Tokyo, Japan

Nagoya Mathematical Journal is the official journal of the Graduate School of Mathematics, Nagoya University, designed solely for the publication of research papers. However, invited papers and other original papers in mathematics from all over the world are also regularly published in Nagoya Mathematical Journal. Currently, 4 volumes are published each year.

All manuscripts should be typewritten in English, French, or German. Papers should be prepared using \TeX if possible, but only the printed hard copy should be submitted (2 copies). Authors submitting old-fashioned typescript are requested to clearly distinguish special symbols and letters such as bold-face, script, German and Greek letters. The editors may request the original \TeX files of papers accepted for publication. The journal's \LaTeX style file and its manual can be obtained from the following URL.

<http://www.math.nagoya-u.ac.jp/nmj/index.html>

Papers should include

- (a) a short abstract of the contents,
- (b) classification numbers at the foot of page 1 according to the 2000 Mathematics Subject Classification, to be found in

<http://www.ams.org/>,

- (c) the author's coordinates, including e-mail address and Fax numbers,
- (d) for papers with long titles, the author's choice of running head (not longer than 50 characters).

As soon as we receive a manuscript, a receipt will be sent to the author. When a manuscript has been sent to a referee, the author will receive another notice. These receipts and notices, however, do not mean anything regarding the acceptability of the paper for publication. If the editorial committee has decided to accept a paper, the author will receive a notice containing the number of the volume in which the paper will appear.

Authors submitting a joint paper must provide instructions as to which author is responsible for proof-reading (only one set of proofs will be provided). Each author, as well as each co-author will have 50 reprints.

The manuscript and general correspondence should be addressed to: Managing editor, Nagoya Mathematical Journal, Graduate School of Mathematics, Nagoya University, Chikusa-ku, Nagoya, 464-8602, Japan.

CONTENTS

Cornacchia, P.: The 2-ideal class groups $\mathbb{Q}(\zeta_l)$	1
Klimek, M.: Iteration of analytic multifunctions	19
Mabuchi, T.: Vector field energies and critical metrics on Kähler manifolds	41
Matsumoto, H. and Yor, M.: An analogue of Pitman's $2M - X$ theorem for exponential Wiener functionals — Part II: The role of the generalized inverse Gaussian laws —	65
Watanabe, K.-I. and Yoshida, K.-I.: Hilbert-Kunz multiplicity of two-dimensional local rings	87
Ragusa, A. and Zappalà, G.: Gorenstein schemes on general hypersurfaces of \mathbb{P}^r	111
Wei, Z. and Pang, C.: Positive solutions of nonresonant singular boundary value problem of second order differential equations	127
Lee, Y. H.: Solutions of a certain nonlinear elliptic equation on Riemannian manifolds	149
Shiga, T., Shimizu, A. and Soshi, T.: Passage-time moments for positively recurrent Markov chains	169
Chiyonobu, T.: Hypothesis testing for signal detection problem and large deviations	187
