Articles

- Asymptotic expansions and bootstrapping distributions for dependent variables:
A martingale approach PER ASLAK MYKLAND
On the bootstrap of U and V statistics MIGUEL A. ARCONES AND EVARIST GINÉ
Effect of bias estimation on coverage accuracy of bootstrap confidence intervals
for a probability density PETER HALL
On bootstrap confidence intervals in nonparametric regression PETER HALL
Exact mean integrated squared error J. S. MARRON AND M. P. WAND
Change-points in nonparametric regression analysis HANS-GEORG MÜLLER
On global properties of variable bandwidth density estimators PETER HALL
Statistical inference for conditional curves: Poisson process approach
M. FALK AND R.-D. REISS
- Using stopping rules to bound the mean integrated squared error
in density estimation ADAM T. MARTINSEK
- Minimax estimation of a constrained Poisson vector
IAIN M. JOHNSTONE AND K. BRENDA MACGIBBON
- Local admissibility and local unbiasedness in hypothesis testing problems
LAWRENCE D. BROWN AND JOHN I. MARDEN
- Nonparametric inference under biased sampling from a finite population
PETER J. BICKEL, VIJAYAN N. NAIR AND PAUL C. C. WANG
- Nonparametric methods for imperfect repair models
MYLES HOLLANDER, BRETT PRESNELL AND JAYARAM SETHURAMAN
- Multivariate location estimation using extension of R -estimates
through U -statistics type approach PROBAL CHAUDHURI
- Robust estimation of the connection parameter of the von Mises–Fisher
distribution DALJIN KO
- Semiparametric estimation of normal mixture densities KATHRYN ROEDER
- Renormalization exponents and optimal pointwise rates of convergence
DAVID L. DONOHO AND MARK G. LOW
- Asymptotics for linear processes PETER C. B. PHILLIPS AND VICTOR SOLO
- Asymptotic normality of the ‘synthetic data’ regression estimator
for censored survival data MAI ZHOU
- Large sample study of empirical distributions in a random-multiplicative
censoring model Y. VARDI AND CUN-HUI ZHANG
- An asymptotic theory for sliced inverse regression
TAILEN HSING AND RAYMOND J. CARROLL
- Generalized quantile processes JOHN H. J. EINMAHL AND DAVID M. MASON
- Affinely invariant matching methods with ellipsoidal distributions
DONALD B. RUBIN AND NEAL THOMAS
- From species problem to a general coverage problem
via a new interpretation SHAW-HWA LO
- Controlling conditional coverage probability in prediction RUDOLF BERAN
- Special capacities, the Hunt–Stein theorem and transformation groups
ZBIGNIEW SZKUTNIK

Short Communications

- Efficient estimates in semiparametric additive regression models
with unknown error distribution JACK CUZICK
- Vincenzization revisited CHRISTIAN GENEST
- On the unique representation of non-Gaussian linear processes QIANSHENG CHENG

Articles

- Rough large deviation estimates for simulated annealing.
Application to exponential schedules OLIVIER CATONI
- Large deviations for exchangeable random vectors . . . I. H. DINWOODIE AND S. L. ZABELL
- Binomial mixtures and finite exchangeability G. R. WOOD
- Random stationary processes KENNETH S. ALEXANDER AND STEVEN A. KALIKOW
- String matching: The ergodic case PAUL C. SHIELDS
- A note on the convergence of sums of independent random variables . ADOLF HILDEBRAND
- One-sided refinements of the strong law of large numbers
and the Glivenko–Cantelli theorem DAVID GILAT AND T. P. HILL
- A difference prophet inequality for bounded i.i.d. variables, with cost
for observations ESTER SAMUEL-CAHN
- On generalized renewal measures and certain first passage times . . . GEROLD ALSMEYER
- Decoupling and Khintchine’s inequalities for U -statistics VICTOR H. DE LA PEÑA
- Functional laws of the iterated logarithm for the increments
of empirical and quantile processes PAUL DEHEUVELS AND DAVID M. MASON
- Some large-deviation theorems for branching diffusions TZONG-YOW LEE
- Limit theorems for the frontier of a one-dimensional branching diffusion
S. LALLEY AND T. SELLEK
- Renormalization and limit theorems for self-intersections of superprocesses . . JAY ROSEN
- Asymptotic series and exit time probabilities W. H. FLEMING AND M. R. JAMES
- Conditional exits for small noise diffusions with characteristic boundary . MARTIN V. DAY
- Quasi-invariance of product measures under Lie group perturbations:
Fisher information and L^2 -differentiability
MAURO S. DE F. MARQUES AND LUIZ SAN MARTIN
- When does the Ramer formula look like the Girsanov formula?
M. ZAKAI AND O. ZEITOUNI
- Sur la régularité des fonctions aléatoires d’Ornstein–Uhlenbeck à valeurs
dans l_p , $p \in [1, \infty[$ X. FERNIQUE
- Semi-min-stable processes MATHEW D. PENROSE
- An extension of Pitman’s theorem for spectrally positive Lévy processes . . JEAN BERTOIN
- On the distribution of the Hilbert transform of the local time
of a symmetric Lévy process P. J. FITZSIMMONS AND R. K. GETTOOR
- A note on planar Brownian motion STELLA BRASSESCO
- The Stein–Chen method, point processes and compensators
A. D. BARBOUR AND TIMOTHY C. BROWN
- Clustering in the one-dimensional three-color cyclic cellular automaton . . ROBERT FISCH
- Automorphism invariant measures on trees ROBIN PEMANTLE
- The cycle structure of random permutations RICHARD ARRATIA AND SIMON TAVARÉ
- Isoperimetric inequalities and transient random walks on graphs . . CARSTEN THOMASSEN

Correction

- Path properties of index- β stable fields JOHN B. NOLAN

IMS Lecture Notes—Monograph Series

18 SELECTED PROCEEDINGS OF THE SHEFFIELD SYMPOSIUM ON APPLIED PROBABILITY

edited by I. V. Basawa & R. L. Taylor

Proceedings of the Symposium on Applied Probability, Sheffield, August 1989.

The purpose of this Symposium was to focus attention on some of the prominent directions in applied probability. This volume contains several major papers covering models in epidemiology, genetics, random fields, branching processes, random walks, directed polymers and evolution time-scales. A broad array of interesting problems are discussed in the eighteen technical articles included in this volume.

19 STOCHASTIC ORDERS AND DECISION UNDER RISK

edited by K. Mosler & M. Scarsini

A selection of papers presented at the International Workshop on Stochastic Orders and Decision Under Risk, Hamburg, May 1989.

The aim of this workshop was to contribute to the theory and applications of stochastic orders and to gather scientists from probability theory, statistics, reliability, queueing, economics, finance, insurance, and mathematical physics who are using similar mathematical tools. The twenty-three papers in this volume represent a selection of those presented in Hamburg.

20 SPATIAL STATISTICS AND IMAGING

edited by A. Possolo

Proceedings of the Joint IMS-AMS-SIAM Summer Research Conference on Spatial Statistics and Imaging, Brunswick, Maine, June 1988.

The conference assembled an international and interdisciplinary panel of mathematicians, statisticians, astronomers, physicists, electrical engineers, geophysicists, and medical doctors. The twenty-eight papers in this volume report on advancements in the theory and practice of spatial statistics and the technology of digital image restoration and reconstruction.
