THE ANNALS
of
PROBABILITY

An Official Journal of the
Institute of Mathematical Statistics

Articles appearing in *The Annals of Probability* (volumes 1–17) are indexed in the *Cumulative Index to IMS Scientific Journals*, available from the Institute of Mathematical Statistics.

VOLUME 21

1993

Institute of Mathematical Statistics is collaborating with JSTOR to digitize, preserve, and extend access to *The Annals of Probability.*

CONTENTS OF VOLUME 21

Memorial Articles, Wald Lectures and Articles

ACCARDI, L. AND LU, Y. G. A continuous version of De Finetti's theorem 1478–1493

ADLER, ROBERT J. AND ROSEN, JAY S. Intersection local times of all orders for Brownian and stable density processes—construction, renormalisation and limit laws 1073–1123

ALBEVERIO, S., RÖCKNER, M. AND ZHANG, T. S. Girsanov transform for symmetric diffusions with infinite dimensional state space 961–978

ALDOUS, DAVID. The continuum random tree III 248–289

ANDJEL, ENRIQUE D. Characteristic exponents for two-dimensional bootstrap percolation 926–935

ARCONES, MIGUEL A. AND GINÉ, EVARIST. Limit theorems for U-processes 1494–1542

BAI, Z. D. Convergence rate of expected spectral distributions of large random matrices. Part I. Wigner matrices 625–648

BAI, Z. D. Convergence rate of expected spectral distributions of large random matrices. Part II. Sample covariance matrices. . 649–672

BAI, Z. D. AND YIN, Y. Q. Limit of the smallest eigenvalue of a large dimensional sample covariance matrix 1275–1294

BAILLON, J.-B., CLÉMENT, PH., GREVEN, A. AND DEN HOLLANDER, F. A variational approach to branching random walk in random environment 290–317

BERKES, I. AND DEHLING, H. Some limit theorems in log density 1640–1670

BHATT, ABHAY G. AND KARANDIKAR, RAJEEVA L. Invariant measures and evolution equations for Markov processes characterized via Martingale problems 2246–2268

BOIVIN, DANIEL. Weak convergence for reversible random walks in a random environment 1427–1440

BOLTHAUSEN, ERWIN AND DEUSCHEL, JEAN-DOMINIQUE. Critical large deviations for Gaussian fields in the phase transition regime, I 1876–1920

BORELL, CHRISTER. Geometric properties of some familiar diffusions in $\mathbb{R}^n$ 482–489

BOVIER, ANTON AND PICCO, PIERRE. A law of the iterated logarithm for random geometric series 168–184

BRADLEY, RICHARD C. Equivalent mixing conditions for random fields 1921–1926

BRAMSON, MAURY, COX, J. T. AND GREVEN, ANDREAS. Ergodicity of critical spatial branching processes in low dimensions 1946–1957

BURTON, ROBERT AND PEMANTLE, ROBIN. Local characteristics, entropy and limit theorems for spanning trees and domino tilings via transfer-impedances 1329–1371

BURTON, ROBERT M., GOULET, MARK AND MEESTER, RONALD. On 1-dependent processes and k-block factors 2157–2168

CAI, HAIYAN AND LUO, XIAOLONG. Laws of large numbers for a cellular automaton 1413–1426
CARLSON, J. M., GRANNAN, E. R., SWINDLE, G. H. AND TOUR, J. Singular diffusion limits of a class of reversible self-organizing particle systems 1372–1393
CHAGANTY, NARASINGA RAO AND SETHURAMAN, JAYARAM. Strong large deviation and local limit theorems 1671–1690
CHANG, FU-CHUEN, KEMPERMAN, J. H. B. AND STUDDEN, W. J. A normal limit theorem for moment sequences 1295–1309
CHEN, XIA. On the law of the iterated logarithm for independent Banach space valued random variables 1991–2011
CHENG, RAY. The spectral measure of a regular stationary random field with the weak or strong commutation property 1263–1274
CHOW, Y. S., DE LA PEÑA, V. H. AND TEICHER, H. Wald's equations for a class of denormalized U-statistics 1151–1158
CLÉMENT, PH., GREVEN, A., DEN HOLLANDER, F. AND BAILLON, J.-B. A variational approach to branching random walk in random environment 290–317
COX, J. T., GREVEN, ANDREAS AND BRAMSON, MAURY. Ergodicity of critical spatial branching processes in low dimensions 1946–1957
CSÖRGŐ, MIKLÓS AND SHAO, QI-MAN. Strong limit theorems for large and small increments of l^p-valued Gaussian processes. . 1958–1990
CUTLAND, NIGEL AND NG, SIU-AH. The Wiener sphere and Wiener measure 1–13
DEHLING, H. AND BERKES, I. Some limit theorems in log density 1640–1670
DE LA PEÑA, V. H., TEICHER, H. AND CHOW, Y. S. Wald's equations for a class of denormalized U-statistics 1151–1158
DEN HOLLANDER, F., BAILLON, J.-B., CLÉMENT, PH. AND GREVEN, A. A variational approach to branching random walk in random environment 290–317
DEUSCHEL, JEAN-DOMINIQUE AND BOLTHAUSEN, ERWIN. Critical large deviations for Gaussian fields in the phase transition regime, I 1876–1920
DE VALK, VINCENT. Hilbert space representations of m-dependent processes 1550–1570
DIACONIS, PERSI AND SALOFF-COSTE, LAURENT. Comparison techniques for random walk on finite groups 2131–2156
DILWORTH, S. J. AND MONTGOMERY-SMITH, S. J. The distribution of vector-valued Rademacher series 2046–2052
DINWOODIE, I. H. Identifying a large deviation rate function 216–231
DUPUIS, PAUL AND ISHII, HITOSHI. SDEs with oblique reflection on nonsmooth domains 554–580
DURRETT, RICHARD AND STEIF, JEFFREY E. Fixation results for threshold voter systems 232–247
DYNKIN, E. B. Superprocesses and partial differential equations 1185–1262

EINMAHL, UWE. Toward a general law of the iterted logarithm in Banach space 2012–2045
EISENBAUM, NATHALIE AND KASPI, HAYA. A necessary and sufficient condition for the Markov property of the local time process 1591–1598
EIZENBERG, ALEXANDER AND FREIDLIN, MARK. Large deviations for Markov processes corresponding to PDE systems 1015–1044
ENCHEV, O. AND STROOCK, D. W. Rademacher's theorem for Wiener functionals 25–33
ENCHEV, OGNIAN. Nonlinear transformations on the Wiener space 2169–2188
ENCHEV, OGNIAN. Pathwise nonlinear filtering on abstract Wiener spaces 1728–1754
ETHIER, S. N. AND GRIFFITHS, R. C. The transition function of a Fleming–Viot process 1571–1590
FALK, MICHAEL AND MAROHN, FRANK. Von Mises conditions revisited 1310–1328
FELDMAN, RAISA EPSTEIN AND RACHEV, SVETLOZAR. U-statistics of random-size samples and limit theorems for systems of Markovian particles with non-Poisson initial distributions ... 1927–1945
FONTES, LUIZ RENATO G. An ordered phase with slow decay of correlations in continuum $1/r^2$ Ising models 1394–1412
FREIDLIN, MARK AND EIZENBERG, ALEXANDER. Large deviations for Markov processes corresponding to PDE systems 1015–1044
FREIDLIN, MARK I. AND WENTZELL, ALEXANDER D. Diffusion processes on graphs and averaging principle 2215–2245
GANTERT, NINA. An inversion of Strassen's law of the iterated logarithm for small time 1045–1049
GEORGII, HANS-OTTO. Large deviations and maximum entropy principle for interacting random fields on $\mathbb{Z}^d$ 1845–1875
GINÉ, EVARIST AND ARCONES, MIGUEL A. Limit theorems for U-processes 1494–1542
GOUET, RAÚL. Martingale functional central limit theorems for a generalized Pólya urn 1624–1639
GOULET, MARK, MEESTER, RONALD AND BURTON, ROBERT M. On 1-dependent processes and k-block factors 2157–2168
GRANNAN, E. R., SWINDLE, G. H., TOUR, J. AND CARLSON, J. M. Singular diffusion limits of a class of reversible self-organizing particle systems 1372–1393
GREVEN, A., DEN HOLLANDER, F., BAILLON, J.-B AND CLÉMENT, PH. A variational approach to branching random walk in random environment 290–317
GREVEN, ANDREAS, BRAMSON, MAURY AND COX, J. T. Ergodicity of critical spatial branching processes in low dimensions 1946–1957
GRIFFEATH, DAVID. Frank Spitzer's pioneering work on interacting particle systems 608–621

GRIFFITHS, R. C. AND ETHIER, S. N. The transition function of a Fleming–Viot process 1571–1590
HAEUSLER, ERICH. A nonstandard law of the iterated logarithm for trimmed sums 831–860
HAIMAN, GEORGE AND PURI, MADAN L. A strong invariance principle concerning the J-upper order statistics for stationary Gaussian sequences 86–135
HE, YUANJIANG. Central limit properties of GZH-semigroups and their applications in probability theory 185–201
HEBISCH, W. AND SALOFF-COSTE, L. Gaussian estimates for Markov chains and random walks on groups 673–709
HILDEBRAND, MARTIN. Random processes of the form $X_{n+1} = a_n X_n + b_n \pmod p$ 710–720
IMKELLER, PETER. Existence and continuity of occupation densities of stochastic integral processes 1050–1072
INGLOT, TADEUSZ AND LEDWINA, TERESA. Moderately large deviations and expansions of large deviations for some functionals of weighted empirical process 1691–1705
IOFFE, D. Recurrent perturbations of certain transient radially symmetric diffusions 1124–1150
ISHII, HITOSHI AND DUPUIS, PAUL. SDEs with oblique reflection on nonsmooth domains 554–580
JACKA, S. D. Local times, optimal stopping and semimartingales 329–339
JAKUBOWSKI, ADAM. An asymptotic independent representation in limit theorems for maxima of nonstationary random sequences 819–830
KARANDIKAR, RAJEEVA L. AND BHATT, ABHAY G. Invariant measures and evolution equations for Markov processes characterized via Martingale problems 2246–2268
KASPI, HAYA AND EISENBAUM, NATHALIE. A necessary and sufficient condition for the Markov property of the local time process 1591–1598
KEMPERMAN, J. H. B., STUDDEN, W. J. AND CHANG, FU-CHUEN. A normal limit theorem for moment sequences 1295–1309
KESTEN, HARRY. Frank Spitzer's work on random walk and Brownian motion 593–607
KHOSHNEVISAN, DAVAR. An embedding of compensated compound Poisson processes with applications to local times 340–361
KRONE, STEPHEN M. Local times for superdiffusions 1599–1623
LAHIRI, SOUMENDRA NATH. Refinements in asymptotic expansions for sums of weakly dependent random vectors 791–799
LALLEY, STEVEN P. Finite range random walk on free groups and homogeneous trees 2087–2130
LANDIM, C. Conservation of local equilibrium for attractive particle systems on Z^d 1782–1808

LEDWINA, TERESA AND INGLOT, TADEUSZ. Moderately large deviations and expansions of large deviations for some functionals of weighted empirical process 1691–1705
LEE, TZONG-YOW. Some limit theorems for super-Brownian motion and semilinear differential equations 979–995
LU, Y. G. AND ACCARDI, L. A continuous version of De Finetti's theorem 1478–1493
LUO, XIAOLONG AND CAI, HAIYAN. Laws of large numbers for a cellular automaton 1413–1426
MAITRA, A. AND SUDDERTH, W. Borel stochastic games with lim sup payoff 861–885
MAROHN, FRANK AND FALK, MICHAEL. Von Mises conditions revisited 1310–1328
MAYER-WOLF, EDDY AND ZEITOUNI, OFER. The probability of small Gaussian ellipsoids and associated conditional moments 14–24
MEESTER, RONALD, BURTON, ROBERT M. AND GOULET, MARK. On 1-dependent processes and k-block factors 2157–2168
MOGULSKII, A. A. Large deviations for processes with independent increments 202–215
MONTGOMERY-SMITH, S. J. AND DILWORTH, S. J. The distribution of vector-valued Rademacher series 2046–2052
MUELLER, CARL. Coupling and invariant measures for the heat equation with noise 2189–2199
MYKLAND, PER ASLAK. Asymptotic expansions for martingales .. 800–818
NG, SIU-AH AND CUTLAND, NIGEL. The Wiener sphere and Wiener measure 1–13
NGUYEN, BAO GIA AND YANG, WEI-SHIH. Triangle condition for oriented percolation in high dimensions 1809–1844
O'NEIL, KEVIN A. AND REDNER, RICHARD A. Asymptotic distributions of weighted U-statistics of degree 2 1159–1169
PEMANTLE, ROBIN AND BURTON, ROBERT. Local characteristics, entropy and limit theorems for spanning trees and domino tilings via transfer-impedances 1329–1371
PICCO, PIERRE AND BOVIER, ANTON. A law of the iterated logarithm for random geometric series 168–184
PINSKY, MARK AND PINSKY, ROSS G. Transience/recurrence and central limit theorem behavior for diffusions in random temporal environments 433–452
PINSKY, ROSS G. A new approach to the Martin boundary via diffusions conditioned to hit a compact set 453–481
PINSKY, ROSS G. AND PINSKY, MARK. Transience/recurrence and central limit theorem behavior for diffusions in random temporal environments 433–452
PITTEL, BORIS. The "stable roommates" problem with random preferences 1441–1477

PRÆSTGAARD, JENS AND WELLNER, JON A. Exchangeably weighted bootstraps of the general empirical process 2053–2086
PURI, MADAN L. AND HAIMAN, GEORGE. A strong invariance principle concerning the J-upper order statistics for stationary Gaussian sequences 86–135
RACHEV, SVETLOZAR AND FELDMAN, RAISA EPSTEIN. U-statistics of random-size samples and limit theorems for systems of Markovian particles with non-Poisson initial distributions ... 1927–1945
RAJPUT, BALRAM S. Supports of certain infinitely divisible probability measures on locally convex spaces 886–897
RÉVÉSZ, P. Clusters of a random walk on the plane 318–328
REDNER, RICHARD A. AND O'NEIL, KEVIN A. Asymptotic distributions of weighted U-statistics of degree 2 1159–1169
RIO, EMMANUEL. Strong approximation for set-indexed partial sum processes via KMT constructions I 759–790
RIO, EMMANUEL. Strong approximation for set-indexed partial-sum processes via KMT constructions II 1706–1727
RÖCKNER, M., ZHANG, T. S. AND ALBEVERIO, S. Girsanov transform for symmetric diffusions with infinite dimensional state space 961–978
ROCHA, AMY L. The infinite secretary problem with recall 898–916
ROSEN, JAY S. AND ADLER, ROBERT J. Intersection local times of all orders for Brownian and stable density processes—construction, renormalisation and limit laws 1073–1123
ROSINSKI, JAN AND SAMORODNITSKY, GENNADY. Distributions of subadditive functionals of sample paths of infinitely divisible processes 996–1014
SALOFF-COSTE, L. AND HEBISCH, W. Gaussian estimates for Markov chains and random walks on groups 673–709
SALOFF-COSTE, LAURENT AND DIACONIS, PERSI. Comparison techniques for random walk on finite groups 2131–2156
SAMORODNITSKY, GENNADY AND ROSINSKI, JAN. Distributions of subadditive functionals of sample paths of infinitely divisible processes 996–1014
SAMORODNITSKY, GENNADY AND TAQQU, MURAD S. Stochastic monotonicity and Slepian-type inequalities for infinitely divisible and stable random vectors 143–160
SAN MARTÍN, JAIME. One-dimensional Stratonovich differential equations 509–553
SATO, KEN-ITI. Convolution of unimodal distributions can produce any number of modes 1543–1549
SCHNEEMEIER, WILHELM. Weak convergence and Glivenko–Cantelli results for weighted empirical U-processes 1170–1184
SCHROEDER, CAROLYN. I-projection and conditional limit theorems for discrete parameter Markov processes 721–758

SEPANSKI, STEVEN J. Almost sure bootstrap of the mean under random normalization 917–925
SETHURAMAN, JAYARAM AND CHAGANTY, NARASINGA RAO. Strong large deviation and local limit theorems 1671–1690
SHAO, QI-MAN AND CSÖRGŐ, MIKLÓS. Strong limit theorems for large and small increments of l^p-valued Gaussian processes 1958–1990
SKALA, HEINZ J. The existence of probability measures with given marginals 136–142
SLUD, ERIC V. The moment problem for polynomial forms in normal random variables 2200–2214
SPITZER, FRANK. Publications 622–623
SPITZER, FRANK. Students 624
STEIF, JEFFREY E. AND DURRETT, RICHARD. Fixation results for threshold voter systems 232–247
STROOCK, D. W. AND ENCHEV, O. Rademacher's theorem for Wiener functionals 25–33
STUDDEN, W. J., CHANG, FU-CHUEN AND KEMPERMAN, J. H. B. A normal limit theorem for moment sequences 1295–1309
SUDDERTH, W. AND MAITRA, A. Borel stochastic games with lim sup payoff 861–885
SUN, JIAYANG. Tail probabilities of the maxima of Gaussian random fields 34–71
SWINDLE, G. H., TOUR, J., CARLSON, J. M. AND GRANNAN, E. R. Singular diffusion limits of a class of reversible self-organizing particle systems 1372–1393
SZNITMAN, ALAIN-SOL. Brownian survival among Gibbsian traps 490–508
TALAGRAND, MICHEL. Regularity of infinitely divisible processes 362–432
TANEMURA, HIDEKI. Central limit theorem for a random walk with random obstacles in R^d 936–960
TAQQU, MURAD S. AND SAMORODNITSKY, GENNADY. Stochastic monotonicity and Slepian-type inequalities for infinitely divisible and stable random vectors 143–160
TEICHER, H., CHOW, Y. S. AND DE LA PEÑA, V. H. Wald's equations for a class of denormalized U-statistics 1151–1158
TOUR, J., CARLSON, J. M., GRANNAN, E. R. AND SWINDLE, G. H. Singular diffusion limits of a class of reversible self-organizing particle systems 1372–1393
TUERO, ARACELI. On the stochastic convergence of representations based on Wasserstein metrics 72–85
VAN ZANDT, TIMOTHY. The Hausdorff metric of σ-fields and the value of information 161–167
WELLNER, JON A. AND PRÆSTGAARD, JENS. Exchangeably weighted bootstraps of the general empirical process 2053–2086
WENTZELL, ALEXANDER D. AND FREIDLIN, MARK I. Diffusion processes on graphs and averaging principle 2215–2245

YANG, WEI-SHIH AND NGUYEN, BAO GIA. Triangle condition for oriented percolation in high dimensions 1809–1844
YIN, Y. Q. AND BAI, Z. D. Limit of the smallest eigenvalue of a large dimensional sample covariance matrix 1275–1294
ZEITOUNI, OFER AND MAYER-WOLF, EDDY. The probability of small Gaussian ellipsoids and associated conditional moments 14–24
ZHANG, T. S., ALBEVERIO, S. AND RÖCKNER, M. Girsanov transform for symmetric diffusions with infinite dimensional state space 961–978
ZHANG, YU. A shape theorem for epidemics and forest fires with finite range interactions 1755–1781
