

PUBLICATIONS OF MARK KAC

ARTICLES

- [1] O nowym sposobie rozwiązywania równań stopnia trzeciego. *Młody Matematyk* **1** 69–71 (1931).
- [2] A trigonometrical series. *J. London Math. Soc.* **9** 116–118 (1934).
- [3] Une remarque sur les séries trigonométriques. *Studia Math.* **5** 99–102 (1935).
- [4] Quelques remarques sur les fonctions indépendantes. *C. R. Acad. Sci., Paris* **202** 1963–1965 (1936).
- [5] Sur les fonctions indépendantes I. *Studia Math.* **6** 46–58 (1936).
- [6] Sur les fonctions indépendantes II. *Studia Math.* **6** 59–66 (1936) (with H. Steinhaus).
- [7] Sur les fonctions indépendantes III. *Studia Math.* **6** 89–97 (1936) (with H. Steinhaus).
- [8] Sur les fonctions indépendantes IV. *Studia Math.* **7** 1–15 (1937) (with H. Steinhaus).
- [9] Sur les fonctions indépendantes V. *Studia Math.* **7** 96–100 (1937).
- [10] On the stochastic independence of functions. *Wiadomości Matematyczne* **44** 83–112 (1937).
- [11] Une remarque sur les polynômes de M. S. Bernstein. *Studia Math.* **7** 49–51 (1937).
- [12] Une remarque sur les équations fonctionnelles. *Comment. Math. Helv.* **9** 170–171 (1936–37).
- [13] Quelques remarques sur les zéros des intégrales de Fourier. *J. London Math. Soc.* **13** 128–130 (1938).
- [14] Sur les fonctions $2^n t - [2^n t] - \frac{1}{2}$. *J. London Math. Soc.* **13** 131–134 (1938).
- [15] Note on power series with big gaps. *Amer. J. Math.* **61** 473–476 (1939).
- [16] On a characterization of the normal distribution. *Amer. J. Math.* **61** 726–728 (1939).
- [17] Circular equidistribution and statistical independence. *Amer. J. Math.* **61** 677–682 (1939) (with E. R. van Kampen).
- [18] On Buffon's needle problem and its generalizations. *Amer. J. Math.* **61** 672–676 (1939) (with E. R. van Kampen and A. Wintner).
- [19] On the distribution of the values of real almost periodic functions. *Amer. J. Math.* **61** 985–991 (1939) (with E. R. van Kampen and A. Wintner).
- [20] On a problem concerning probability and its connection with the theory of diffusion. *Bull. Amer. Math. Soc.* **46** 534–537 (1940).
- [21] Ramanujan sums and almost periodic functions. *Amer. J. Math.* **62** 107–114 (1940) (with E. R. van Kampen and A. Wintner).
- [22] Ramanujan sums and almost periodic functions. *Studia Math.* **9** 43–53 (1940) (with P. Erdős, E. R. van Kampen and A. Wintner).
- [23] Almost periodicity and the representation of integers as sums of squares. *Amer. J. Math.* **62** 122–126 (1940).
- [24] The Gaussian law of errors in the theory of additive number theoretic functions. *Amer. J. Math.* **62** 738–742 (1940) (with P. Erdős).
- [25] Translated functions and statistical independence. *Bull. Amer. Math. Soc.* **47** 148–154 (1941) (with R. P. Agnew).
- [26] Convergence and divergence of non-harmonic gap series. *Duke Math. J.* **8** 541–545 (1941).
- [27] Note on the distribution of values of the arithmetic function $d(m)$. *Bull. Amer. Math. Soc.* **47** 815–817 (1941).
- [28] Two number theoretic remarks. *Rev. Cienc. (Lima)* **43** 177–182 (1941).
- [29] Note on the partial sums of the exponential series. *Rev. Universidad Nacional de Tucumán* **3** 151–153 (1942).
- [30] On the average number of real roots of a random algebraic equation. *Bull. Amer. Math. Soc.* **49** 314–320 (1943). Correction in *Bull. Amer. Math. Soc.* **49** 938 (1943).
- [31] On the distribution of values of trigonometric sums with linearly independent frequencies. *Amer. J. Math.* **65** 609–615 (1943).
- [32] Convergence of certain gap series. *Ann. of Math.* **44** 411–415 (1943).
- [33] Statistical analysis of certain types of random functions. *Ann. Math. Statist.* **15** 173–181 (1944) (with Henry Hurwitz, Jr.).
- [34] Random walk in the presence of absorbing barriers. *Ann. Math. Statist.* **16** 62–67 (1945).

- [35] Inequalities for Fourier transforms of positive functions. *Duke Math. J.* **12** 189–206 (1945) (with R. P. Boas, Jr.).
- [36] A remark on independence of linear and quadratic forms involving independent Gaussian variables. *Ann. Math. Statist.* **16** 400–401 (1945).
- [37] On the distribution of values of sums of the type $\sum f(2^k t)$. *Ann. of Math.* **47** 33–49 (1946).
- [38] On certain limit theorems of the theory of probability. *Bull. Amer. Math. Soc.* **52** 292–302 (1946) (with P. Erdős).
- [39] On the average of a certain Wiener functional and a related limit theorem in calculus of probability. *Trans. Amer. Math. Soc.* **59** 401–414 (1946).
- [40] On the theory of random noise in radio receivers with square law detectors. *J. Appl. Phys.* **18** 383–397 (1947) (with A. J. F. Siegert).
- [41] On the number of positive sums of independent random variables. *Bull. Amer. Math. Soc.* **53** 1011–1020 (1947) (with P. Erdős).
- [42] On the notion of recurrence in discrete stochastic processes. *Bull. Amer. Math. Soc.* **53** 1002–1010 (1947).
- [43] Random walk and the theory of Brownian motion. *Amer. Math. Monthly* **54** 369–391 (1947).
- [44] An explicit representation of a stationary Gaussian process. *Ann. Math. Statist.* **18** 438–442 (1947).
- [45] A gap theorem. *Trans. Amer. Math. Soc.* **63** 235–248 (1948) (with R. Salem and A. Zygmund).
- [46] On the characteristic functions of the distributions of estimates of various deviations in samples from a normal population. *Ann. Math. Statist.* **19** 257–261 (1948).
- [47] On distributions of certain Wiener functionals. *Trans. Amer. Math. Soc.* **65** 1–13 (1949).
- [48] On deviations between theoretical and empirical distributions. *Proc. Nat. Acad. Sci. U.S.A.* **35** 252–257 (1949).
- [49] On the average number of real roots of a random algebraic equation (II). *Proc. London Math. Soc.* **50** 390–408 (1949).
- [50] Probability methods in some problems of analysis and number theory. *Bull. Amer. Math. Soc.* **55** 641–665 (1949).
- [51] Distribution problems in the theory of random noise. *Proc. Symp. Appl. Math.* **2** 87–88 (1950).
- [52] The distribution of the maximum of partial sums of independent random variables. *Canad. J. Math.* **2** 375–384 (1950) (with H. Pollard).
- [53] Review of *Stochastic Processes and their Application to the Theory of Cosmic Radiation* by Niels Arley. *Physics Today* **3** 34–35 (1950).
- [54] Remarks on fluctuations of sums of independent random variables. *Mem. Amer. Math. Soc.* No. 6 (1951). See also corrections in *Proc. Amer. Math. Soc.* **4** 560–563 (1953) (with K. L. Chung).
- [55] On some connections between probability theory and differential and integral equations. *Proc. Second Berkeley Symp. Math. Statist. Prob.* (J. Neyman, ed.) 189–215 (1951). Univ. of California Press.
- [56] On a theorem of Zygmund. *Proc. Cambridge Philos. Soc.* **47** 475–476 (1951).
- [57] A sampling method for determining the lowest eigenvalue and the principal eigenfunction of Schrödinger's equation. *J. Res. Nat. Bur. Standards* **44** 551–557 (1951) (with M. D. Donsker).
- [58] The spherical model of a ferromagnet. *Phys. Rev.* **86** 821–835 (1952) (with T. H. Berlin).
- [59] A combinatorial solution of the two-dimensional Ising model. *Phys. Rev.* **88** 1332–1337 (1952) (with J. C. Ward).
- [60] An application of probability theory to the study of Laplace's equation. *Ann. Soc. Math. Polon.* **25** 122–130 (1953).
- [61] On the eigenvalues of certain Hermitian forms. *J. Rational Mech. Anal.* **2** 767–800 (1953) (with W. L. Murdock and G. Szegő).
- [62] Signal and noise problems. *Amer. Math. Monthly* **61** 23–26 (1954).
- [63] Toeplitz matrices, translation kernels and a related problem in probability theory. *Duke Math. J.* **21** 501–509 (1954).

- [64] Foundations of kinetic theory. *Proc. Third Berkeley Symp. Math. Statist. Prob.* (J. Neyman, ed.) **3** 171–197 (1956). Univ. of California Press.
- [65] A remark on the preceding paper by A. Rényi. *Acad. Serbe Sci., Extrait des Publication de l'Institute Mathématique* **8** 163–165 (1955).
- [66] On tests of normality and other tests of goodness of fit based on distance methods. *Ann. Math. Statist.* **26** 189–211 (1955) (with J. Kiefer and J. Wolfowitz).
- [67] Distribution of eigenvalues of certain integral operators. *Michigan Math. J.* **3** 141–148 (1955–56).
- [68] Some remarks on the use of probability in classical statistical mechanics. *Bull. de l'Académie Royale de Belgique (Classe des Sciences)* **42** 356–361 (1956).
- [69] Review of *Methods of Theoretical Physics* by P. M. Morse and H. Feshbach. *Bull. Amer. Math. Soc.* **62** 52–54 (1956).
- [70] On occupation times for Markoff processes. *Trans. Amer. Math. Soc.* **84** 444–458 (1957) (with D. A. Darling).
- [71] A class of limit theorems. *Trans. Amer. Math. Soc.* **84** 459–471 (1957).
- [72] Probability in classical physics. *Proc. Symp. Appl. Math.* **7** 73–85 (1957).
- [73] Uniform distribution on a sphere. *Bull. Acad. Polon. Sci.* **5** 485–486 (1957).
- [74] On a series of cosecants. *Nederl. Akad. Wetensch. Proc. Ser. A 60, Indag. Math.* **19** 265–267 (1957) (with R. Salem).
- [75] Some remarks on stable processes. *Publ. Inst. Statist. Univ. Paris* **6** 303–306 (1957).
- [76] Review of *Marian Smoluchowski* by Armin Teske. *Physics Today* **10** 35–36 (1957).
- [77] Remark on recurrence times. *Phys. Rev.* **115** 1 (1959).
- [78] Some remarks on stable processes with independent increments. In *Probability and Statistics: The Harald Cramér Volume* (Ulf Grenander, ed.) 130–138 (1959). Almqvist and Wiksell, Stockholm, and Wiley, New York.
- [79] On rapidly mixing transformations and an application to continued fractions. *Bull. Amer. Math. Soc.* **64** 283–287 (1958). See also correction in *Bull. Amer. Math. Soc.* **65** 67 (1959) (with H. Kesten).
- [80] On the partition function of a one-dimensional gas. *Phys. Fluids* **2** 8–12 (1959).
- [81] Large excursions of Gaussian processes. *Ann. Math. Statist.* **30** 1215–1228 (1959) (with D. Slepian).

- [167] Dehydrated elephants revisited. *Amer. Sci.* **70** 633–634 (1982).
- [168] Statistical odds and ends. *Amer. Sci.* **71** 186–187 (1983).
- [169] What is random? *Amer. Sci.* **71** 405–406 (1983).
- [170] Propagation of chaos and the Burgers equations. *SIAM J. Appl. Math.* **43** 971–980 (1983) (with Eugene Gutkin).
- [171] Nightingale, Florence among the statisticians. *Amer. Sci.* **72** 72–73 (1984).
- [172] More on randomness. *Amer. Sci.* **72** 282–283 (1984).
- [173] How I became a mathematician. *Amer. Sci.* **72** 498–499 (1984).
- [174] *Discrete Thoughts: Essays on Mathematics, Science, and Philosophy*. Birkhäuser, Boston (1985) (with G. C. Rota and J. T. Schwartz).

BOOKS

- [175] *Analytic Geometry and Calculus*. MacMillan, New York (1946) (with John F. Randolph).
- [176] *Some Stochastic Problems in Physics and Mathematics*. Magnolia Petroleum Co. (1956).
- [177] *Probability and Related Topics in Physical Sciences*. Interscience, New York (1959).
- [178] *Statistical Independence in Probability, Analysis and Number Theory*. Wiley, New York (1959).
- [179] *Mathematics and Logic: Retrospect and Prospects*. Frederick A. Praeger, New York (1968) (with S. Ulam).
- [180] *Aspects Probabilistes de la Théorie du Potentiel, Séminaire de Mathématiques Supérieures, Été 1968*. Les Presses de l'Université de Montréal (1970).
- [181] *Quelques Problèmes Mathématiques en Physique Statistique*. Collection de la Chaire Aisens-tadt, Les Presses de l'Université de Montréal (1974).
- [182] *Enigmas of Chance, An Autobiography*. Harper and Row, New York (1985).
