

CONTENTS

Lewis D. Ludwig, Peter Nyikos, and John E. Porter: Dowker spaces revisited	1
Takuma Ogawa and Yasuo Kamata: A product formula defined by the Beta function and Gauss's hypergeometric function	13
Nobuhiro Aki and Michio Amano: On the Cartier duality of certain finite group schemes of type (p^n, p^n)	31
Kim Hyo Gyeong: The construction of the uniformly minimum variance unbiased estimator	47
Soumya Das: Note on Hermitian Jacobi forms.....	59
Kenta Ueyama: Geometric classification of quadratic algebras in two variables.....	79
Shunsuke Murata: Bernoulli-type relations in some noncommutative polynomial ring	97
Kazuhiro Okumura: Odd dimensional Riemannian submanifolds admitting the almost contact metric structure in a Euclidean sphere	117
Mohammed Hichem Mortad: Similarities involving unbounded normal operators	129
Naoyuki Koike: Hermann type actions on a pseudo-Riemannian symmetric space	137
Hiroyuki Nakaoka: Comparison of the definitions of abelian 2-categories	173
Nobuhiro Aki: On the Cartier duality of certain finite group schemes of type (p^n, \dots, p^n)	183
Hisashi Kojima: On Siegel modular cusp forms of degree two	201
Tomoo Yokoyama: On some classes of spectral posets	213
Tomoyuki Kakehi and Kensuke Sakai: Behavior of solutions to linear and semilinear parabolic pseudo-differential equations	221
Takeshi Kurosawa, Yohei Tachiya, and Taka-aki Tanaka: Algebraic independence of infinite products generated by Fibonacci numbers....	255
Takashi Kondo: On the group of extensions $\text{Ext}^1(\mathcal{G}^{(\lambda_0)}, \mathcal{E}^{(\lambda_1, \dots, \lambda_n)})$ over a discrete valuation ring	265
