

The Annals of Statistics

Vol. 21

September 1993

No. 3

Articles

- Fiducial prediction and semi-Bayesian inference . . . A. PHILIP DAWID AND WANG JINGLONG
Dilation for sets of probabilities TEDDY SEIDENFELD AND LARRY WASSERMAN
Detecting a change of a normal mean by dynamic sampling
with a probability bound on a false alarm
DAVID ASSAF, MOSHE POLLAK, YA'ACOV RITOV AND BENJAMIN YAKIR
Smoothed empirical likelihood confidence intervals for quantiles
SONG XI CHEN AND PETER HALL
Empirical likelihood in biased sample problems JING QIN
Preferred point geometry and statistical manifolds
FRANK CRITCHLEY, PAUL MARRIOTT AND MARK SALMON
The Riemannian structure of Euclidean shape spaces: A novel environment
for statistics HUILING LE AND DAVID G. KENDALL
Hyper Markov laws in the statistical analysis of decomposable
graphical models A. P. DAWID AND S. L. LAURITZEN
Lattice models for conditional independence in a multivariate
normal distribution STEEN ARNE ANDERSSON AND MICHAEL D. PERLMAN
Conditional association, essential independence and monotone
unidimensional item response models BRIAN W. JUNKER
One-sided test for the equality of two covariance matrices SATOSHI KURIKI
Asymptotics for the minimum covariance determinant estimator
R. W. BUTLER, P. L. DAVIES AND M. JHUN
Generalized permutation polytopes and exploratory graphical methods
for ranked data G. L. THOMPSON
Nonparametric estimation in renewal theory I:
The empirical renewal function RUDOLF GRÜBEL AND SUSAN M. PITTS
Estimators of the finite population distribution function using
nonparametric regression ALAN H. DORFMAN AND PETER HALL
An improvement of the jackknife distribution function estimator
JAMES G. BOOTH AND PETER HALL
On efficient estimation in regression models ANTON SCHICK
Spline smoothing with an estimated order parameter MICHAEL L. STEIN
Kernel-type estimators of jump points and values
of a regression function J. S. WU AND C. K. CHU
Maximum likelihood estimation of parameters under a spatial
sampling scheme ZHILIANG YING
The strong law under random censorship W. STUTE AND J.-L. WANG
Large deviations for censored data I. H. DINWOODIE
Chi-square goodness-of-fit tests for randomly censored data JOO HAN KIM
On a characterization of the exponential distribution based on a type 2
right censored sample. JULIAN LESLIE AND CONSTANCE VAN EEDEN
Semiparametric estimation of association in a bivariate survival function
GANGAJI MAGULURI

The Annals of Probability

Vol. 21

October 1993

No. 4

Articles

- A shape theorem for epidemics and forest fires
with finite range interactions YU ZHANG
- Conservation of local equilibrium for attractive particle systems on Z^d C. LANDIM
- Triangle condition for oriented percolation in high dimensions
BAO GIA NGUYEN AND WEI-SHIH YANG
- Large deviations and maximum entropy principle for interacting random fields
on Z^d HANS-OTTO GEORGI
- Critical large deviations for Gaussian fields in the phase
transition regime, I ERWIN BOLTHAUSEN AND JEAN-DOMINIQUE DEUSCHEL
- Equivalent mixing conditions for random fields RICHARD C. BRADLEY
- U -statistics of random-size samples and limit theorems for systems
of Markovian particles with non-Poisson initial distributions
RAISA EPSTEIN FELDMAN AND SVETLOZAR RACHEV
- Ergodicity of critical spatial branching processes in low dimensions
MAURY BRAMSON, J. T. COX AND ANDREAS GREVEN
- On the upper and lower classes for a stationary Gaussian
stochastic process J. M. P. ALBIN
- Strong limit theorems for large and small increments of l^p -valued
Gaussian processes MIKLÓS CSÖRGŐ AND QI-MAN SHAO
- On the law of the iterated logarithm for independent Banach space
valued random variables XIA CHEN
- Toward a general law of the iterated logarithm in Banach space UWE EINMAHL
- The distribution of vector-valued Rademacher series
S. J. DILWORTH AND S. J. MONTGOMERY-SMITH
- Exchangeably weighted bootstraps of the general empirical process
JENS PRÆSTGAARD AND JON A. WELLNER
- Finite range random walk on free groups and homogeneous trees STEVEN P. LALLEY
- Random rotations: Characters and random walks on $SO(N)$ JEFFREY S. ROSENTHAL
- Comparison techniques for random walk on finite groups
PERSI DIACONIS AND LAURENT SALOFF-COSTE
- A transient random walk on stochastic matrices
with Dirichlet distributions JEAN-FRANÇOIS CHAMAYOU AND GÉRARD LETAC
- On 1-dependent processes and k -block factors
ROBERT M. BURTON, MARK GOULET AND RONALD MEESTER
- Nonlinear transformations on the Wiener space OGNIAN ENCHEV
- Coupling and invariant measures for the heat equation with noise CARL MUELLER
- The moment problem for polynomial forms in normal random variables . . . ERIC V. SLUD
- Diffusion processes on graphs and averaging principle
MARK I. FREIDLIN AND ALEXANDER D. WENTZELL
- Invariant measures and evolution equations for Markov processes
characterized via Martingale problems
ABHAY G. BHATT AND RAJEEVA L. KARANDIKAR

Book Review

- Review of *Probability approximations via the Poisson Clumping Heuristic* by D. Aldous
and *Poisson Approximations* by A. D. Barbour, L. Holst and S. Janson
RICHARD ARRATIA AND SIMON TAVARÉ

CIS Extended Database, 1993 Edition

Sponsored jointly by IMS and ASA

A Computer-Readable Bibliography of the Literature of Statistics and Probability

Based on the *Current Index to Statistics*, With Earlier Information for Selected Journals

When used with appropriate retrieval software, the database offers students, faculty, and staff at your site...

- Fast and easy literature searches based on author, title, or key words and phrases.
- Access to over 140,000 articles published in probability and statistics during the past 18 years.
- Covers 1965-1974 IMS annals, *JASA*, *Technometrics*, *Biometrics*, *Biometrika*, *Applied Statistics*.
- Printed lists of references retrieved.
- Freedom from long distance, connection time, and item retrieval charges.

The 1992 Edition is currently in use by more than 200 libraries, statistics and mathematics departments, government agencies, corporations, and individual members of IMS and ASA.

Total file length for the 1993 Edition is approximately 20 MB, supplied either (a) on eighteen 3.5" High Density disks in MS-DOS format or (b) on a CD-ROM readable by DOS, Macintosh, or UNIX systems. For copies of license agreements or additional technical information, contact the IMS Business Office.

PRICES

GENERAL LICENSE: *First Year, \$700. Update from 1992 Edition, \$180.* This license permits you to make the database available at your site through an unlimited number of stations (computers or terminals). Remote access is **not** permitted.

UNIVERSITY LICENSE: NEW FOR 1993! *First year, \$700. Update from 1992 General License, \$180.* This license permits you to make the database available to authorized password holders (current faculty, staff, or students) for use on or off campus. [Available to university campuses only.]

FOUR STATION LICENSE: *First Year, \$350. Update from 1992 Edition, \$105.* This license permits no more than four specified stations at an academic department or corporate research group. [No national government orders.]

PERSONAL LICENSE: *First Year or Update, \$90.* This license permits the personal use by one individual IMS or ASA member (on up to three computers under the member's exclusive control). The license fee must be paid from personal funds and shipped to the member's home address.

Shipping Dates: Deliveries will begin in mid August. Sufficient copies will be manufactured for prompt shipment of orders received by July 15, 1993. Only 100 CD-ROMs will be manufactured. They will be available on a first-come, first served basis.

Direct Orders to:
IMS Business Office
3401 Investment Blvd., Suite 7
Hayward, CA 94545-3819
