

CONTENTS

	Page
Shoichi FUJIMORI and Francisco J. LÓPEZ: Nonorientable maximal surfaces in the Lorentz-Minkowski 3-space	311
Alex DEGTYAREV: Plane sextics with a type E_8 singular point	329
Boo Rim CHOE, Hyungwoon KOO and Kyesook NAM: Optimal norm estimate of operators related to the harmonic Bergman projection on the ball	357
Hiroyuki TASAKI: The intersection of two real forms in the complex hyper- quadric	375
Hai-Ping FU and Zhen-Qi LI: On stable constant mean curvature hypersurfaces	383
Krzysztof ANDRZEJEWSKI: Jacobi fields and the stability of minimal foliations of arbitrary codimension	393
Volodymyr MAZORCHUK: Classification of simple q_2 -supermodules	401
Bruce K. DRIVER, Leonard GROSS and Laurent SALOFF-COSTE: Growth of Taylor coefficients over complex homogeneous spaces	427

Tohoku Mathematical Journal is pleased to announce its new open access policy. As of April, 2010, all articles in the past volumes below can be freely accessed through Project Euclid (<http://projecteuclid/tmj>) and Journal@rchive (<http://www.journalarchive.jst.go.jp>).

1. All volumes in the First Series (1911–1943)
2. Volumes in the Second Series (1949–) after a lapse of five years

Authors who prefer to opt out of this arrangement are requested to contact the Editorial Office at tmj@math.tohoku.ac.jp. A list of all articles in both series, arranged in alphabetical order of the authors, is available at <http://www.math.tohoku.ac.jp/tmj/Especial.html>.

For Policy, see <http://www.math.tohoku.ac.jp/tmj/Emain.html>.
