ACKNOWLEDGMENT OF PRIORITY

Acknowledgment of Priority to
"The Distribution of the Ratio of Means to the Square Root of the Sum of
Variances of a Bivariate Normal Sample"

BY S. A. PATIL AND S. H. LIAO

Tennessee Technological University

In reference to our paper, "The Distribution of the Ratio of Means to the Square Root of the Sum of Variances of a Bivariate Normal Sample," *Ann. Math. Statist.* **41** (1970) pages 723–728, the authors wish to acknowledge that the probability density function of Z derived in Section 2 for the case of n being odd is a special case of equation (4) of Gurland, J. "Distribution of the Maximum of the Arithmetic Mean of Correlated Random Variables," *Ann. Math. Statist.* **26** (1955) pages 294–300. We are grateful to Dr. P. R. Krishnaiah through whom we learned of this reference.
