

THE ANNALS *of* MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938

EDITED BY S. S. WILKS, 1939-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE
OF MATHEMATICAL STATISTICS

Contents

| | PAGE |
|--|---------------------------------------|
| Minimax Designs in Two Dimensional Regression | PAUL G. HOEL 1097 |
| Distinguishing a Sequence of Random Variables from a Translate of Itself L. A. SHEPP | 1107 |
| Some Smirnov Type Theorems of Probability | MIKLÓS CSÖRGŐ 1113 |
| Estimation of the Bispectrum | M. ROSENBLATT AND J. S. VAN NESS 1120 |
| The Asymptotically Unbiased Prior Distribution | J. A. HARTIGAN 1137 |
| An Asymptotic Expansion for the Distribution of the Latent Roots of the Estimated Covariance Matrix | GEORGE A. ANDERSON 1153 |
| Optimum Classification Rules for Classification into Two Multivariate Normal Populations | S. DAS GUPTA 1174 |
| A Hybrid Problem on the Exponential Family | ARTHUR COHEN 1185 |
| Optimal Invariant Rank Tests for the k -Sample Problem T. K. MATTHES AND D. R. TRUAX | 1207 |
| A k -Sample Model in Order Statistics | W. J. CONOVER 1223 |
| The Two-Sample Scale Problem when Locations are Unknown M. RAGHAVACHARI | 1236 |
| Asymptotically Most Powerful Rank Tests for the Two-Sample Problem with Censored Data | JOSEPH L. GASTWIRTH 1243 |
| Student's t in a Two-Way Classification with Unequal Variances KAY KNIGHT MAZUY AND W. S. CONNOR | 1248 |
| Construction of Confounding Plans for Mixed Factorial Designs DAVID WHITE AND ROBERT A. HULTQUIST | 1256 |
| On the Number of Successes in Independent Trials STEPHEN M. SAMUELS | 1272 |
| On the Iterative Method of Dynamic Programming on a Finite Space Discrete Time Markov Process | BARRY W. BROWN 1279 |
| On Stochastic Processes Derived from Markov Chains | ALEX HELLER 1286 |
| Notes | |
| Generalizations of the Maximal Ergodic Theorem | GLEN BAXTER 1292 |
| A Simple Probabilistic Proof of the Discrete Generalized Renewal Theorem | SIDNEY C. PORT 1294 |
| On Moment Generating Functions and Renewal Theory CHARLES STONE | 1298 |
| A Note on the Reciprocal of the Conditional Expectation of a Positive Random Variable | TIM ROBERTSON 1302 |

(Continued on back cover)

Vol. 36, No. 4—August 1965

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are \$20 per volume (six issues of one calendar year) in the U.S. and Canada, \$15 per volume elsewhere. Single issues are \$5.25. Back numbers for all issues up to and including 1956 (Vol. XXVII) are \$12 per volume, \$3.50 per issue; issues from 1957 on are \$20 per volume, \$5.25 per issue; for complete sets, \$200 for the first 25 volumes, \$10 per additional volume purchased at the same time as Volumes I through XXV.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning subscriptions, back numbers, payment of dues, membership, changes of address, etc., should be addressed to Professor George J. Resnikoff, Treasurer, Department of Statistics, California State College, Hayward, California 94542.

Papers to be submitted for publication should be sent to the Editor, D. L. Burkholder, Department of Mathematics, University of Illinois, Urbana, Illinois 61803. Abstracts and corrected galley proofs should be sent to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington 99163.

Preparation of manuscripts. Each manuscript should be typewritten, double spaced with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow the style of 33 313-314.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ('), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\log x$) and underlined letters (e.g., x) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions are preferably written with the

solidus; thus $(a + b)/(c + d)$ rather than $\frac{a + b}{c + d}$, and ab/cd rather than $\frac{ab}{cd}$.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should not be addressed to Waverly Press.

COMPOSED AND PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND, U. S. A.

Second-class postage paid at Baltimore, Maryland
