

# Illinois Journal of Mathematics

---

Volume 63 | Number 2 | August 2019

- 193    **Curvature inequalities and extremal operators**  
*Gadadhar Misra and Md. Ramiz Reza*
- 219    **Polynomial time relatively computable triangular arrays for almost sure convergence**  
*Vladimir Dobrić, Patricia Garmirian, Marina Skyers, and Lee J. Stanley*
- 259    **The Dirichlet problem for the constant mean curvature equation in  $Sol_3$**   
*Patricía Klaser and Ana Menezes*
- 299    **When the Zariski space is a Noetherian space**  
*Dario Spirito*
- 317    **K-theory and K-homology of finite wreath products with free groups**  
*Sanaz Pooya*
- 335    **Two generalizations of Auslander–Reiten duality and applications**  
*Arash Sadeghi and Ryo Takahashi*
