

ANNALES DE L'INSTITUT HENRI POINCARÉ

PROBABILITÉS ET STATISTIQUES

Hydrodynamic limit for a particle system with degenerate rates	<i>P. Gonçalves, C. Landim and C. Toninelli</i>	887–909
Superposition rules and stochastic Lie–Scheffers systems	<i>J.-A. Lázaro-Camí and J.-P. Ortega</i>	910–931
A probabilistic ergodic decomposition result	<i>A. Raugi</i>	932–942
Degenerate stochastic differential equations for catalytic branching networks	<i>S. Kliem</i>	943–980
Homogenization of locally stationary diffusions with possibly degenerate diffusion matrix	<i>R. Rhodes</i>	981–1001
On the small time asymptotics of the two-dimensional stochastic Navier–Stokes equations	<i>T. Xu and T. Zhang</i>	1002–1019
Cavity method in the spherical SK model	<i>D. Panchenko</i>	1020–1047
Collision probabilities in the rarefaction fan of asymmetric exclusion processes	<i>P. A. Ferrari, P. Gonçalves and J. B. Martin</i>	1048–1064
Quantitative recurrence in two-dimensional extended processes	<i>F. Pène and B. Saussol</i>	1065–1084
Milstein’s type schemes for fractional SDEs	<i>M. Gradinaru and I. Nourdin</i>	1085–1098
Jump processes, \mathcal{L}-harmonic functions, continuity estimates and the Feller property	<i>R. Hussein and M. Kassmann</i>	1099–1115
Fractional multiplicative processes	<i>J. Barral and B. Mandelbrot</i>	1116–1129
The falling apart of the tagged fragment and the asymptotic disintegration of the Brownian height fragmentation	<i>G. Uribe Bravo</i>	1130–1149
Intermittency properties in a hyperbolic Anderson problem	<i>R. C. Dalang and C. Mueller</i>	1150–1164
Interlaced processes on the circle	<i>A. P. Metcalfe, N. O’Connell and J. Warren</i>	1165–1184
