

THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938

EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE
OF MATHEMATICAL STATISTICS

Contents

	PAGE
William Feller, 1906-1970	iv
The publications of William Feller	ix
Extrapolation and interpolation of stationary Gaussian processes H. DYM AND H. P. MCKEAN	1817
Estimating the empiric distribution function of a parameter sequence RICHARD J. FOX	1845
Behavior of moments of row sums of elementary systems B. M. BROWN AND G. K. EAGLESON	1853
Block designs for mixture experiments	A. K. NIGAM 1861
Some properties of a normal process near a local maximum	GEORG LINDGREN 1870
A complete class theorem for multidimensional one-sided alternatives MORRIS L. EATON	1884
A non-linear characterization of the normal distribution ALBERT KINGMAN AND FRANKLIN A. GRAYBILL	1889
Linear rank statistics under alternatives indexed by a vector parameter ..	R. J. BERAN 1896
Some remarks on the two-armed bandit	J. FABIUS AND W. R. VAN ZWET 1906
The optimum design of a two-factor experiment using prior information ..	R. J. OWEN 1917
A property of Poisson processes and its application to macroscopic equilibrium of particle systems	MARK BROWN 1935
On selection procedures based on ranks: counterexamples concerning least favorable configurations	M. HASEEB RIZVI AND GEORGE G. WOODWORTH 1942
On the coupon collector's waiting time	BENGT ROSÉN 1952
A characteristic property of the multivariate normal density function and some of its applications	G. P. PATIL AND M. T. BOSWELL 1970
Convergence of sums of random variables conditioned on a future change of sign THOMAS M. LIGGETT	1978
The folded cubic association scheme	PETER W. M. JOHN 1983
Exact confidence intervals in regression problems with independent symmetric errors J. A. HARTIGAN	1992
Estimation and testing hypotheses for one, two, or several samples from general multi- variate distributions	MASAO TANAKA 1999
Estimation of the last mean of a monotone sequence ARTHUR COHEN AND HAROLD B. SACKROWITZ	2021
F -square and orthogonal F -squares design: A generalization of Latin square and or- thogonal Latin squares design	A. HEDAYAT AND E. SEIDEN 2035
Global cross sections and the densities of maximal invariants	UWE KOEHN 2045
Designs for regression problems with correlated errors, III JEROME SACKS AND DONALD YLVISAKER	2057

Vol. 41, No. 6—December 1970

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are \$30 per volume (six issues of one calendar year). Members of the Institute of Mathematical Statistics pay different rates; see inside back cover. Single issues are \$5.75. Back numbers for all issues up to and including 1956 (Volume 27) are \$16.50 per volume, \$4.50 per issue; issues from 1957 through 1964 are \$22.00 per volume, \$5.75 per issue; from 1965 onward, \$33.00 per volume, \$5.75 per issue. Complete sets (Volumes 1 through 27) are \$275.00. If additional volumes are ordered at the same time complete sets are ordered, the price is \$16.50 per volume for Volumes 28 through 35, and \$22.00 per volume for Volumes 36 through 40. Complete sets (Volumes 1 through 40) are \$500.00.

Communications concerning **subscriptions, back numbers, payment of dues, membership, changes of address, etc.**, should be addressed to Professor George J. Resnikoff, Treasurer, Department of Statistics, California State College, Hayward, California 94542.

Papers to be submitted for publication should be sent to the Editor, Ingram Olkin, Department of Statistics, Stanford University, Stanford, California 94305. **Abstracts** and **corrected galley proofs** should be sent to the Managing Editor, K. J. C. Smith, Department of Statistics, University of North Carolina, Chapel Hill, North Carolina 27514.

Instructions for Authors. Each manuscript is required to contain an abstract and to have a title descriptive of its contents.

The abstract will be printed immediately after the title, clearly separated from the rest of the paper. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of an abstract will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. It should be typed on a separate page, under the heading "Abstract" followed by the title of the paper. Formulas should be used as sparingly as possible. The abstract should not refer to the theorems or formulas in the body of the paper—it ought to be intelligible by itself. Occasionally the abstract will make an introduction unnecessary but more often an introductory section in the paper will still be needed.

The title should be descriptive but concise, i.e. it should indicate the topic of the paper as clearly as possible but every word in it ought to be pertinent.

In the near future the *Annals* will introduce a requirement for authors to list key words and phrases and classifying numbers, as now used in publications of the American Mathematical Society. Authors may want to anticipate this requirement by including such data now.

Manuscripts should be typewritten, entirely double-spaced including references, with wide margins at sides, top and bottom. The original should be submitted with two additional copies on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible should be replaced by remarks in the text or in the references; formulas in footnotes should be avoided. References should follow the style: [5] Wilks, S. S. (1963). Multivariate statistical outliers. *Sankhyā Ser. A* 25 407–426.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink, twice the size they are to be printed.

(Continued on inside back cover)

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

COMPOSED AND PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND 21202 U.S.A.

Second-class postage paid at Baltimore, Maryland 21202 and at additional mailing offices.

April, June, August, October and December.

EDITORIAL POLICY

The main aim of the *Annals of Mathematical Statistics* is to publish original contributions to theoretical statistics and to probability theory. The emphasis is on quality, not just on formal novelty and correctness of the contents of a paper. Expository papers are also welcome, especially if they provide authoritative surveys of areas that have been in vigorous development.

MEETINGS OF THE INSTITUTE

NOTE: This calendar lists all of the meetings which have been approved by the IMS Council to date. Meeting dates which fall rather far in the future are subject to change.

Meet- ing No.	Place	Date	Abstract Deadline*	Joint With
128	Las Vegas, Nevada (Western Regional)	March 22-24	January 21, 1971	
129	University Park, Penn. (Eastern Regional)	April 21-23, 1971	February 18, 1971	ASA, ENAR
130	Columbia, Missouri (Central Regional)	May 5-7, 1971	March 4, 1971	ASA
131	Fort Collins, Colorado (Annual)	August 23-26, 1971	June 24, 1971	ASA
	Blacksburg, Virginia (Eastern Regional)	Spring 1972		ASA
	Ames, Iowa (Central Regional)	Spring 1972		ASA, ENAR
	Seattle, Washington (Western Regional)	Spring 1972		
	Ithaca, New York (Eastern Regional)	Spring 1973		ASA, ENAR
	Albuquerque, New Mexico (Western Regional)	Spring 1973		

* Abstracts should be submitted in duplicate to the Managing Editor, K. J. C. Smith, Department of Statistics, University of North Carolina, Chapel Hill, North Carolina 27514, on abstract blanks which may be obtained from him. Abstracts of papers to be presented *in person* at the meetings must be received on or before the corresponding deadline. Only one contributed paper may be given in person at any one meeting. Abstracts contributed by title may be submitted at any time and will be printed in the next issue to go to press. Abstracts should not exceed 200 words and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if introduced by members. Abstracts must follow the stylistic requests on the abstract blank or they may be returned.
