CONTENTS

Samuel Agmon, *On the singularities of Taylor series with reciprocal coefficients* 431

Lars V. Ahlfors, *Remarks on the Neumann-Poincaré integral equation* 271

T. M. Apostol, *Theorems on generalized Dedekind sums* 1

T. M. Apostol, *Addendum to 'On the Lerch zeta function'* 10

Richard Arens, *A generalization of normed rings* 455

Richard Arens, *Extension of functions on fully normal spaces* 11

I. Barsotti, *Intersection theory for cycles of an algebraic variety* 473

Leonard M. Blumenthal, *Two existence theorems for systems of linear inequalities* 523

F. H. Brownell, *Translation invariant measure over separable Hilbert space and other translation spaces* 531

Leonard P. Burton, *Oscillation theorems for the solutions of linear, nonhomogeneous, second-order differential systems* 281

L. Carlitz, *Some theorems on Bernoulli numbers of higher order* 127

J. W. S. Cassels, *On a paper of Niven and Zuckerman* 555

Paul Civin, *Multiplicative closure and the Walsh functions* 291

Nelson Dunford, *Spectral theory II. Resolutions of the identity* 559

J. M. G. Fell and Alfred Tarski, *On algebras whose factor algebras are Boolean* 297

W. Fulks, *On the boundary values of solutions of the heat equation* 141

J. W. Green, *On the level surfaces of potentials of masses with fixed center of gravity* 147

I. Heller, *Contributions to the theory of divergent series* 153

Melvin Henriksen, *On the ideal structure of the ring of entire functions* 179

J. R. Jackson, *Some theorems concerning absolute neighborhood retracts* 185

P. J. Kelly and L. J. Paige, *Symmetric perpendicularity in Hilbert geometries* 319

G. Kurepa, *On a characteristic property of finite sets* 323

Everett Larguier, *Homology bases with applications to local connectedness* 191

Joseph Lehner, *A diophantine property of Fuchsian groups* 327

Eugene Lukacs and Otto Szász, *On analytic characteristic functions* 615

J. E. Maxfield, *A short proof of Pillai's theorem on normal numbers* 23

Janet McDonald, *Davis's canonical pencils of lines* 209

W. A. Mersman, *Evaluation of an integral occurring in servomechanism theory* 627

C. B. Morrey, Jr., *Quasi-convexity and the lower semicontinuity of multiple integrals* 25
J. D. Niblett, *Some hypergeometric identities* 219
Donald A. Norton, *Groups of orthogonal row-latin squares* 335
E. E. Osborne, *On matrices having the same characteristic equation* 227
L. J. Paige and P. J. Kelly, see P. J. Kelly and L. J. Paige
L. E. Payne and Alexander Weinstein, *Capacity, virtual mass, and generalized symmetrization* 633
R. S. Phillips, *On the generation of semigroups of linear operators* 343
George Piranian, *Uniformly accessible Jordan curves through large sets of relative harmonic measure zero* 371
P. M. Pu, *Some inequalities in certain nonorientable Riemannian manifolds* 55
C. T. Rajagopal, *Note on some Tauberian theorems of O. Szász* 377
R. M. Redheffer and R. Steinberg, see R. Steinberg and R. M. Redheffer
P. V. Reichelderfer, *On the barycentric homomorphism in a singular complex* 73
H. L. Royden, *A modification of the Neumann-Poincaré method for multiply connected regions* 385
George Seifert, *A third order irregular boundary value problem and the associated series* 395
Edward Silverman, *Set functions associated with Lebesgue area* 243
R. Steinberg and R. M. Redheffer, *Analytic proof of the Lindemann theorem* 231
Otto Szász and Eugene Lukacs, see Eugene Lukacs and Otto Szász
A. H. Stone, *Incidence relations in multicoherent spaces III* 99
Choy-Tak Taam, *The boundedness of the solutions of a differential equation in the complex domain* 643
Alfred Tarski and J. M. G. Fell, see J. M. G. Fell and Alfred Tarski
Herbert E. Vaughan, *Well-ordered subsets and maximal members of ordered sets* 407
H. F. Weinberger, *An optimum problem in the Weinstein method for eigenvalues* 413
Alexander Weinstein and L. E. Payne, see L. E. Payne and Alexander Weinstein
J. G. Wendel, *Left centralizers and isomorphisms of group algebras* 251
Shigeki Yano, *Note on Fourier analysis XXXI: Cesàro summability of Fourier series* 419
Kôsaku Yosida, *On Brownian motion in a homogeneous Riemannian space* 263

AMERICAN MATHEMATICAL SOCIETY
NATIONAL BUREAU OF STANDARDS,
INSTITUTE FOR NUMERICAL ANALYSIS

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be typewritten (double spaced), and the author should keep a complete copy. Manuscripts may be sent to any of the editors. All other communications to the editors should be addressed to the managing editor, E. F. Beckenbach, at the address given above.

Authors are entitled to receive 100 free reprints of their published papers and may obtain additional copies at cost.

The *Pacific Journal of Mathematics* is published quarterly, in March, June, September, and December. The price per volume (4 numbers) is $8.00; single issues, $2.50. Special price to individual faculty members of supporting institutions and to members of the American Mathematical Society: $4.00 per volume; single issues, $1.25.

Subscriptions, orders for back numbers, and changes of address should be sent to the publishers, University of California Press, Berkeley 4, California.

Printed at Ann Arbor, Michigan. Application for entry at Ann Arbor, Michigan as second class matter is pending.
