A message from the editorial board

Welcome to the Brazilian Journal of Probability and Statistics second issue of 2020. In this issue, we are pleased to publish an invited review paper written by I. Martínez-Hernández and M. G. Genton. In the paper, the authors give an account of functional data analysis for complex and spatially correlated data. Two approaches are discussed in details together with a description of existing software for data analysis. This issue also comprises another 11 papers. Enjoy the reading.
