

# ANNALES DE L'INSTITUT HENRI POINCARÉ

## PROBABILITÉS ET STATISTIQUES

<b>Estimation in models driven by fractional Brownian motion</b> .....	<i>C. Berzin and J. R. León</i>	191–213
<b>Small-time behavior of beta coalescents</b> <i>J. Berestycki, N. Berestycki and J. Schweinsberg</i>		214–238
<b>Bounds on regeneration times and limit theorems for subgeometric Markov chains</b> <i>R. Douc, A. Guillin and E. Moulines</i>		239–257
<b>On the path structure of a semimartingale arising from monotone probability theory</b> .....	<i>A. C. R. Belton</i>	258–279
<b>Vitesse de convergence dans le théorème limite central pour des chaînes de Markov fortement ergodiques</b> .....	<i>L. Hervé</i>	280–292
<b>An algebraic approach to Pólya processes</b> .....	<i>N. Pouyanne</i>	293–323
<b>Comparison between criteria leading to the weak invariance principle</b> .....	<i>O. Durieu and D. Volný</i>	324–340
<b>Quenched non-equilibrium central limit theorem for a tagged particle in the exclusion process with bond disorder</b> <i>M. D. Jara and C. Landim</i>		341–361
<b>An isoperimetric inequality on the <math>\ell_p</math> balls</b> .....	<i>S. Sodin</i>	362–373
<b>Anomalous heat-kernel decay for random walk among bounded random conductances</b> <i>N. Berger, M. Biskup, C. E. Hoffman and G. Kozma</i>		374–392
