

ANNALES DE L'INSTITUT HENRI POINCARÉ

PROBABILITÉS ET STATISTIQUES

Asymptotic sampling formulae for Λ-coalescents	
<i>J. Berestycki, N. Berestycki and V. Limic</i>	715–731
Genealogy of flows of continuous-state branching processes via flows of partitions and the Eve property	
<i>C. Labbé</i>	732–769
Small positive values for supercritical branching processes in random environment	
<i>V. Bansaye and C. Böinghoff</i>	770–805
Deviation inequalities and moderate deviations for estimators of parameters in bifurcating autoregressive models	
<i>S. V. Bitseki Penda and H. Djellout</i>	806–844
Process-level large deviations for nonlinear Hawkes point processes	
<i>L. Zhu</i>	845–871
A quenched weak invariance principle	
<i>J. Dedecker, F. Merlevède and M. Peligrad</i>	872–898
Convergence to the Brownian Web for a generalization of the drainage network model	
<i>C. Coletti and G. Valle</i>	899–919
Gradient flows of the entropy for jump processes	
<i>M. Erbar</i>	920–945
Conditional distributions, exchangeable particle systems, and stochastic partial differential equations	
<i>D. Crisan, T. G. Kurtz and Y. Lee</i>	946–974
Odd cutsets and the hard-core model on \mathbb{Z}^d	
<i>R. Peled and W. Samotij</i>	975–998
Cycle structure of percolation on high-dimensional tori	
<i>R. van der Hofstad and A. Sapozhnikov</i>	999–1027
Estimation of the transition density of a Markov chain	
<i>M. Sart</i>	1028–1068
Evaluating default priors with a generalization of Eaton's Markov chain	
<i>B. P. Shea and G. L. Jones</i>	1069–1091
Estimator selection in the Gaussian setting	
<i>Y. Baraud, C. Giraud and S. Huet</i>	1092–1119
