CONTENTS OF VOLUME 6

SPECIAL INVITED PAPERS

DUDLEY, R. M. Central limit theorems for empirical measures 899–929
DYNKIN, E. B. Sufficient statistics and extreme points 705–730

ARTICLES AND SHORT COMMUNICATIONS

ADLER, ROBERT J. The uniform dimensions of the level sets of a Brownian sheet 509–515
ADLER, ROBERT J. Weak convergence results for extremal processes generated by dependent random variables 660–667
AIRAULT, HÉLÈNE. Quelques ensembles exceptionnels en théorie du potentiel 316–320
ALDOUS, DAVID. Stopping times and tightness 335–340
ALDOUS, D. J. AND EAGLESON, G. K. On mixing and stability of limit theorems 325–331
AMMANN, LARRY P. AND THALL, PETER F. Random measures with aftereffects 216–230
ARAUJO, ALOISIO AND GINÉ M., EVARIST. Type, cotype and Lévy measures in Banach spaces 637–643
ASTBURY, KENNETH A. Amarts indexed by directed sets 267–278
ATHREYA, K. B., MCDONALD, D. AND NEY, P. Limit theorems for semi-Markov processes and renewal theory for Markov chains 788–797
BHATTACHARYA, R. N. Criteria for recurrence and existence of invariant measures for multidimensional diffusions 541–553
BLACKWELL, D. Borel-programmable functions 321–324
BOLDRIGHINI, CARLO, KEANE, MICHAEL AND MARCHETTI, FEDERICO. Billiards in polygons 532–540
BOLTHAUSEN, E. On the speed of convergence in Strassen's law of the iterated logarithm 668–672
BROWN, TIM. A martingale approach to the Poisson convergence of simple point processes 615–628
CAMBANIS, STAMATIS AND HUANG, STEEL T. Stochastic and multiple Wiener integrals for Gaussian processes 585–614
CHEN, LOUIS H. Y. A short note on the conditional Borel-Cantelli lemma 699–700
CHEN, LOUIS H. Y. AND HO, SOO-THONG. An L_p bound for the remainder in a combinatorial central limit theorem 231–249
CHOSID, LEO AND ISAAC, RICHARD. On the range of recurrent Markov chains 680–687
CUZICK, JACK. Local nondeterminism and the zeros of Gaussian processes 72–84
CUZICK, JACK. Some local properties of Gaussian vector fields 984–994

DALEY, D. J. Upper bounds for the renewal function via Fourier methods ... 876–884
DALEY, D. J. AND MOHAN, N. R. Asymptotic behaviour of the variance of renewal processes and random walks ... 516–521
DAVIS, BURGESS. On stopping times for n-dimensional Brownian motion 651–659
DAVISSON, L. D., LEDRAPPIER, F., SHIELDS, P. C. AND NEUHOFF, D. L. The distortion-rate function for nonergodic sources ... 138–143
DIACONIS, PERSI AND STEIN, CHARLES. Some Tauberian theorems related to coin tossing ... 483–490
DURRETT, RICHARD. Conditioned limit theorems for some null recurrent Markov processes ... 798–828
DURRETT, RICHARD AND RESNICK, SIDNEY I. Functional limit theorems for dependent variables ... 829–846
DYM, HARRY. Conditions for a class of stationary Gaussian processes to be Kolmogorov mixing ... 159–161
EAGLESON, G. K. AND ALDOUS, D. J. On mixing and stability of limit theorems ... 325–331
GARLING, D. J. H. The range of stochastic integration ... 332–334
GEMAN, DONALD AND ZINN, JOEL. On the increments of multidimensional random fields ... 151–158
GINÉ M., EVARIST AND ARAUJO, ALOISIO. Type, cotype and Lévy measures in Banach spaces ... 637–643
GRAY, LAWRENCE. Controlled spin-flip systems ... 953–974
GREENWOOD, PRISCILLA AND SHAKED, MOSHE. Dual pairs of stopping times for random walk ... 644–650
GRIFFEATH, DAVID. Limit theorems for nonergodic set-valued Markov processes ... 379–387
GUT, ALLAN. Marcinkiewicz laws and convergence rates in the law of large numbers for random variables with multidimensional indices 469–482
GZYL, HENRYK. On generators of subordinate semigroups ... 975–983
HARRIS, T. E. Additive set-valued Markov processes and graphical methods ... 355–378
HEYDE, C. C. A log log improvement to the Riemann hypothesis for the Hawkins random sieve ... 870–875
HO, SOO-THONG AND CHEN, LOUIS H. Y. An L_p bound for the remainder in a combinatorial central limit theorem ... 231–249
HOCHBERG, KENNETH J. A signed measure on path space related to Wiener measure ... 433–458
HOLLEY, R. AND LIGGETT, T. M. The survival of contact processes ... 198–206
HOSOYA, YUZO. Discrete-time stable processes and their certain properties ... 94–105
HOSOYA, YUZO. Robust linear extrapolations of second-order stationary processes ... 574–584
HUANG, STEEL T. AND CAMBANIS, STAMATIS. Stochastic and multiple Wiener integrals for Gaussian processes ... 585–614

ISAAC, RICHARD AND CHOSID, LEO. On the range of recurrent Markov chains ... 680–687
JUPP, P. E. AND MARDIA, K. V. Density-preserving statistics and densities for sample means ... 688–694
KALLENBERG, OLAV. On the independence of velocities in a system of noninteracting particles ... 885–890
KAMAE, T. AND KRENGEL, U. Stochastic partial ordering ... 1044–1049
KARR, ALAN F. Lévy random measures ... 57–71
KAUFMAN, R. AND PHILIPP, WALTER. A uniform law of the iterated logarithm for classes of functions ... 930–952
KEANE, MICHAEL, MARCHETTI, FEDERICO AND BOLDRIGHINI, CARLO. Billiards in polygons ... 532–540
KENT, JOHN. Some probabilistic properties of Bessel functions ... 760–770
KERSTING, GÖTZ D. A weak convergence theorem with application to the Robbins-Monro process ... 1015–1025
KINGMAN, J. F. C. Uses of exchangeability ... 183–197
KLEIN, ABEL. A generalization of Markov processes ... 128–132
KRENGEL, U. AND KAMAE, T. Stochastic partial ordering ... 1044–1049
KUMAR, A. AND SCHREIBER, B. M. Characterization of subclasses of class L probability distributions ... 279–293
LAI, TZE LEUNG AND STOUT, WILLIAM. The law of the iterated logarithm and upper-lower class tests for partial sums of stationary Gaussian sequences ... 731–750
LANE, DAVID A. On the fields of some Brownian martingales ... 499–508
LANGBERG, N., PROSCHAN, F. AND QUINZI, A. J. Converting dependent models into independent ones, preserving essential features ... 174–181
LEDRAPPIER, F., SHIELDS, P. C., NEUHOFF, D. L. AND DAVISSON, L. D. The distortion-rate function for nonergodic sources ... 138–143
LIGGETT, THOMAS M. Attractive nearest neighbor spin systems on the integers ... 629–636
LIGGETT, T. M. AND HOLLEY, R. The survival of contact processes ... 198–206
LYNCH, JAMES. A curious converse of Siever's theorem ... 169–173
MACNEILL, IAN B. Limit processes for sequences of partial sums of regression residuals ... 695–698
MAEJIMA, MAKOTO. Some L_p versions for the central limit theorem ... 341–344
MARCHETTI, FEDERICO, BOLDRIGHINI, CARLO AND KEANE, MICHAEL. Billiards in polygons ... 532–540
MARDIA, K. V. AND JUPP, P. E. Density-preserving statistics and densities for sample means ... 688–694
MCDONALD, DAVID. On semi-Markov and semiregenerative processes II ... 995–1014
MCDONALD, D., NEY, P. AND ATHREYA, K. B. Limit theorems for semi-Markov processes and renewal theory for Markov chains ... 788–797
MCLEISH, D. L. An extended martingale principle ... 144–150
MILLAR, P. W. A path decomposition for Markov processes ... 345–348
