## CONTENTS

|   |     |
|---|-----|
| E. M. Alfsen and B. Hirsberg, <i>On dominated extensions in linear subspaces of <math>\mathcal{E}_c(X)</math></i> . . . . . | 567 |
| N. L. Alling, <i>Analytic and harmonic obstruction on nonorientable Klein surfaces</i> . . . . .                            | 1   |
| S. A. Amitsur, <i>Embeddings in matrix rings</i> . . . . .  | 21  |
| G. E. Andrews, <i>On a partition problem of H. L. Alder</i> . . . . .   | 279 |
| J. M. Anthony, <i>Topologies for quotient fields of commutative integral domains</i> . . . . .                              | 585 |
| W. L. Armacost, <i>The Frobenius reciprocity theorem and essentially bounded induced representations</i> . . . . .          | 31  |
| K. Baclawski and K. M. Kapp, <i>Topisms and induced nonassociative systems</i> . . . . .                                    | 45  |
| V. Balakrishnan, G. Sankaranarayanan and C. Suyambulingom, <i>Ordered cycle lengths in a random permutation</i> . . . . .   | 603 |
| V. A. Belfi, <i>Nontangential homotopy equivalences</i> . . . . .   | 615 |
| G. M. Bergman, <i>The index of a group in a semigroup</i> . . . . .   | 55  |
| S. M. Berman, <i>Excursions above high levels for stationary Gaussian processes</i> . . . . .                               | 63  |
| T. C. Brown, <i>An interesting combinatorial method in the theory of locally finite semigroups</i> . . . . .                | 285 |
| P. S. Bullen, <i>A criterion for <math>n</math>-convexity</i> . . . . .   | 81  |
| W. H. Carlisle, <i>Residual finiteness of finitely generated commutative semigroups</i> . . . . .                           | 99  |
| Y-K. Chan, <i>A constructive proof of Sard's theorem</i> . . . . .  | 291 |
| C. V. Coffman, <i>Spectral theory of monotone Hammerstein operators</i> . . . . .   | 303 |
| R. Crocker, <i>On the sum of a prime and of two powers of two</i> . . . . .   | 103 |
| E. D. Davis, <i>Regular sequences and minimal bases</i> . . . . .   | 323 |
| J. M. Day, <i>Compact semigroups with square roots</i> . . . . .  | 623 |
| N. H. Eggert, <i>Quasi regular groups of finite commutative nilpotent algebras</i> . . . . .                                | 631 |
| D. Eisenbud and P. Griffith, <i>The structure of serial rings</i> . . . . .   | 109 |
| P. Erdős and E. G. Straus, <i>Some number theoretic results</i> . . . . .   | 635 |
| T. V. Fossum, <i>Characters and orthogonality in Frobenius algebras</i> . . . . .   | 123 |
| G. R. Gordh, Jr., <i>Monotone decompositions of irreducible Hausdorff continua</i> . . . . .                                | 647 |
| H. Gordon, <i>Rings of functions determined by zero-sets</i> . . . . .  | 133 |
| P. Griffith, See D. Eisenbud and Griffith   |     |
| W. R. Hare and J. W. Kenelly, <i>Characterizations of Radon partitions</i> . . . . .  | 159 |
| D. J. Hartfiel, <i>The matrix equation <math>AXB = X</math></i> . . . . .   | 659 |
| P. Hartman, <i>On third order, nonlinear, singular, boundary value</i>  |     |

|   |     |

---

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners or publishers and have no responsibility for its content or policies.

---

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be in typed form or offset-reproduced, (not dittoed), double spaced with large margins. Underline Greek letters in red, German in green, and script in blue. The first paragraph or two must be capable of being used separately as a synopsis of the entire paper. The editorial "we" must not be used in the synopsis, and items of the bibliography should not be cited there unless absolutely necessary, in which case they must be identified by author and Journal, rather than by item number. Manuscripts, in duplicate if possible, may be sent to any one of the four editors. Please classify according to the scheme of Math. Rev. Index to Vol. 39. All other communications to the editors should be addressed to the managing editor, Richard Arens, University of California, Los Angeles, California, 90024.

50 reprints are provided free for each article; additional copies may be obtained at cost in multiples of 50.

---

The *Pacific Journal of Mathematics* is published monthly. Effective with Volume 16 the price per volume (3 numbers) is \$8.00; single issues, \$3.00. Special price for current issues to individual faculty members of supporting institutions and to individual members of the American Mathematical Society: \$4.00 per volume; single issues \$1.50. Back numbers are available.

Subscriptions, orders for back numbers, and changes of address should be sent to Pacific Journal of Mathematics, 103 Highland Boulevard, Berkeley, California, 94708.

PUBLISHED BY PACIFIC JOURNAL OF MATHEMATICS, A NON-PROFIT CORPORATION

Printed at Kokusai Bunken Insatsusha (International Academic Printing Co., Ltd.), 7-17, Fujimi 2-chome, Chiyoda-ku, Tokyo, Japan.
