

## A — ALGEBRA AND NUMBER THEORY

- A. Murase, *On the uniform distribution property of certain linear algebraic groups* .....163

## B — ANALYSIS

- P. B. Borwein, *Rational functions with positive coefficients, polynomials and uniform approximations* ..... 55  
 J. Globevnik, *Fourier coefficients of the Rudin-Carleson extensions* ..... 69  
 M. Mandelkern, *Resolutions on the line* ..... 91  
 N. Th. Varopoulos, *Zeros of  $H^p$  functions in several complex variables* .....189

## C — APPLIED MATHEMATICS

- L. McLinden, *An analogue of Moreau's proximation theorem, with application to the nonlinear complementarity problem* .....101

## E — LOGIC AND FOUNDATIONS

- M. Beeson, *Extensionality and choice in constructive mathematics* ..... 1

## G — TOPOLOGY

- J. L. Blasco, *Two questions on Wallman rings* ..... 29  
 P. Booth and J. Tillotson, *Monoidal closed, Cartesian closed and convenient categories of topological spaces* ..... 35  
 J. Kofner, *Quasi-metrizable spaces* ..... 81
