

## VOLUME INDEX

- Boumenir, Amin, *On the inverse of integral operators with kernel operators*, 371.  
Brunner, H., *Runge-Kutta time discretizations of parabolic Volterra integro-differential equations*, 1.  
Bühning, Kathrin, *A quadrature method for the hypersingular integral equation on an interval*, 263.  
Capobianco, Maria Rosaria, *An algorithm for the numerical resolution of a class of singular integral equations*, 135.  
Chandler-Wilde, Simon N., *Asymptotic behavior at infinity of solutions of multidimensional second kind integral equations*, 303.  
Crisci, M.R., *Stability of continuous and discrete Volterra integro-differential equations by Liapunov approach*, 393.  
Deng, K., see Olmstead, W.E.  
Estrada, Ricardo, *Dirichlet convolution inverses and solution of integral equations*, 159.  
Freedman, H.I., see Wu, J.  
Han, Houde, *A boundary element method for a nonlinear boundary value problem in steady-state heat transfer*, 17.  
Herdman, Terry L., *A "natural" state-space for an aeroelastic control system*, 413.  
Hu, Shouchuan, see Erbe, L.H.  
Jeon, Youngmok, *A quadrature method for the Cauchy singular integral equations*, 425.  
Kauthen, J.-P., see Brunner, H.  
Kholodnyi, Valery A., *Reduction of an infinite system of integral equations of potential type on a one-dimensional lattice of closed curves in the plane to a finite system of independent pseudodifferential equations on a circle*, 37.  
Kholodnyi, Valery A., *Reduction of an infinite system of integrodifferential equations for electric currents on a lattice of closed curves to a finite system of independent pseudodifferential equations on a circle*, 463.  
Kolmanovskii, V.B., see Crisci, M.R.  
Kunze, Markus, *On a special class of nonlinear integral equations*, 329.  
Lin, Tao, *Accurate computation of the field in Pippard's nonlocal superconductivity model*, 167.  
McGregor, M.T., *On a Wiener-Hopf integral equation*, 479.  
Miller, R.K., see Wu, J.  
Mitina, Anna, *Existence and uniqueness theorems for integro-differential equations on the half-axis with non-difference kernel of a certain type. Upper and lower bounds for solutions*, 485.  
Oka, Hirokazu, *Integrated resolvent operators*, 193.  
Olmstead, W.E., *Coupled Volterra equations with blow-up solutions*, 499.  
Ostermann, A., see Brunner, H.  
Peplow, Andrew T., see Chandler-Wilde, Simon N.  
Rathsfeld, Andreas, *A wavelet algorithm for the solution of the double layer potential equation over polygonal boundaries*, 47.  
Roberts, C.A., see Olmstead, W.E.  
Rogers, Robert C., see Lin, Tao.  
Russo, E., see Crisci, M.R.

- Tamme, Enn, *Two-grid methods for nonlinear multi-dimensional weakly singular integral equations*, 99.
- Tausch, Johannes, *Perturbation analysis for some linear boundary integral operators*, 351.
- Turi, Janos, see Herdman, Terry L.
- Vecchio, A., see Crisci, M.R.
- Wu, J., *Heteroclinic orbits and convergence of order-preserving set-condensing semiflows with applications to integrodifferential equations*, 115.
- Yang, Yajun, *A discrete collocation method for boundary integral equations*, 233.
