

ANNALES DE L'INSTITUT HENRI POINCARÉ

PROBABILITÉS ET STATISTIQUES

Poisson convergence for the largest eigenvalues of heavy tailed random matrices	<i>A. Auffinger, G. Ben Arous and S. Péché</i>	589–610
Stochastic domination for iterated convolutions and catalytic majorization	<i>G. Aubrun and I. Nechita</i>	611–625
Large deviations for Riesz potentials of additive processes	<i>R. Bass, X. Chen and J. Rosen</i>	626–666
Infinite divisibility of solutions to some self-similar integro-differential equations and exponential functionals of Lévy processes	<i>P. Pierre</i>	667–684
Quenched limits for transient, ballistic, sub-Gaussian one-dimensional random walk in random environment	<i>J. Peterson</i>	685–709
Pointwise ergodic theorems with rate and application to the CLT for Markov chains	<i>C. Cuny and M. Lin</i>	710–733
Convex entropy decay via the Bochner–Bakry–Emery approach	<i>P. Caputo, P. Dai Pra and G. Posta</i>	734–753
A recursion formula for the moments of the Gaussian orthogonal ensemble	<i>M. Ledoux</i>	754–769
Large deviations for partition functions of directed polymers in an IID field	<i>I. Ben-Ari</i>	770–792
Branching Brownian motion with an inhomogeneous breeding potential	<i>J. W. Harris and S. C. Harris</i>	793–801
Upper bounds for minimal distances in the central limit theorem	<i>E. Rio</i>	802–817
Planar Lorentz process in a random scenery	<i>F. Pène</i>	818–839
Potential confinement property of the parabolic Anderson model	<i>G. Grüninger and W. König</i>	840–863
On unique extension of time changed reflecting Brownian motions	<i>Z.-Q. Chen and M. Fukushima</i>	864–875
Maximal Brownian motions	<i>J. Brossard, M. Émery and C. Leuridan</i>	876–886
