

ACKNOWLEDGMENT OF REFEREES' SERVICES

The following have served as referees of papers for which final editorial decisions were made during the year ending August 31, 1969. Thanks are due to each of them for the generous and unselfish assistance they have given to the *Annals*.

SUMMER COURSE OFFERINGS IN STATISTICS AT IOWA STATE UNIVERSITY

The Department of Statistics at Iowa State University will offer courses in statistical theory and methods during the 1970 summer sessions. These courses are planned primarily for graduate students or research workers with limited mathematical backgrounds who wish to use statistical techniques intelligently for application to other fields. In addition, a course on special topics in theoretical or applied statistics may be studied at the graduate level.

THE MATHEMATICS, STATISTICS AND COMPUTER SCIENCE SECTION of the NATIONAL REGISTER OF SCIENTIFIC AND TECHNICAL PERSONNEL

Cooperating Societies:

American Mathematical Society
American Statistical Association
Association for Computing Machinery
Association for Symbolic Logic
Biometric Society
Econometric Society
Industrial Mathematics Society

The Institute of Management Sciences
The Institute of Mathematical Statistics
Mathematical Association of America
Operations Research Society of America
Society for Industrial and Applied
Mathematics
Society of Actuaries

The American Mathematical Society, at the request of the National Science Foundation, mailed the 1970 reporting forms to the Mathematical, Statistical and Computer Science Section of the National Register. The main objective of the National Register is to provide up-to-date information on the scientific manpower resources of the United States. It is also increasingly valuable to our profession as a source of statistical information.

When you receive a National Register Questionnaire, please fill it out and return it promptly to the Headquarters Officers of the Society at P. O. Box 6248, Providence, Rhode Island 02904.

Jack C. Kiefer
President, IMS

STATISTICAL THEORY AND METHOD ABSTRACTS

A Journal of the International Statistical Institute

The object of this abstracting service is to cover published papers concerned with statistical theory, including relevant aspects of probability and mathematical methods, and new contributions to statistical method. These abstracts provide valuable information on new developments for studying problems in many fields: such as frequency distributions, estimating and testing problems, sampling and experimental designs, variance analysis, spectral theory and other methods in time-series analysis, queueing theory, reliability and acceptance inspection. Journals appearing in all parts of the world, on mathematics and statistics, or on other fields and possible contribution of interest are regularly scanned for suitable papers. Abstracts are also prepared from collections of papers such as reports of conferences, symposia and seminars; technical reports of experiment and research stations are covered.

The abstracts do not exceed 400 words, with occasional "double abstracts" for papers where this size is not sufficient to represent the paper. The language is English; the language of the original paper is indicated. The headings give the name and address of the author together with the Journal in which the paper is published; moreover, a note is added on the number of references, tables and figures.

The classification scheme which is used in this Journal supplies a division of all abstracts in twelve main sections. The pages of the Journal are colour-tinted in accordance with these main sections. Each section is further sub-divided to indicate the main topic of the paper; a secondary number denotes the most important additional topic referred to by the author. A special index in each part links together these two classifications. This scheme is arranged to facilitate transfer to punch cards. Papers containing new statistical tables are listed in a separate index.

The abstracts are numbered serially, the volume number being inserted as a prefix. The Journal is published four times a year and contains approximately 1,000 abstracts. An author index, the secondary classification index and the new statistical tables index are published in each issue and combined in a yearly supplement which also contains a list of all Journals represented in the volume by one or more abstracts.

<i>Annual Subscription</i>	£7. 10s. (U.S.A. \$24.00)
<i>Single Number</i>	£2. 5s. (U.S.A. \$ 7.00)
<i>Loose Leaf Binders for Single Abstract Sheets</i>	16s. 3d. including postage and packing.

OLIVER AND BOYD LTD.

Tweeddale Court, 14 High Street, Edinburgh, 1

REVIEW OF THE INTERNATIONAL STATISTICAL INSTITUTE

Contents of Vol. 38, No. 1

Articles (with discussions)

Part I STATISTICS IN GEOLOGY

- Mathéron, G.—Structures aléatoires et géologie mathématique
discussant: W. C. Krumbein
- Cole, A. J.—A trend-surface technique
- Read, W. A.—A geological application of iterative-fit trend-surface analysis (abstract)
- Robinson, J. E.—Spatial filtering of geological data
discussants of last three papers: M. Matschinski, D. G. Kendall, F. Chayes, D. M. Hawkins, W. A. Read, E. L. Scott, E. H. T. Whitten, E. L. Scott, G. Lea.
- Gower, J. C.—Classification and geology
discussants: R. J. Howarth, M. Matschinski, J. C. Gower

Part II STATISTICS IN HYDROLOGY

- Jensen, A.—A characteristic application of statistics in hydrology
discussants: H. C. Hamaker, H. Cramer, Eeva Stene, A. Jensen
- Bernier, J.—Inventaire des modèles de processus stochastiques applicables à la description des débits des rivières à l'échelle journalière
- Alexander, G. N.—Heavy rainfall as a stochastic process
- Borgman, L. E., and Amorocho, J.—Statistical problems of hydrology
discussants of last three papers: G. Morlat, P. E. O'Connell, T. O'Donnell, R. Sneyers, P. J. Delaporte, R. D. Elston, L. E. Borgman

Part III STATISTICS IN METEOROLOGY

- Moran, P. A. P.—The methodology of rain-making experiments
discussants: M. Schuepp, Lyle D. Calvin, W. A. O'N. Waugh, A. C. Atkinson, A. M. Walker, P. A. P. Moran
- Sukhatme, P. V.—Need of an assured and controlled supply of water for improving agricultural production
discussants: Colin Clark, J. M. Hammersley, P. V. Sukhatme
- Cocheme, J.—Problems of users of weather modification by cloud seeding
discussants: G. N. Alexander, B. C. V. Oddie, J. Neyman, J. Cocheme
- Mason, B. J.—The scientific problems of cloud seeding
discussants: J. Cocheme, L. D. Calvin
- Lovasich, J. L., Neyman, J., Scott, E. L., and Smith, J. A.—Statistical aspects of rain stimulation—problems and prospects
discussants: M. E. Kauffman, L. D. Calvin, J. Neyman, F. Mosteller, B. C. V. Oddie, R. Bartoszynski, J. Neyman, E. L. Scott

Calendar of meetings

Book Reviews

The REVIEW OF THE ISI is published three times per year. The annual subscription is \$11.50 post free.

Orders should be sent to: *International Statistical Institute, 2, Oostduinlaan, The Hague, Netherlands.*

TECHNOMETRICS

Vol. 12, No. 1, 1970

The Indian Journal of Statistics

CONTENTS OF SERIES A, VOL. 31, PART 3, 1969

Transition to the limiting process for deriving asymptotically optimal tests	D. M. Chibisov
A characterization of the normal law on Hilbert space	Morris L. Eaton and P. K. Pathak
Characterization of some univariate distributions	C. G. Khatri
On the renewal density matrix of a semi-Markov process	Jeffrey J. Hunter
Only linear transformations preserve normality	J. K. Ghosh
The asymptotic distribution of quantiles from mixed samples	Lionel Weiss
Bias and mean square of an estimation procedure after two preliminary tests of significance in ANOVA model-I	V. P. Gupta and S. R. Srivastava
Some results on the comparison of sampling with and without replacement	M. K. Ramakrishnan
On the concepts of best admissible estimators in sampling theory	M. N. Murthy and M. P. Singh
Some cyclic solutions of balanced incomplete block designs	Vasanti N. Bhat
A note on some inadmissible estimators	S. W. Dharmadhikari
On a theorem of Rao on g -inverses of matrices	P. Bhimasankaram and Sujit Kumar Mitra
A characterization of the line graph of a BIBD with $\lambda = 1$	S. B. Rao and A. Ramachandira Rao
Book Reviews	
Abstracts of technical reports	

Orders for the Journal for distribution outside India are to be sent to:

Pergamon Press Ltd.,	Pergamon Press Inc.,
Headington Hill Hall, or	122 East 55th Street,
Oxford, England	New York 22, USA

Orders for the Journal for distribution within India are to be sent to:

Statistical Publishing Society,
204/1 Barrackpore Trunk Road,
Calcutta-35, India

BIOMETRICS

Journal of the Biometric Society

Vol 26, No. 1

CONTENTS

March 1970

A deterministic matrix model for handling the birth, death and migration processes of spatially distributed populations	M. B. Usher and M. H. Williamson
The effects of trap response on tag recapture estimates	G. A. F. Seber
Discrimination between regression models to determine the pattern of enzyme synthesis in synchronous cell cultures	D. A. Williams
A generalized probability distribution for couple fertility	S. N. Singh and B. N. Bhattacharya
Effects of selection and drift on the dynamics of finite populations. I. Ultimate probability of fixation of a favorable allele	R. N. Carr and R. F. Nassar
Approximating the selection process	D. A. Harville
Restriction of selection indexes	E. P. Cunningham, R. A. Moen and T. Gjedrem
Estimation of relative risk from individually matched series	O. S. Miettinen
Estimating the distribution of spherical and elliptical bodies in conglomerates from plane sections	G. M. Tallis
The use of non-parametric methods in the statistical analysis of a complex split plot experiment	G. G. Koch
A locally most powerful test for the symmetric folded binomial distribution	J. J. Gart
Queries answered by C. W. Dunnett and D. B. Duncan	
Notes by B. W. Brown, M. Sankaran, J. L. Gill, I. I. Berenblut, and P. W. M. John	

Biometrics is published quarterly. Its objects are to describe and exemplify the use of mathematical and statistical methods in biological and related sciences in a form assimilable by experimenters. The annual non-member subscription rate is \$15.00. Inquiries, non-member subscriptions, and orders for back issues, should be addressed to: Biometrics Business Office, Department of Experimental Statistics, North Carolina State University, Raleigh, North Carolina 27607 U.S.A. Editorial correspondence should be directed to: Biometrics Editorial Office, Department of Biostatistics, School of Public Health, University of North Carolina, Chapel Hill, North Carolina 27514 U.S.A.

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

OFFICERS

President:

Jack C. Kiefer, Department of Mathematics, Cornell University, Ithaca, New York 14850

President-Elect:

William Kruskal, Department of Statistics, University of Chicago, Chicago, Illinois 60637

Executive Secretary:

Leo Katz, Statistical Laboratory, Michigan State University, East Lansing, Michigan 48823

Program Secretary:

R. V. Hogg, Department of Statistics, University of Iowa, Iowa City, Iowa 52240

Treasurer:

George J. Resnikoff, Department of Statistics, California State College, Hayward, California 94542

Editor:

Z. W. Birnbaum, Department of Mathematics, University of Washington, Seattle, Washington 98105

Managing Editor:

K. J. C. Smith, Department of Statistics, University of North Carolina, Chapel Hill, North Carolina 27514

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS of MATHEMATICAL STATISTICS are \$20.00 per year for residents of the United States or Canada and \$12.00 per year for residents of other countries. Special student rates of \$10.00 per year are available to students residing in the U.S. and Canada. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

Membership in the Institute of Mathematical Statistics is not required of authors of papers in the *Annals of Mathematical Statistics* and the fact of membership or non-membership is given no weight in the consideration of submitted manuscripts.

Contents (Continued)

Characterization of optimal saturated main effect plans of the 2 ⁿ factorial B. L. RAKTOE AND W. T. FEDERER	203
Some regular and non-regular functions of finite Markov chains S. W. DHARMADHIKARI AND M. G. NADKARNI	207
The weighted likelihood ratio, sharp hypotheses about chances, the order of a Markov chain.....	JAMES M. DICKEY AND B. P. LIENTZ 214
A class of multisample distribution-free tests.....	JAYANT V. DESHPANDÉ 227
The accuracy of infinitely divisible approximations to sums of independent variables with application to stable laws...VIROOL BOONYASOMBUT AND JESSE M. SHAPIRO	237
Large deviations and Bahadur efficiency of linear rank statistics GEORGE G. WOODWORTH	251
On the construction of almost uniformly convergent random variables with given weakly convergent image laws.....	MICHAEL J. WICHURA 284
Use of maximum likelihood for estimating error variance from a collection of analysis of variance mean squares.....	R. GNANADESIKAN AND M. B. WILK 292
Notes	
A bound for the distribution of the maximum of continuous Gaussian processes MICHAEL MARCUS	305
On the monotonicity of the OC of an SPRT.....	DAVID G. HOEL 310
Monotonicity properties of the multinomial distribution KHURSHED ALAM	315
Monotonicity property of the distribution of the Studentized smallest chi-square KHURSHED ALAM	318
On a characterization of the Wiener process by constant regression B. L. S. PRAKASA RAO	321
Correction Notes	
Correction to "Optimum classification rules for classification into two multivariate normal populations".....	S. DAS GUPTA 326
Correction to "Cylindrically rotatable designs of types 1, 2 and 3" AGNES M. HERZBERG	326
Abstracts.....	328
News and Notices.....	333
Publications Received.....	335

NOTE. The calendar of meetings of the Institute and information concerning submission of abstracts are given immediately before the first article.
