

CORRECTION TO "TWO CHARACTERIZATIONS OF THE DIRICHLET DISTRIBUTION"

BY J. FABIUS

University of Leiden

It has been pointed out by B.D. Kapur that the proof of Lemma 3 is incomplete. To complete it one should insert the words "and second" after "first" in line 14 on page 586 and replace the inequality $r \geq 1$ in the next line by $r \geq 2$. The correct argument is also to be found in a slightly different context in the proof of Theorem 2 in Fabius (1972).
