

THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938
EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE
OF MATHEMATICAL STATISTICS

Contents

	PAGE
Generalized means and associated families of distributions H. K. BRØNS, H. D. BRUNK, W. E. FRANCK AND D. L. HANSON	339
On the admissibility of a randomized symmetrical design for the problem of a one way classification.....R. H. FARRELL	356
Discrete dynamic programming with a small interest rate BRUCE L. MILLER AND ARTHUR F. VEINOTT, JR.	366
Distribution of likelihood ratio in testing against trend M. T. BOSWELL AND H. D. BRUNK	371
Distinguishability of probability measures..LLOYD FISHER AND JOHN W. VAN NESS	381
Biorthogonal and dual configurations and the reciprocal normal distribution ROBERT H. BERK	393
Sample path variations of homogeneous processes.....MICHAEL SHARPE	399
Variances of variance-component estimators for the unbalanced 2-way cross classification with application to balanced incomplete block designs DAVID A. HARVILLE	408
On an A.P.O. rule in sequential estimation with quadratic loss PETER J. BICKEL AND JOSEPH A. YAHAV	417
Martingale extensions of a theorem of Marcinkiewicz and Zygmund....Y. S. CHOW	427
On finite products of Poisson-type characteristic functions of several variables ROGER CUPPENS	434
Sequential nonparametric two-way classification with prescribed maximum asymptotic error probability.....MELVIN N. WOINSKY AND LUDWIK KURZ	445
On the expected value of a stopped stochastic sequence WILLIAM F. STOUT AND Y. S. CHOW	456
On the least squares estimation of non-linear relations.....C. VILLEGAS	462
Approximation to Bayes risk in sequences of non-finite games...DENNIS GILLILAND	467
On convergence rates in the central limit theorem.....ELLEN S. HERTZ	475
On some results of N. V. Smirnov concerning limit distributions for variational series D. MEJZLER AND I. WEISSMAN	480
An approximation to the sample size in selection problems...EDWARD J. DUDEWICZ	492
Combining elements from distinct finite fields in mixed factorials....B. L. RAKTOE	498
A comparison test for martingale inequalities.....BURGESS DAVIS	505
Sequential interval estimation for the means of normal populations EDWARD PAULSON	509
An application for the Sobolev imbedding theorems to criteria for the continuity of processes with a vector parameter.....HAROLD J. KUSHNER	517
On moments of the maximum of normed partial sums.....DAVID SIEGMUND	527
Quasi-stationary behaviour of a left-continuous random walk.....D. J. DALEY	532

Continued on back cover

Vol. 40, No. 2 —April 1969

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are \$30 per volume (six issues of one calendar year) in the U.S. and Canada, \$22.50 per volume elsewhere. Single issues are \$5.75. Back numbers for all issues up to and including 1956 (Volume 27) are \$16.50 per volume, \$4.50 per issue; issues from 1957 through 1964 are \$22.00 per volume, \$5.75 per issue; from 1965 onward, \$33.00 per volume, \$5.75 per issue. Complete sets (Volumes 1 to 27) are \$275.00. If additional volumes are ordered at the same time complete sets are ordered, the price is \$16.50 per volume for Volume 28 to Volume 35 and \$22.00 per volume for Volume 36 onward.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning subscriptions, back numbers, payment of dues, membership, changes of address, etc., should be addressed to Professor George J. Resnikoff Treasurer, Department of Statistics, California State College, Hayward, California 94542.

Papers to be submitted for publication should be sent to the Editor, Z. W. Birnbaum, Department of Mathematics, University of Washington, Seattle, Washington 98105. Abstracts and corrected galley proofs should be sent to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington 99163.

Preparation of manuscripts. Each manuscript should be typewritten, double spaced with wide margins at sides, top, and bottom, and the original should be submitted with two additional copies, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow the style of 33 313-314.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ('), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\log \bar{x}$) and underlined letters (e.g., \underline{x}) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol \exp . In writing square roots the fractional exponent is preferable to the radical sign. Fractions are preferably written with the

solidus; thus $(a + b)/(c + d)$ rather than $\frac{a + b}{c + d}$, and ab/cd rather than $\frac{ad}{cd}$.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should not be addressed to Waverly Press.

COMPOSED AND PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND 21202 U.S.A.

Second-class postage paid at Baltimore, Maryland 21202 and at additional mailing offices.

Published bimonthly by the Institute of Mathematical Statistics in February, April, June, August, October and December.

Change of Managing Editor. Beginning with the August issue, the new Managing Editor will be Professor Kempton C. Smith, Department of Statistics, University of North Carolina, Chapel Hill, North Carolina 27514. Hence hereafter *all abstracts* should be sent to Professor Smith. Correspondence about manuscripts which will appear in the June issue should be sent to Professor Paul Meyer, the current Managing Editor.
