CONTENTS OF VOLUME 4

Articles

ALEXANDER, KENNETH S. Rates of convergence of means for distance-minimizing subadditive Euclidean functionals	902–922
ALEXANDER, KENNETH S. The rate of convergence of the mean length of the longest common subsequence	1074–1082
ALON, NOGA, BOLLOBÁS, BELA, BRIGHTWELL, GRAHAM AND JANSON, SVANTE. Linear extensions of a random partial order	108–123
ARNOLD, LUDWIG, GUNDLACH, VOLKER MATTHIAS AND DEMETRIUS, LLOYD. Evolutionary formalism for products of positive random matrices	859–901
ARRATIA, RICHARD AND WATERMAN, MICHAEL S. A phase transition for the score in matching random sequences allowing deletions	200–225
ATHREYA, K. B. Large deviation rates for branching processes —I. Single type case	779–790
BERMAN, SIMEON M. Perturbation of normal random vectors by nonnormal translations, and an application to HIV latency time distributions	968–980
BERTSIMAS, DIMITRIS, PASCHALIDIS, IOANNIS CH. AND TSITSIKLIS, JOHN N. Optimization of multiclass queueing networks: Polyhedral and nonlinear characterizations of achievable performance	43–75
BOLLOBÁS, BELA, BRIGHTWELL, GRAHAM, JANSON, SVANTE AND ALON, NOGA. Linear extensions of a random partial order . .	108–123
BRAMSON, MAURY. Instability of FIFO queueing networks	414–431
BRAMSON, MAURY. Instability of FIFO queueing networks with quick service times	693–718
BRIGHTWELL, GRAHAM, JANSON, SVANTE, ALON, NOGA AND BOLLOBÁS, BELA. Linear extensions of a random partial order . .	108–123
CHANG, JOSEPH T. Inequalities for the overshoot	1223–1233
CHOUDHURY, GAGAN L., LUCANTONI, DAVID M. AND WHITT, WARD. Multidimensional transform inversion with applications to the transient M/G/1 queue	719–740
CLOUET, J. F. AND FOUQUE, J. P. Spreading of a pulse travelling in random media	1083–1097
COFFMAN, JR., E. G., MALLOWS, C. L. AND POONEN, BJORN. Parking arcs on the circle with applications to one-dimensional communication networks	1098–1111
COHN, HARRY AND JAGERS, PETER. General branching processes in varying environment	184–193
DAI, J. G. AND NGUYEN, VIÊN. On the convergence of multiclass queueing networks in heavy traffic	26–42
DAVIS, M. H. A. AND ZERVOS, M. A problem of singular stochastic control with discretionary stopping	226–240
DEMBO, AMIR, KARLIN, SAMUEL AND ZEITOUNI, OFER. Large exceedances for multidimensional Lévy processes	432–447

DEMETRIUS, LLOYD, ARNOLD, LUDWIG AND GUNDLACH, VOLKER MATTHIAS. Evolutionary formalism for products of positive random matrices.	859–901
DEUSCHEL, JEAN-DOMINIQUE AND MAZZA, CHRISTIAN. L^2 conver- gence of time nonhomogeneous Markov processes: I. Spec- tral estimates	1012–1056
DOWN, D. AND MEYN, S. P. Stability of generalized Jackson networks.	124–148
DUPUIS, PAUL AND OLIENSIS, JOHN. An optimal control formula- tion and related numerical methods for a problem in shape reconstruction.	287–346
EL KAROUI, NICOLE AND KARATZAS, IOANNIS. Dynamic allocation problems in continuous time	255–286
FERRARI, P. A. AND FONTES, L. R. G. The net output process of a system with infinitely many queues	1129–1144
FINNOFF, WILLIAM. Law of large numbers for a heterogeneous system of stochastic differential equations with strong local interaction and economic applications.	494–528
FONTES, L. R. G. AND FERRARI, P. A. The net output process of a system with infinitely many queues	1129–1144
FOUQUE, J. P. AND CLOUET, J. F. Spreading of a pulse travelling in random media.	1083–1097
FOUQUE, JEAN-PIERRE AND MERZBACH, ELY. A limit theorem for linear boundary value problems in random media.	549–569
FRICKER, CHRISTINE, ROBERT, PHILIPPE, SAADA, ELLEN AND TIBI, DANIELLE. Analysis of some networks with interaction	1112–1128
FRIEZE, ALAN, KANNAN, RAVI AND POLSON, NICK. Sampling from log-concave distributions.	812–837
GANDOLFI, ALBERTO AND KESTEN, HARRY. Greedy lattice animals II: Linear growth	76–107
GREY, D. R. Regular variation in the tail behaviour of solutions of random difference equations	169–183
GUNDLACH, VOLKER MATTHIAS, DEMETRIUS, LLOYD AND ARNOLD, LUDWIG. Evolutionary formalism for products of positive random matrices.	859–901
HALL, PETER AND ROY, RAHUL. On the relationship between fractal dimension and fractal index for stationary stochastic processes	241–253
HSING, TAIEN. On the asymptotic distribution of the area out- side a random convex hull in a disk	478–493
HU, YIMING AND WOYCZYNSKI, W. A. An extremal rearrange- ment property of statistical solutions of Burgers' equation . .	838–858
INGRASSIA, SALVATORE. On the rate of convergence of the metropolis algorithm and Gibbs sampler by geometric bounds	347–389

JAGERS, PETER AND COHN, HARRY. General branching processes in varying environment	184–193
JANSON, SVANTE, ALON, NOGA, BOLLOBÁS, BELA AND BRIGHTWELL, GRAHAM. Linear extensions of a random partial order	108–123
KANNAN, RAVI, POLSON, NICK AND FRIEZE, ALAN. Sampling from log-concave distributions.	812–837
KARATZAS, IOANNIS AND EL KAROUI, NICOLE. Dynamic allocation problems in continuous time	255–286
KARLIN, SAMUEL, ZEITOUNI, OFER AND DEMBO, AMIR. Large exceedances for multidimensional Lévy processes	432–447
KEENER, ROBERT W. Quadrature routines for ladder variables	570–590
KESTEN, HARRY AND GANDOLFI, ALBERTO. Greedy lattice animals II: Linear growth	76–107
KLEBANER, FIMA C. AND ZEITOUNI, OFER. The exit problem for a class of density-dependent branching systems	1188–1205
LUCANTONI, DAVID M., WHITT, WARD AND CHOUDHURY, GAGAN L. Multidimensional transform inversion with applications to the transient M/G/1 queue	719–740
MAHMOUD, HOSAM M. A strong law for the height of random binary pyramids	923–932
MALLOWS, C. L., POONEN, BJORN AND COFFMAN, JR., E. G. Parking arcs on the circle with applications to one-dimensional communication networks	1098–1111
MALYSHEV, VADIM AND ROBERT, PHILIPPE. Phase transition in a load sharing loss model.	1161–1176
MASSEY, WILLIAM A. AND WHITT, WARD. An analysis of the modified offered-load approximation for the nonstationary Erlang loss model	1145–1160
MAZZA, CHRISTIAN AND DEUSCHEL, JEAN-DOMINIQUE. L^2 convergence of time nonhomogeneous Markov processes: I. Spectral estimates	1012–1056
MEESTER, RONALD AND ROY, RAHUL. Uniqueness of unbounded occupied and vacant components in Boolean models	933–951
MERZBACH, ELY AND FOUQUE, JEAN-PIERRE. A limit theorem for linear boundary value problems in random media.	549–569
MEYN, S. P. AND DOWN, D. Stability of generalized Jackson networks.	124–148
MEYN, SEAN P. AND TWEEDIE, R. L. Computable bounds for geometric convergence rates of Markov chains	981–1011
MEYN, SEAN P. AND TWEEDIE, R. L. State-dependent criteria for convergence of Markov chains.	149–168
MILTERSEN, KRISTIAN R. An arbitrage theory of the term structure of interest rates	953–967
NGUYEN, VIÊN. The trouble with diversity: Fork—Join networks with heterogeneous customer population	1–25

NGUYEN, VIÊN AND DAI, J. G. On the convergence of multiclass queueing networks in heavy traffic	26–42
OLIENSIS, JOHN AND DUPUIS, PAUL. An optimal control formulation and related numerical methods for a problem in shape reconstruction.	287–346
PASCHALIDIS, IOANNIS CH., TSITSIKLIS, JOHN N. AND BERTSIMAS, DIMITRIS. Optimization of multiclass queueing networks: Polyhedral and nonlinear characterizations of achievable performance	43–75
PERFEKT, ROLAND. Extremal behaviour of stationary Markov chains with applications	529–548
PESTIEN, VICTOR AND RAMAKRISHNAN, S. Asymptotic behavior of large discrete-time cyclic queueing networks	591–606
POLSON, NICK, FRIEZE, ALAN AND KANNAN, RAVI. Sampling from log-concave distributions.	812–837
POONEN, BJORN, COFFMAN, JR., E. G. AND MALLOWS, C. L. Parking arcs on the circle with applications to one-dimensional communication networks	1098–1111
QUINE, M. P. AND SZCZOTKA, W. Generalisations of the Bienaymé-Galton-Watson branching process via its representation as an imbedded random walk.	1206–1222
RAMAKRISHNAN, S. AND PESTIEN, VICTOR. Asymptotic behavior of large discrete-time cyclic queueing networks	591–606
REDMOND, C. AND YUKICH, J. E. Limit theorems and rates of convergence for Euclidean functionals	1057–1073
RESNICK, SIDNEY I. AND ROY, RISHIN. Superextremal processes, max-stability and dynamic continuous choice	791–811
RHEE, WANSOO T. Probabilistic analysis of capacitated vehicle routing problem II	741–764
ROBERT, PHILIPPE AND MALYSHEV, VADIM. Phase transition in a load sharing loss model.	1161–1176
ROBERT, PHILIPPE, SAADA, ELLEN, TIBI, DANIELLE AND FRICKER, CHRISTINE. Analysis of some networks with interaction	1112–1128
ROGERS, L. C. G. Fluid models in queueing theory and Wiener-Hopf factorization of Markov chains	390–413
ROOS, MALGORZATA. Stein's method for compound Poisson approximation: The local approach	1177–1187
ROY, RAHUL AND HALL, PETER. On the relationship between fractal dimension and fractal index for stationary stochastic processes	241–253
ROY, RAHUL AND MEESTER, RONALD. Uniqueness of unbounded occupied and vacant components in Boolean models	933–951
ROY, RISHIN AND RESNICK, SIDNEY I. Superextremal processes, max-stability and dynamic continuous choice	791–811
SAADA, ELLEN, TIBI, DANIELLE, FRICKER, CHRISTINE AND ROBERT, PHILIPPE. Analysis of some networks with interaction.	1112–1128

SCHWERER, ELIZABETH AND VAN MIEGHEM, JAN A. Brownian models of closed queueing networks: Explicit solutions for balanced three-station systems	448-477
SERINKO, REGIS J. A consistent approach to least squares estimation of correlation dimension in weak Bernoulli dynamical systems	1234-1254
SHREVE, S. E. AND SONER, H. M. Optimal investment and consumption with transaction costs	609-692
SIGMAN, KARL AND YAO, DAVID D. Finite moments for inventory processes	765-778
SONER, H. M. AND SHREVE, S. E. Optimal investment and consumption with transaction costs	609-692
SZCZOTKA, W. AND QUINE, M. P. Generalisations of the Bienaymé-Galton-Watson branching process via its representation as an imbedded random walk	1206-1222
TIBI, DANIELLE, FRICKER, CHRISTINE, ROBERT, PHILIPPE AND SAADA, ELLEN. Analysis of some networks with interaction	1112-1128
TSITSIKLIS, JOHN N. A short proof of the Gittins index theorem	194-199
TSITSIKLIS, JOHN N., BERTSIMAS, DIMITRIS AND PASCHALIDIS, IOANNIS CH. Optimization of multiclass queueing networks: Polyhedral and nonlinear characterizations of achievable performance	43-75
TWEEDIE, R. L. AND MEYN, SEAN P. Computable bounds for geometric convergence rates of Markov chains	981-1011
TWEEDIE, R. L. AND MEYN, SEAN P. State-dependent criteria for convergence of Markov chains	149-168
VAN MIEGHEM, JAN A. AND SCHWERER, ELIZABETH. Brownian models of closed queueing networks: Explicit solutions for balanced three-station systems	448-477
WATERMAN, MICHAEL S. AND ARRATIA, RICHARD. A phase transition for the score in matching random sequences allowing deletions	200-225
WHITT, WARD, CHOUDHURY, GAGAN L. AND LUCANTONI, DAVID M. Multidimensional transform inversion with applications to the transient M/G/1 queue	719-740
WHITT, WARD AND MASSEY, WILLIAM A. An analysis of the modified offered-load approximation for the nonstationary Erlang loss model	1145-1160
WOYCZYNSKI, W. A AND HU, YIMING. An extremal rearrangement property of statistical solutions of Burgers' equation	838-858
YAO, DAVID D. AND SIGMAN, KARL. Finite moments for inventory processes	765-778
YUKICH, J. E. AND REDMOND, C. Limit theorems and rates of convergence for Euclidean functionals	1057-1073
ZEITOUNI, OFER, DEMBO, AMIR AND KARLIN, SAMUEL. Large exceedances for multidimensional Lévy processes	432-447

ZEITOUNI, OFER AND KLEBANER, FIMA C. The exit problem for a class of density-dependent branching systems	1188–1205
ZERVOS, M AND DAVIS, M. H. A. A problem of singular stochastic control with discretionary stopping	226–240
