A special case of the system $Z_3(A)$ introduced in [1,§1] was first considered by T. Ibukiyama and appeared in [2].

On page 170 in [1], this system is mistakenly called ‘the Zagier system’, which should properly be called ‘the Ibukiyama system’ or ‘the Ibukiyama-Zagier system’, because this is a special case of the systems of differential equations given by Ibukiyama and Zagier in [3].

The authors thank D. Zagier who pointed out this.
