In the paper entitled “The Properties of a New Subclass of Harmonic Univalent Mappings” [1], the presentation of Lemma 9 and Theorem 10 (in Section 3) is taken from that of Lemma 3.1 and Theorem 3.2 of Muir paper’s “S. Muir, “Harmonic mappings convex in one or every direction,” *Computational Methods and Function Theory*, vol. 12, no. 1, pp. 221–239, 2012”.
