

THE ANNALS of APPLIED PROBABILITY

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles

Large deviations of a modified Jackson network: Stability and rough asymptotics ROBERT D. FOLEY AND DAVID R. McDONALD	519
Bridges and networks: Exact asymptotics ROBERT D. FOLEY AND DAVID R. McDONALD	542
Moderate deviations for particle filtering R. DOUC, A. GUILLIN AND J. NAJIM	587
Upper bounds for spatial point process approximations. DOMINIC SCHUHMACHER	615
How likely is an i.i.d. degree sequence to be graphical? RICHARD ARRATIA AND THOMAS M. LIGGETT	652
The stepping stone model. II: Genealogies and the infinite sites model ILJANA ZÁHLE, J. THEODORE COX AND RICHARD DURRETT	671
Renewal theory and computable convergence rates for geometrically ergodic Markov chains PETER H. BAXENDALE	700
Coexistence for Richardson type competing spatial growth models. CHRISTOPHER HOFFMAN	739
Utility maximization with a stochastic clock and an unbounded random endowment GORDAN ŽITKOVIĆ	748
Reconstructing a two-color scenery by observing it along a simple random walk path HEINRICH MATZINGER	778
A diffusion model of scheduling control in queueing systems with many servers RAMI ATAR	820
Exact and approximate results for deposition and annihilation processes on graphs MATHEW D. PENROSE AND AIDAN SUDBURY	853
Near-integrated GARCH sequences ISTVÁN BERKES, LAJOS HORVÁTH AND PIOTR KOKOSZKA	890
Asymptotics in randomized urn models ZHI-DONG BAI AND FEIFANG HU	914
A Berry–Esseen theorem for Feynman–Kac and interacting particle models PIERRE DEL MORAL AND SAMY TINDEL	941
Periodic copolymers at selective interfaces: A large deviations approach ERWIN BOLTHAUSEN AND GIAMBATTISTA GIACOMIN	963
Mass extinctions: An alternative to the Allee effect RINALDO B. SCHINAZI	984
Tail of a linear diffusion with Markov switching BENOÎTE DE SAPORTA AND JIAN-FENG YAO	992
The long-run behavior of the stochastic replicator dynamics LORENS A. IMHOF	1019
