

INROADS

T. Kuczumow, W. Rzynowski and A. Stachura	
Lipschitzian homeomorphisms with large sets of directional derivatives.....	696
E. Arnold	
Some applications of an L^1 version of the Gauss integral theorem.....	704
J. Pecaric	
On Levinson's inequality.....	710
H. Miller	
A further extension of a result of Borwein and Ditor.....	713
R. Gordon	
Another look at a convergence theorem for the Henstock integral.....	724
L. Drewnowski and I. Labuda	
On minimal convex USCO and maximal monotone maps.....	729
B. Thomson	
An analogue of Charzynski's theorem.....	743
Lee Peng Yee	
On ACG* functions.....	754
C. Freiling	
A converse to a theorem of Sierpinski on almost symmetric sets.....	760
P. Humke and M. Laczko	
A historical note on the measurability properties of symmetrically continuous and symmetrically differentiable functions.....	768
C. Freiling and J. Simms	
A three-dart response to an argument of Bagemihl.....	772
