The Quest & the Commitment

The Age of Space is also the Age of Land and Sea. At Lockheed there are no environmental limits to technological exploration and progress.

On land: highly advanced vehicle systems for missions of the future.

In the sea: deep submersibles to probe the ocean depths, Poseidon and Polaris to keep the peace. In space: Agena, most versatile vehicle system of the age.

Engineers and scientists are invited to write Mr. K. R. Kiddoo, Professional Placement Manager, Sunnyvale, California. An Equal Opportunity Employer.

Linear Operators in Hilbert Space

by **Werner Schmiedler**

Translated by Jay Strum, Revised and Edited by A. Shenitzer and D. Solitar

CONTENTS: HILBERT SPACE: The Hilbert Space of Sequences. Abstract Hilbert Space. Orthonormal Systems of Vectors in Hilbert Space. Notes and Exercises. LINEAR OPERATORS IN HILBERT SPACE: Bounded Linear Operators in Hilbert Space and Their Principal Properties: Biorthogonal Systems. Completely Continuous Operators in Hilbert Space. The Fredholm Theorems for Completely Continuous Operators. Self-Adjoint and Normal Completely Continuous Operators. Positive Bounded Self-Adjoint Operators and Their Square Roots. More on Completely Continuous Operators. Notes and Exercises. SPECTRAL THEORY: Spectral Theory of Bounded Hermitian Operators. Spectral Theory of Bounded Normal Operators. Unbounded Self-Adjoint Operators. Examples and Applications. *Bibliography—Subject Index.*

(X700) 1965, 122 pp., paperbound \$2.95

(X701) clothbound \$6.00

Enumerability, Decidability, Computability:

AN INTRODUCTION TO THE THEORY OF RECURSIVE FUNCTIONS

by **Hans Hermes**

Translated from the German by G. T. Herman and O. Plassmann

CONTENTS: Introductory Reflections on Algorithms. Turing Machines. μ -Recursive Functions. The Equivalence of Turing-Computability and μ -Recursiveness. Recursive Functions. Undecidable Predicates. Miscellaneous. *Author Index—Subject*

A Springer-Verlag Title published in the United States and Canada by Academic Press (H530) 1965, 246 pp., \$9.75

Topology

by **G. Choquet**

Translated from the French by Amiel Feinstein

A Volume of Pure and Applied Mathematics: A Series of Monographs and Textbooks

CONTENTS: TOPOLOGICAL SPACES AND METRIC SPACES: Topology of the Line \mathbb{R} . Topological Spaces. Metric Spaces. Problems. Definitions and Axioms—Review of Some Classical Notation—Bibliography. NUMERICAL FUNCTIONS: Numerical Functions Defined on an Arbitrary Set. Limit Notions Associated with Numerical Functions. Semicontinuous Numerical Functions. The Stone Weierstrass Theorem (Section 12). Functions Defined on an Interval of \mathbb{R} . Definitions and Axioms—Bibliography. TOPOLOGICAL VECTOR SPACES: General Topological Vector Spaces; Examples. Normed Spaces. Summable Families; Series; Infinite Products; Normed Algebras. Hilbert Spaces. Problems. Definitions and Axioms—Notation—Bibliography. *Subject Index.*

(C278) 1965, 337 pp., \$12.50

A First Course in Stochastic Processes

by **Samuel Karlin**

CONTENTS: Elements of Stochastic Processes. Markov Chains. The Basic Limit Theorem of Markov Chains and Applications. Algebraic Methods in Markov Chains. Ratio Theorems of Transition Probabilities and Applications. Sums of Independent Random Variables as a Markov Chain. Classical Examples of Continuous Time Markov Chains. Continuous Time Markov Chains. Order Statistics, Poisson Processes, and Applications. Brownian Motion. Branching Processes. Compounding Stochastic Processes. Deterministic and Stochastic Genetic and Ecological Processes. Queueing Processes. Appendix. Review of Matrix Analysis. Miscellaneous Problems. *Each Chapter Contains References and Problems.*

(K151) 1965, 502 pp., \$11.75

Representation Theory of Finite Groups

by **Martin Burrow**

CONTENTS: Foundations. Representation Theory of Rings with Identity. The Representation Theory of Finite Groups. Applications of the Theory of Characters. The Construction of Irreducible Representations. Modular Representations. *Appendix—Bibliography—Subject Index.*

(X170) 1965, 186 pp., paperbound \$3.45

(X171) clothbound \$6.50

PRE-PUBLICATION ANNOUNCEMENT

NEW MOST COMPLETE PROBABILITY *and* STATISTICS HANDBOOK

- **13 SECTIONS INCLUDE:** A comprehensive discussion of probability and statistical theory (including a discussion of the General Linear Model) — Discussion and tables on: **Order Statistics — Non-Parametric Statistics — Normal Distribution, Binomial, Poisson, Hypergeometric and Negative Binomial Distributions — Students t-Distribution — Chi-Square Distribution — F-Distribution — Range and Studentized Range — Correlation Coefficient — Quality Control ALSO: MISCELLANEOUS STATISTICAL TABLES and MISCELLANEOUS MATHEMATICAL TABLES.**
- **UNIQUE ARRANGEMENT OF INFORMATION** includes a discussion of each table immediately preceding each table.
- Offers wide coverage of probability for statistical use and a pleasing balance of discussion and tabular data.

... by the publishers of the
world-famous CRC Handbook of Chemistry and Physics

- OVER 500 PAGES AND OVER 70 LARGE TABLES
- LARGE 7½" x 10½" PAGE SIZE

Catalog No. S691

Journals Published by the American Mathematical Society

Soviet Mathematics—Doklady

SOVIET MATHEMATICS—DOKLADY is a translation journal containing the entire pure mathematics section of the DOKLADY AKADEMIĬ NAUK SSSR, the Reports of the Academy of Sciences of the USSR. The DOKLADY for a year contains more than 500 articles, each about 4 pages long. Issued bimonthly in January, March, May, July, September, and November.

Mathematical Reviews

This journal is devoted to abstracts and reviews of the current mathematical literature of the world. Two volumes of MATHEMATICAL REVIEWS will be published in 1966, Volume 31, and Volume 32. Each volume will consist of 6 regular issues plus an index issue. In each regular issue the abstracts and reviews are grouped under subject headings. Publication began in 1940.

Notices of the American Mathematical Society

This journal announces the programs of the meetings of the Society. It carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists.

All communications should be addressed to the Editor, P.O. Box 6248, Providence, Rhode Island 02904. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts for the papers to be presented in the meetings announced in that issue. These deadlines are published regularly on the back of the title page.

Mathematics of Computation

A journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices and other aids to computation. In addition it publishes reviews and notes in these and related fields.

Prospective publications should be addressed to the Editor, Professor Eugene Isaacson, University Computing Center, Courant Institute of Mathematical Sciences, New York University, 251 Mercer Street, New York, New York 10012. The author may suggest the name of an editor for review of his paper.

Chinese Mathematics—Acta

This is a cover-to-cover translation into English of Acta Mathematica Sinica published by Academia Sinica Peking, People's Republic of China. Acta Mathematica Sinica contains current research in all fields of pure mathematics.

Volume 1, 1962 of the translation (corresponding to Volume 10, 1960 of the original) contained three issues. Volume 2–6 (1963–1965) contain four issues each.

Journals Published by the American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

The subscription price is \$7.00 per annual volume of six numbers.

Research Problems and Invited Addresses offered for publication should be sent to MURRAY GERSTENHABER, Department of Mathematics, University of Pennsylvania, Philadelphia, Pennsylvania 19104; Book Reviews to FELIX BROWDER, Department of Mathematics, University of Chicago, Chicago, Illinois 60637. Research Announcements offered for publication should be sent to some member of the Council of the Society, and communicated by him to E. H. SPANIER, Department of Mathematics, University of California, Berkeley, California 94720. All other communications to the editors should be sent to the Managing Editor, FELIX BROWDER.

The members of the Council for 1966 are: A. A. Albert, H. A. Antosiewicz, R. F. Arens, Maurice Auslander, Felix Browder, R. C. Buck, Eugenio Calabi, A. P. Calderon, Lamberto Cesari, P. J. Cohen, P. E. Conner, C. W. Curtis, J. B. Diaz, Eldon Dyer, Samuel Eilenberg, Walter Feit, Murray Gerstenhaber, J. W. Green, P. R. Halmos, O. G. Harrold, G. A. Hedlund, M. H. Heins, Henry Helson, Edwin Hewitt, Kenneth Hoffman, Eugene Isaacson, Fritz John, Mark Kac, V. L. Klee, Norman Levinson, M. M. Loève, G. W. Mackey, W. T. Martin, A. P. Mattuck, J. W. Milnor, C. B. Morrey, G. D. Mostow, Louis Nirenberg, Ivan Niven, R. S. Palais, Frank Peterson, R. S. Pierce, Everett Pitcher, Irving Reiner, Alex Rosenberg, Dana Scott, Seymour Sherman, Stephen Smale, E. H. Spanier, N. E. Steenrod, Michio Suzuki, J. D. Swift, A. E. Taylor, John Wermer, Daniel Zelinsky, Antoni Zygmund.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics and is devoted principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character, for which there is normally no other outlet.

Papers in algebra and number theory should be sent to ARTHUR P. MATTUCK, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts or IRVING REINER, Department of Mathematics, University of Illinois, Urbana, Illinois; in probability, real variables, logic, and foundations to R. C. BUCK, Department of Mathematics, University of Wisconsin, Madison, Wisconsin 53705; in abstract analysis to either R. C. BUCK, or FRITZ JOHN, Courant Institute of Mathematical Sciences, 4 Washington Place, New York, New York 10002; in geometry and topology to ELDON DYER, Department of Mathematics, Rice University, Houston, Texas 77001; in other branches of analysis, applied mathematics, and all other fields to W. H. J. FUCHS, Department of Mathematics, University of Illinois, Urbana, Illinois or FRITZ JOHN. All other communications to the editors should be addressed to the Managing Editor, R. C. BUCK.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than the PROCEEDINGS.

Papers in analysis and applied mathematics should be sent to LOUIS NIRENBERG, Courant Institute of Mathematical Sciences, New York University, New York, New York 10012; in topology to FRANK PETERSON, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139; in algebra, number theory, and logic to DANIEL ZELINSKY, Department of Mathematics, Northwestern University, Evanston, Illinois; in geometry and abstract analysis to R. S. PALAIS, Department of Mathematics, Brandeis University, Waltham, Massachusetts; in statistics and probability to MICHEL LOÈVE, Department of Statistics, University of California, Berkeley, California 94720; in mathematical logic and foundations to DANA SCOTT, Department of Mathematics, Stanford University, Stanford, California 94305. All other communications to the editors should be addressed to the Managing Editor, LOUIS NIRENBERG.
