CONTENTS

T. Ando, *Closed range theorems for convex sets and linear liftings* . 393
J. T. Arnold, *Power series rings over Prüfer domains* 1
M. Arsove, *On the behavior of Pincherle basis function* 13
J. W. Auer, *Fiber integration in smooth bundles* 33
G. Bachman, E. Beckenstein and L. Narici, *Function algebras over valued fields* 45
E. Beckenstein, See Bachman, E. Beckenstein and L. Narici
G. Beer, *The index of convexity and visibility function* 59
J. R. Boone, *A note on mesocompact and sequentially mesocompact spaces* 69
R. D. Bourgin, *Conically bounded sets in Banach spaces* 411
R. J. Buck, *Hausdorff dimensions for compact sets in* R^n 421
S. R. Caradus, *Semiclosed operators* 75
H. Cheng, *A constructive Riemann mapping theorem* 435
J. H. E. Cohn, *Two primary factor inequalities* 81
D. F. Dawson, *Summability of subsequences and strechings of sequences* 455
W. T. Eaton, *A two sided approximation theorem for 2-spheres* . 461
J. P. Filmore and J. Scheuneman, *Fundamental groups of compact complete locally affine complex surfaces* 487
A. Friedman, *Bounded entire solutions of elliptic equations* . . . 497
M. Gagrat and S. A. Naimpally, *Proximity approach to semi-metric and developable spaces* 93
R. Gariepy, *Multiplicity and the area of an* $(n-1)$ *continuous mapping* 509
A. M. W. Glass, *Archimedean extensions of directed interpolation groups* 515
J. Grant, *Automorphisms definable by formulas* 107
M. Hasumi, *Extreme points and unicity of extremum problems in* H^1 *on polydiscs* 523
T. Hawkes, *On the fitting length of a soluble linear group* . . . 537
W. K. Hayman, *Differential inequalities and local valency* . . . 117
W. Heil, *Testing 3-manifolds for projective planes* 139
G. Helzer, *Semi-primary split rings* 541
M. Hochster, *Expanded radical ideals and semiregular ideals* . . 553
M. Hochster and L. J. Ratliff, Jr., *Five theorems on Macaulay rings* 147
T. B. Hoover, *Operator algebras with reducing invariant subspaces* 173
J. Keesling, *Topological groups whose underlying spaces are separable Fréchet manifolds* 181
K. Kikuchi, *Starlike and convex mappings in several complex*

variables 569
F. Knowles, *Idempotents in the boundary of a Lie group* 191
G. E. Lang, Jr., *The evaluation map and EHP sequences* . . . 201
C. Lanski, *On the relationship of a ring and the subring generated by its symmetric elements* 581
J. D. Lawson, *Intrinsic topologies in topological lattices and semilattices* 593
R. B. Levow, *Counterexamples to conjectures of Ryser and de Oliveira* 603
A. Lieberman, *Some representations of the automorphism group of an infinite continuous homogeneous measure algebra* . . 607
E. Lee May, Jr., *Localizing the spectrum* 211
W. G. McArthur, *G_δ-diagonals and metrization theorems* 613
J. M. McPherson, *Wild arcs in three-space* 2: *an invariant of non-oriented local type* 619
F. B. Miles, *Existence of special K-sets in certain locally compact abelian groups* 219
H. Millington and M. Sion, *Inverse systems of group-valued measures* 637
W. Mitchell, *Simple periodic rings* 651
S. Montgomery, *A generalization of a theorem of Jacobson II* . . 233
C. E. Moore, *Concrete semispaces and lexicographic separation of convex sets* 659
T. S. Motzkin and J. L. Walsh, *Equilibrium of inverse-distance forces in three-dimensions* 241
A. Mukherjea and N. A. Tserpes, *Invariant measures and the converse of Haar's theorem on semitopological semigroups* . 251
S. A. Naimpally, See M. Gagrat and S. A. Naimpally
L. Narici, See G. Bachman, E. Beckenstein and L. Narici
J. W. Noonan, *On close-to-convex functions of order β* 263
J. Pak, *Actions of torus T^n on $(n+1)$-manifolds M^{n+1}* 671
D. S. Passman, *The Jacobian of a growth transformation* 281
M. L. Patrick, *Extensions of inequalities of the Laguerre and Turán type* 675
H. L. Peterson, *Discontinuous characters and subgroups of finite index* 683
S. Philipp, *Abel summability of conjugate integrals* 693
D. B. Priest, *A mean Stieltjes type integral* 291
R. B. Quintana, Jr. and C. R. B. Wright, *On groups of exponent four satisfying an Engel condition* 701
L. J. Ratliff, Jr., See M. Hochster and L. J. Ratliff, Jr.
M. C. Rayburn, *On Hausdorff compactifications* 707
J. B. Rhodes, *Decomposition of semilattices with applications to topological lattices* 299

M. Ribe, *Necessary convexity conditions for the Hahn-Banach theorem in metrizable spaces* 715
C. M. Ringel, *Socle conditions for QF-1 rings* 309
R. Rochberg, *Linear maps of the disk algebra* 337
R. W. Ryden, *Groups of arithmetic functions under Dirichlet convolution* 355
R. Sato, *On a decomposition of transformations in finite measure spaces* 733
J. Scheuneman, See J. P. Fillmore and J. S. Scheuneman
M. J. Sharpe, *A class of operators on excessive functions* 361
M. Sion, See H. Millington and M. Sion
E. Størmer, *Automorphisms and equivalence in von Neumann algebras* 371
P. D. Taylor, *Subgradients of a convex function obtained from a directional derivative* 739
J. W. Thomas, *A bifurcation theorem for k-set contractions* . . . 749
P. C. Tonne, *Matrix representations for linear transformations on series analytic in the unit disc* 385
N. A. Tserpes, See A. Mukherjea and N. A. Tserpes
J. L. Walsh, See T. S. Motzkin and J. L. Walsh
C. E. Weil, *A topological lemma and applications to real functions* 757
S. A. Williams, *A nonlinear elliptic boundary value problem* . . 767
P.-K. Wong, **-Action in A*-algebras* 775
C. R. B. Wright, See R. B. Quintana, Jr. and C. R. B. Wright

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners or publishers and have no responsibility for its content or policies.

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be in typed form or offset-reproduced, (not dittoed), double spaced with large margins. Underline Greek letters in red, German in green, and script in blue. The first paragraph or two must be capable of being used separately as a synopsis of the entire paper. The editorial "we" must not be used in the synopsis, and items of the bibliography should not be cited there unless absolutely necessary, in which case they must be identified by author and Journal, rather than by item number. Manuscripts, in duplicate if possible, may be sent to any one of the four editors. Please classify according to the scheme of Math. Rev. Index to Vol. **39**. All other communications to the editors should be addressed to the managing editor, Richard Arens, University of California, Los Angeles, California, 90024.

50 reprints are provided free for each article; additional copies may be obtained at cost in multiples of 50.

The *Pacific Journal of Mathematics* is issued monthly as of January 1966. Regular subscription rate: $48.00 a year (6 Vols., 12 issues). Special rate: $24.00 a year to individual members of supporting institutions.

Subscriptions, orders for back numbers, and changes of address should be sent to Pacific Journal of Mathematics, 103 Highland Boulevard, Berkeley, California, 94708.
