

A — ALGEBRA AND NUMBER THEORY

M. Brodmann, <i>Piecewise catenarian and going between rings</i>	415
J. P. Buhler, <i>A note on tamely ramified polynomials</i>	421
V. Drobot and S. McDonald, <i>Approximation properties of polynomials with bounded integer coefficients</i>	447
R. C. Heitmann and S. McAdam, <i>Good chains with bad contractions</i>	477
P. Jones and S. Ligh, <i>Finite hereditary near-ring-semigroups</i>	491

B — ANALYSIS

G. D. Allen, D. A. Legg and J. D. Ward, <i>Hermitian liftings in Orlicz sequence spaces</i>	379
G. Bachman and A. Sultan, <i>On regular extensions of measures</i>	389
B. A. Barnes, <i>Representations Naimark-related to *-representations; A correction</i>	397
E. Berkson, <i>One-parameter semigroups of isometries into H^p</i>	403
W. L. Bynum, <i>Normal structure coefficients for Banach spaces</i>	427
L. O. Chung, <i>Biharmonic and polyharmonic principal functions</i>	437
J. Ernest, <i>The computation of the generalized spectrum of certain Toeplitz operators</i>	463
Y. Katayama, <i>Isomorphisms of the Fourier algebras in crossed products</i>	505
G. M. M. Obi, <i>An algebraic extension of the Lax-Milgram theorem</i>	543
S. G. Pandit, <i>Differential systems with impulsive perturbations</i>	553
R. Pell, <i>Support point functions and the Loewner variation</i>	561
J. Shirey, <i>On the theorem of Helley concerning finite dimensional subspaces of a dual space</i>	571
O. Shisha, <i>Tchebycheff systems and best partial bases</i>	579
S. C. Tefteller, <i>Existence of eigenvalues for second-order differential systems</i>	601

C — APPLIED MATHEMATICS

H. Kröger, <i>Padé approximants on Banach space operator equations</i>	535
--	-----

D — GEOMETRY

M. Katchalski and A. Liu, <i>Symmetric twins and common transversals</i>	513
--	-----

G — TOPOLOGY

G. Dula and E. Katz, <i>Recursion formulas for the homology of $\Omega(X \vee Y)$</i>	451
K. R. Goodearl and T. B. Rushing, <i>Direct limit groups and the Keesling-Mardešić shape fibration</i>	471
M. A. Khan, <i>Chain conditions on subgroups of LCA groups</i>	517
J. H. Rubinstein, <i>Dehn's lemma and handle decompositions of some 4-manifolds</i>	565
M. Smith, <i>Large indecomposable continua with only one composant</i>	593

Our subject classifications are: A — ALGEBRA AND NUMBER THEORY; B — ANALYSIS;
 C — APPLIED MATHEMATICS; D — GEOMETRY; E — LOGIC AND FOUNDATIONS;
 F — PROBABILITY AND STATISTICS; G — TOPOLOGY; H — COMBINATORICS
