BY SAMUEL KOTZ AND JOHN W. ADAMS

*University of Toronto and University of North Carolina*

A derivation of characteristic roots of a matrix  $(\rho^{|i-j|})$ ,  $0 < \rho < 1$ ,  $i, j = 1, \dots, n$ , similar to one given in the authors' paper "Distribution of Sum of Identically Distributed Exponentially Correlated Gamma-Variables", *Ann. Math. Statist.* **35** (1964) 277-283 is presented in the book "*Toeplitz Forms and Their Applications*" by Ulf Grenander and Gabor Szegö, University of California Press (1958) pp. 69-70.

The authors regret having overlooked this prior result before submitting the paper.
