CONTENTS OF VOLUME 7

ARTICLES AND SHORT COMMUNICATIONS

ALALOUF, I. S. AND STYAN, G. P. H. Characterizations of estimability in the general linear model 194–200

ALAM, KHURSHEED. Estimation of multinomial probabilities 282–283

ALBERS, W. Asymptotic deficiencies of one-sample rank tests under restricted adaptation 944–954

ANDERSON, T. W. Hsu's work in multivariate analysis 474–478

ANDERSON, T. W. AND TAYLOR, JOHN B. Strong consistency of least squares estimates in dynamic models 484–489

ANDERSON, T. W., CHUNG, K. L. AND LEHMANN, E. L. Pao-Lu Hsu, 1909–1970 467–470

ARNOLD, BARRY C. AND GROENEVELD, RICHARD A. Bounds on expectations of linear systematic statistics based on dependent samples 220–223

ARNOLD, STEVEN F. A coordinate-free approach to finding optimal procedures for repeated measures designs 812–822

BERAN, RUDOLF. Testing for ellipsoidal symmetry of a multivariate density 150–162

BERAN, RUDOLF. Exponential models for directional data 1162–1178

BERGER, ROGER L. Minimax subset selection for loss measured by subset size 1333–1338

BERNARDO, JOSÉ M. Expected information as expected utility 686–690

BERRY, DONALD A. AND CHRISTENSEN, RONALD. Empirical Bayes estimation of a binomial parameter via mixtures of Dirichlet processes 558–568

BERRY, DONALD A. AND FRISTEDT, BERT. Bernoulli one-armed bandits—arbitrary discount sequences 1086–1105

BEVAN, STUART, KULLBERG, RICHARD AND RICE, JOHN. An analysis of cell membrane noise 237–257

BICKEL, P. J. AND HERZBERG, AGNES M. Robustness of design against autocorrelation in time I: asymptotic theory, optimality for location and linear regression 77–95

BLAESILD, P. Conditioning with conic sections in the two-dimensional normal distribution 659–670

BLOCK, HENRY W. AND SAVITS, THOMAS H. Systems with exponential life and IFRA component lives 911–916

BLUM, J. AND WALTER, G. G. Probability density estimation using delta sequences 328–340

BOOS, DENNIS D. A differential for L-statistics 955–959

BRATCHER, T. L. AND MANN, J. E. On Bayes sequential tests regarding two Koopman-Darmois distributions: bounds on the maximum sample size 1339–1344

BROWN, LAWRENCE D. A heuristic method for determining admissibility of estimators—with applications ... 960–994
BROWN, L. D., COHEN, ARTHUR AND STRAWDERMAN, W. E. On the admissibility or inadmissibility of fixed sample size tests in a sequential setting ... 569–578
BROWN, L. D., COHEN, ARTHUR AND STRAWDERMAN, W. E. Monotonicity of Bayes sequential tests ... 1222–1230
BROWN, MARK AND SOLOMON, HERBERT. On combining pseudorandom number generators ... 691–695
CAINES, P. E. AND RISSANEN, J. The strong consistency of maximum likelihood estimators for ARMA processes ... 297–315
CANE, GWENDA J. Note on a result of Seeger in partitioning normal populations ... 917–919
CHANG, DER-SHIN. Design of optimal control for a regression problem. 1078–1085
CHRISTENSEN, RONALD AND BERRY, DONALD A. Empirical Bayes estimation of a binomial parameter via mixtures of Dirichlet processes ... 558–568
CHRISTOPEIT, N. AND HELMES, K. A convergence theorem for random linear combinations of independent normal random variables ... 795–800
CHUNG, K. L. Hsu's work in probability ... 479–483
CHUNG, K. L., LEHMANN, E. L. AND ANDERSON, T. W. Pao-Lu Hsu, 1909–1970 ... 467–470
COHEN, ARTHUR, STRAWDERMAN, W. E. AND BROWN, L. D. On the admissibility or inadmissibility of fixed sample size tests in a sequential setting ... 569–578
COHEN, ARTHUR, STRAWDERMAN, W. E. AND BROWN, L. D. Monotonicity of Bayes sequential tests ... 1222–1230
CSÖRGÖ, SÁNDOR. Erdös-Rényi laws ... 772–787
DALAL, S. R. AND HALL, W. J. Most economical robust selection procedures for location parameters ... 1321–1328
DANIEL, C. AND LEHMANN, E. L. Henry Scheffé 1907–1977 ... 1149–1161
DAVIES, H. I. AND WEGMAN, EDWARD J. Remarks on some recursive estimators of a probability density ... 316–327
DEGROOT, MORRIS H. AND GOEL, PREM K. Comparison of experiments and information measures ... 1066–1077
DEVROYE, L. P. AND WAGNER, T. J. The L_1 convergence of kernel density estimates ... 1136–1139
DIACONIS, PERSI AND YLVISAKER, DONALD. Conjugate priors for exponential families ... 269–281
DION, J. P. AND ESTY, W. W. Estimation problems in branching processes with random environments ... 680–685
DIVGI, D. R. Calculation of univariate and bivariate normal probability functions ... 903–910
DUNSMUIR, W. A central limit theorem for parameter estimation in stationary vector time series and its application to models for a signal observed with noise ... 490–506

DYKSTRA, RICHARD L. On dependent tests of significance in the multivariate analysis of variance 459–461
EFRON, B. Bootstrap methods: another look at the jackknife 1–26
EICKER, F. The asymptomatic distribution of the suprema of standardized empirical processes 116–138
EPLETT, W. J. R. The small sample distribution of a Mann-Whitney type statistic for circular data 446–453
ESTY, W. W. AND DION, J. P. Estimation problems in branching processes with random environments 680–685
FERGUSON, THOMAS S. AND PHADIA, ESWAR G. Bayesian nonparametric estimation based on censored data 163–186
FISHER, LLOYD AND GILLESPIE, MARY JO. Confidence bands for the Kaplan-Meier survival curve estimate 920–924
FORTUS, ROBERT. Approximations to Bayesian sequential tests of composite hypotheses 579–591
FRIEDMAN, JEROME H. AND RAFSKY, LAWRENCE C. Multivariate generalizations of the Wald-Wolfowitz and Smirnov two-sample tests 697–717
FRISTEDT, BERT AND BERRY, DONALD A. Bernoulli one-armed bandits—arbitrary discount sequences 1086–1105
FULLER, WAYNE A. AND HASZA, DAVID P. Estimation for autoregressive processes with unit roots 1106–1120
GILLESPIE, MARY JO AND FISHER, LLOYD. Confidence bands for the Kaplan-Meier survival curve estimate 920–924
GLESER, LEON JAY. Minimax estimation of a normal mean vector when the covariance matrix is unknown 838–846
GOEL, PREM K. AND DEGROOT, MORRIS H. Comparison of experiments and information measures 1066–1077
GROENEVELD, RICHARD A. AND ARNOLD, BARRY C. Bounds on expectations of linear systematic statistics based on dependent samples 220–223
HAFF, L. R. Estimation of the inverse covariance matrix: random mixtures of the inverse Wishart matrix and the identity 1264–1276
HALL, W. J. AND DALAL, S. R. Most economical robust selection procedures for location parameters 1321–1328
HASZA, DAVID P. AND FULLER, WAYNE A. Estimation for autoregressive processes with unit roots 1106–1120
HEDAYAT, A. AND LI, SHUO-YEN ROBERT. The trade-off method in the construction of BIB designs with variable support sizes 1277–1287
HELMES, K. AND CHRISTOPEIT, N. A convergence theorem for random linear combinations of independent normal random variable ... 795–800
HERZBERG, AGNES M. AND BICKEL, P. J. Robustness of design against autocorrelation in time I: asymptotic theory, optimality for location and linear regression 77–95
