TOPICAL SURVEY

R. Vallin
Shell porous, porous, totally porous, hyperporous 294

RESEARCH ARTICLES

Z. Bukovská, L. Bukovsky and J. Ewert
Quasi-uniform convergence and L -spaces 321

Gy. Petruska
On Borel sets with small cover 330

E. Wagner-Bojakowska
Some remarks on density topologies on the plane 339

J. Marík
Norms and derivatives 343

J. Xu and P. Y. Lee
Stochastic integrals of Ito and Henstock 352

K. Ciesielski
Density and I-density continuous homeomorphisms 367

B. Kirchheim
Baire one star functions 385

Z. Grande
On functions with pointwise discontinuous restrictions 400

Z. Grande
Integration using Vital covers 409

K. Ciesielski and S. Nadler, Jr.
An absorption property for the composition of functions 420

C. Coppin
Properties of a generalized Stieltjes integral defined on
dense subsets of an interval 427

Z. Buczolich
The g -integral is not rotation invariant 437

INROADS

J. Hejduk
Non-Baire sets in category bases 448

H. Haase
A note on invariant measures 453

J. Mendoza
On Lebesgue integrability of McShane integrable functions 456
