"If it weren't for IMS Members' Life Insurance, I'd be underinsured . . . by thousands of dollars!"

"...With the future I have planned—marriage, a home, a family—my company policy just wouldn't be enough. So I bought low-cost term life insurance through my membership."

Starting a personal insurance program when you're young and healthy is smart, because it's easier to qualify. For a low cash outlay, your program is off to a good start. And even though rates go up as you get older, they are still affordable because of our group's buying power.

Further, should you change jobs—as long as you remain a member—your group term life insurance goes with you...everywhere.

Are you underinsured? Think about your future. Then, to build up your insurance program, call or write the Administrator.

UP TO $240,000 IN TERM LIFE INSURANCE PROTECTION IS AVAILABLE TO IMS MEMBERS.

The IMS Life Plan is underwritten by New York Life Insurance Company, New York, New York 10010 on form number GT-2-PA-9400.

IMS Lecture Notes–Monograph Series — Volume 8

Series Editor, Shanti S. Gupta

Adaptive Statistical Procedures and Related topics *edited by John Van Ryzin*

This volume comprises the proceedings of the Symposium on Adaptive Statistical Procedures and Related Topics held at Brookhaven National Laboratory in June 1985. The Symposium was held in honor of the 70th birthday of Herbert Robbins, Higgins Professor of Mathematical Statistics, Columbia University, and Senior Mathematician, Brookhaven National Laboratory. (The Symposium was supported by the National Science Foundation, the Army Research Office, the Air Force Office of Scientific Research, and the Department of Energy).

CONTENTS

Sequential Analysis

— *On the Passage of a Random Walk from Generalized Balls* by S. Csörgö and L. Horváth
— *Convergence Rates for Iterative Solutions to Optimal Stopping Problems* by D. A. Darling
— *Computing Optimal Sequential Allocation Rules in Clinical Trials* by M. N. Katehakis and C. Derman
— *Sequential Analysis and the Law of the Iterated Algorithm* by H. R. Lerche
— *Multi-stage Tests of Hypotheses* by G. Lorden
— *A Multiple Criteria Optimal Selection Problem* by S. M. Samuels and B. Chotlos
— *On Bayes Tests for $p \leq \frac{1}{2}$ versus $p > \frac{1}{2}$: Analytical Approximations* by G. Simons and X. Wu
— *Sequential Confidence Intervals with Beta Protection in One-Parameter Families* by R. A. Wijsman
— *Confidence Sets for a Change-Point* (Abstract) by D. Siegmund
— *Asymptotic Optimality in Sequential Interval Estimation* (Abstract) by M. Woodroofe

Empirical Bayes Theory and Methods

— *Empirical Bayes Rules for Selecting Good Binomial Populations* by S. S. Gupta and T. Liang
— *The Finite State Compound Decision Problem, Equivariance and Restricted Risk Components* by D. C. Gilliland and J. F. Hannan
— *The Primal State Adaptive Control Chart* by B. Hoadley and B. Huston
— *Fully Nonparametric Empirical Bayes Estimation Via Projection Pursuit* by M. V. Johns
— *Empirical Bayes Estimation in Heterogeneous Matched Binary Samples with Systematic Aging Effects* by B. Levin
— *Empirical Bayes: A Frequency/Bayes Compromise* by C. N. Morris
— *Adaptive Allocation for Importance Sampling* by R. F. Peierls and J. A. Yahav
— *Empirical Bayes Procedures with Censored Data* by V. Susarla and J. Van Ryzin
— *Empirical Bayes Stock Market Portfolios* (Abstract) by T. M. Cover and D. H. Gluss

Stochastic Approximation Procedures

— *Stochastic Approximation for Functionals* by D. L. Hanson and R. P. Russo
— *Constrained Stochastic Approximation Via the Theory of Large Deviations* by H. Kushner and P. Dupuis
— *Stochastic Approximation and Adaptive Control* by T. L. Lai
— *Repeated-MLE Procedures for Stochastic Approximation in Quantal Response Problems* by T. Sellke
— *Maximum Likelihood Recursion and Stochastic Approximation in Sequential Designs* by C. F. J. Wu
— *Stochastic Approximation Revisited* (Abstract) by A. Dvoretzky

Related Topics: Statistics

— *Distribution Optimality and Second-Order Efficiency of Test Procedures* by R. R. Bahadur and J. C. Gupta
— *On Estimating the Total Probability of the Unobserved Outcomes of an Experiment* by P. J. Bickel and J. A. Yahav
— *Remarks on the Estimation of Coefficients of a Regression in the Presence of Unknown Explanatory Variables* by H. Chernoff
— *Estimation of the Median Survival under Random Censorship* by J. C. Gardiner, V. Susarla, and J. Van Ryzin
— *Maximum Likelihood Estimation in Regression with Uniform Errors* by H. Robbins and C-H. Zhang
— *Evaluating the Chosen Population: A Bayes and Minimax Approach* by H. Sackrowitz and E. Samuel-Cahn

Related Topics: Probability

— *Stochastic Differential Equations for Neuronal Behavior* by S. K. Christensen and G. Kallianpur
— *Optimization by Simulated Annealing: A Necessary and Sufficient Condition for Convergence* by B. Hajek
— *Ruelle's Perron-Frobenius Theorem and the Central Limit Theorem for Additive Functionals of One-Dimensional Gibbs States* by S. P. Lalley
— *Limit Theorems for Random Central Order Statistics* by M. L. Puri and S. S. Ralescu
— *On Moments of Ladder Height Variables* (Abstract) by Y. S. Chow

The Annals of Probability

Vol. 15 **October 1987** **No. 4**

The 1986 Wald Memorial Lectures

Percolation theory and first-passage percolation . . . . . HARRY KESTEN

Articles

Bernoulli percolation above threshold: An invasion percolation analysis
J. T. CHAYES, L. CHAYES AND C. M. NEWMAN

Metastability for a class of dynamical systems subject to small random perturbations . . . . . ANTONIO GALVES, ENZO OLIVIERI AND MARIA EULALIA VARES

Universal Donsker classes and metric entropy . . . . . R. M. DUDLEY

Donsker classes and random geometry . . . . . MICHEL TALAGRAND

Tail behaviour for the suprema of Gaussian processes with applications to empirical processes . . . . . ROBERT J. ADLER AND GENNADY SAMORODNITSKY

On Wiener-Hopf factorisation and the distribution of extrema for certain stable processes . . . . . R. A. DONEY

Limit laws of Erdös–Rényi–Shepp type . . . . . PAUL DEHEUVELS AND LUC DEVROYE

On the central limit theorem for ρ-mixing sequences of random variables
MAGDA PELIGRAD

Asymptotic normality of trimmed sums of Φ-mixing random variables
M. G. HAHN, J. KUELBS AND J. D. SAMUR

Strong invariance principles for partial sums of independent random vectors
UWE EINMAHL

Invariance principles for renewal processes
MIKLÓS CSÖRGŐ, LAJOS HORVÁTH AND JOSEF STEINEBACH

Maximal increments of local time of a random walk
NARESH C. JAIN AND WILLIAM E. PRUITT

The radial part of Brownian motion on a manifold: A semimartingale property
WILFRID S. KENDALL

Conditional Brownian motion in rapidly exhaustible domains . . . . . NEIL FALKNER

A converse to a theorem of P. Lévy . . . . . P. J. FITZSIMMONS

A stopped Brownian motion formula with two sloping line boundaries
L. BARBA ESCRIBA

Continuous multi-armed bandits and multiparameter processes . . . . . AVI MANDELBAUM

The number of packets transmitted by collision detect random access schemes
F. P. KELLY AND I. M. MACPHEE

A two-parameter maximal ergodic theorem with dependence . . . . . TERRY R. MCCONNELL

Exchangeable urn processes . . . . . BRUCE M. HILL, DAVID LANE AND WILLIAM SUDDERTH

Prophet compared to gambler: An inequality for transforms of processes
ULRICH KRENGEL AND LOUIS SUCHESTON

A characterization of adapted distribution . . . . . DOUGLAS N. HOOVER

Book Review

Two books on random graphs: *Random Graphs* by Béla Bollobás and *Graphical Evolution: An Introduction to the Theory of Random Graphs* by Edgar Palmer . . . . . G. R. GRIMMETT

contents (continued)

Short Communications

A note on the uniform consistency of the Kaplan-Meier estimator . . . . . JIA-GANG WANG 1313
An application of the Efron-Stein inequality in density estimation . . . . . LUC DEVROYE 1317
Approximating the distribution of the maximum likelihood estimate of the change-point in a sequence of independent random variables . . . . . YI-CHING YAO 1321
A note on the buyer's problem . . . . . ASHIM K. MALLIK 1329
Uniqueness of the spatial median . . . . . P. MILASEVIC AND G. R. DUCHARME 1332
