STATISTICS

FOUR DOLLARS PER ANNUM

DECEMBER - 1934

Vol. V

1934

THE ANNALS
of
MATHEMATICAL
STATISTICS

THE ANNALS OF MATHEMATICAL STATISTICS is
affiliated with the American Statistical Association and is devoted
to the theory and application of Mathematical Statistics.

Published Quarterly: March, June, September, December

Four Dollars per annum

H. C. CARVER, *Editor*

A. L. O'TOOLE, *Associate Editor*

*The Annals is not copyrighted: any articles or tables appearing therein may
be reproduced in whole or in part at any time if accompanied by
the proper reference to this publication*

Address: ANNALS OF MATHEMATICAL STATISTICS
Post Office Box 171, Ann Arbor, Michigan

CONTENTS OF VOLUME V

The Accuracy of Computation with Approximate Numbers	1
<i>Helen M. Walker and Vera Sanford</i>	
Combining Two Probability Functions	13
<i>William Dorell Baten</i>	
On the Systematic Fitting of Straight Line Trends by Stencil and Calculating Machine	21
<i>Herbert A. Toops</i>	
Statistical Analysis of One-Dimensional Distributions	30
<i>Robert Schmidt, Kiel, Germany</i>	
<i>Editorial: A New Type of Average for Security Prices</i>	<i>73</i>
<i>H. C. Carver</i>	
On a New Method of Computing Non-Linear Regression Curves	81
<i>Walter Andersson, Lund, Sweden</i>	
The Standard Error of Any Analytic Function of a Set of Parameters Evaluated by the Method of Least Squares	107
<i>Walter A. Hendricks</i>	
Transformation of Non-Normal Frequency Distributions into Normal Distributions	113
<i>G. A. Baker</i>	
Invariants and Covariants of Certain Frequency Curves	124
<i>Richmond T. Zoch</i>	
Quadrature of the Normal Curve	136
<i>E. R. Enlow</i>	
<i>Editorial: On a Best Value of R in Sample of R from a Finite Population of N</i>	<i>146</i>
<i>A. L. O'Toole</i>	
<i>Editorial: Punched Card Systems and Statistics</i>	<i>153</i>
<i>H. C. Carver</i>	

CONTENTS OF VOLUME V—Continued

- The Method of Path Coefficients 161
Scwall Wright
- Mathematical Foundation for a Method of Statistical Analysis of Household Budgets 216
John W. Boldyreff
- On the Relative Stability of the Median and Arithmetic Mean, with Particular Reference to Certain Frequency Distributions which can be Dissected into Normal Distributions . 227
Harry S. Pollard
- An Application of Characteristic Functions to the Distribution Problem of Statistics 263
Solomon Kullback
- On Measures of Contingency 308
Frank M. Weida
- Note on Koshal's Method of Improving the Parameters of Curves by the Use of the Method of Maximum Likelihood 320
R. J. Myers
- The Adequacy of "Student's" Criterion of Deviations in Small Sample Means 324
Alan E. Treloar and Marian A. Wilder
