

Banach J. Math. Anal.
Volume 8, Number 1, 2014

- 1 On the equivalence between some multidimensional Hardy-type inequalities** pp. 1-13
J.A. Oguntuase; L.-E. Persson; N. Samko; A. Sonubi
- 2 Chlodovsky type operators on parabolic domain** pp. 14-25
S. Sucu; E. İbikli
- 3 Smoothness and approximative compactness in Orlicz function spaces** pp. 26-38
S. Shang; Y. Cui; Y. Fu
- 4 Linear maps between operator algebras preserving certain spectral functions** pp. 39-46
X. Cao; S. Chen
- 5 Tensor products and the spectral continuity for k -quasi- $*$ -class A operators** pp. 47-54
F. Gao; X. Li
- 6 On the essential spectrum of the sum of self-adjoint operators and the closedness of the sum of operator ranges** pp. 55-63
I. Feshchenko
- 7 Composition operators between weighted Bergman spaces with admissible Bekolle weights** pp. 64-88
A.K. Sharma; S. Ueki
- 8 Orthogonal bases and a structure of finite dimensional normed linear spaces** pp. 89-97
R. Tanaka; K.-S. Saito
- 9 (p,q) -outer generalized inverse of block matrices in Banach algebras** pp. 98-108
M. Kolundzija
- 10 Two classes of bounds for q -gamma and q -digamma functions in terms of q -zeta functions** pp. 109-117
A. Salem
- 11 New estimate of essential norm of composition followed by differentiation between Bloch-type spaces** pp. 118-137
Y.-X. Liang; Z.-H. Zhou
- 12 Baumslag-Solitar group C^* -algebras from interval maps** pp. 138-147

C. Correia Ramos; R. El Harti; N. Martins; P. Pinto

- 13 **Some optimization problems on ranks and inertias of matrix-valued functions subject to linear matrix equation restrictions** pp. 148-178
Y. Tian
- 14 **The problem of isometric extension in the unit sphere of the space $s_p(\alpha, H)$** pp. 179-189
X. Fu
- 15 **Absolutely summing operators on separable Lindenstrauss spaces as tree spaces and the bounded approximation property** pp. 190-210
A. Lima; V. Lima; E. Oja
- 16 **Isometric uniqueness of a complementably universal Banach space for Schauder decompositions** pp. 211-220
J. Garbulińska-Węgrzyn
- 17 **Boundedness of intrinsic Littlewood-Paley functions on Musielak-Orlicz Morrey and Campanato spaces** pp. 221-268
Y. Liang; E. Nakai; D. Yang; J. Zhang
- 18 **Determinantal representation of trigonometric polynomial curves via Sylvester method** pp. 269-278
M.-T. Chien; H. Nakazato
- 19 **Skew symmetry of a class of operators** pp. 279-294
C.G. Li; T.T. Zhou
- 20 **Absolute sums of Banach spaces and some geometric properties related to rotundity and smoothness** pp. 295-334
J.-D. Hardtke
