CONTENTS	
On the support of the Radon transform	
By Stephen Andrea	193
Generalized Bazilevic functions	
By Douglas M. Campbell and Kent Pearce	197
On the fourier coefficients and continuity of functions of class \mathcal{V}_{Φ} *	•
By Ellaine Cohen	227
Differentiable points of the generalized Cantor function	
By Thomas P. Dence	239
Minimal uniform convergence spaces	
By D.C. Kent and R.J. Gazik	251
Torsion theore for not necessarily associative rings	
By W.G. Leavitt and R. Wiengandt	259
Stepanoff flows on orientable surfaces	
By D. Marchetto	273
Shape fibrations, II	
By Sibe Mardesic and T. B. Rushing	283
Cauchy transforms of measures, and a characterization of	
smooth peak interpolation sets for all the Ball algebra	
By Alexander Nagel	299
The G-transform of generalized functions	
By R.S. Pathak and J.N. Pandy	307
Infinite groups with a subnormality condition on infinite subgroup	
By Veril L. Phillips	327
A(X) and GB -Noetherian rings	
By L.J. RATLIFF, JR	337
Discontinuity of the alternating Chebyshev operator	055
By ECKARD SCHMIDT AND C.B. DUNHAM	355
Arithmetic progressions in the values of a quadratic polynomial	0.01
By Bennett Setzer	361
By E.M. Silvia	265
A characterization of quaternion division algebras	365
By Kirby C. Smith	371
Cantor sets in 3-manifolds	911
By David C. Wright	377
Dy David O. William	911
