the displayed equations. Underline Greek letters in red, German in green, and script in blue. The first paragraph must be capable of being used separately as a synopsis of the entire paper. In particular it should contain no bibliographic references. Please propose a heading for the odd numbered pages of less than 35 characters. Manuscripts, in triplicate, may be sent to any one of the editors. Please classify according to the scheme of Math. Reviews, Index to Vol. 39. Supply name and address of author to whom proofs should be sent. All other communications should be addressed to the managing editor, or Elaine Barth, University of California, Los Angeles, California 90024.

There are page-charges associated with articles appearing in the Pacific Journal of Mathematics. These charges are expected to be paid by the author's University, Government Agency or Company. If the author or authors do not have access to such Institutional support these charges are waived. Single authors will receive 50 free reprints; joint authors will receive a total of 100 free reprints. Additional copies may be obtained at cost in multiples of 50.

The *Pacific Journal of Mathematics* is issued monthly as of January 1966. Regular subscription rate: $190.00 a year (5 Vols., 10 issues). Special rate: $66.00 a year to individual members of supporting institutions.

Subscriptions, orders for numbers issued in the last three calendar years, and changes of address should be sent to Pacific Journal of Mathematics, P.O. Box 969, Carmel Valley, CA 93924, U.S.A. Old back numbers obtainable from Kraus Periodicals Co., Route 100, Millwood, NY 10546.

The Pacific Journal of Mathematics at P.O. Box 969, Carmel Valley, CA 93924 (ISSN 0030-8730) publishes 5 volumes per year. Application to mail at Second-class postage rates is pending at Carmel Valley, California, and additional mailing offices. Postmaster: Send address changes to Pacific Journal of Mathematics, P.O. Box 969, Carmel Valley, CA 93924.
