

an important book on experimental design . . .

INTRODUCTION TO SCIENTIFIC INFERENCE

by *Robert Hooke, Westinghouse Research Laboratories*

A monograph to acquaint scientists and engineers (and serious undergraduates) with some of the elements of scientific inference as statisticians see it, and to stimulate their interest in the study of statistics. Emphasizes ideas, with a low mathematical level, but provides clear and simple explanations of principles of quantitative description important in the work of scientists and engineers.

Reviewers comment:

"Hooke has observed keenly the weak spots in experimental practice and has set down in this concisely written book pertinent remarks on how to avoid the common pitfalls and how to strengthen scientific inferences from experimental design."

"A delight to read. This book presents the essence of statistical philosophy without burdening the reader with innumerable special techniques. It should be read by every engineer or scientist who has an experiment to perform, *before* he calls in the consulting statistician. It may also be profitably read by people who manage statisticians."

"This is an excellent treatment of many main statistical issues in experimentation. It is free of jargon. Very rewarding."

"Exactly right. I have needed this book for years."

Price: \$4.75

INTERNATIONAL JOURNAL OF ABSTRACTS STATISTICAL THEORY AND METHOD

A Journal of the International Statistical Institute

The aim of this journal of abstracts is to give **complete coverage of published papers in the field of statistical theory** (including associated aspects of probability and other mathematical methods) and **new published contributions to statistical method**.

All contributions in the following five journals—being wholly devoted to this field—are abstracted: *Annals of Mathematical Statistics*; *Biometrika*; *Journal, Royal Statistical Society (Series B)*; *Bulletin of Mathematical Statistics*; *Annals, Institute of Statistical Mathematics*; and a further group of six journals are abstracted on a **virtually complete** basis as follows: *Biometrics*; *Metrika*; *Metron*; *Review, International Statistical Institute*; *Technometrics*; *Sankhyā*. There are about 250 other journals partly devoted to statistical theory and method from which the appropriate papers are abstracted.

The abstracts are about **400 words long**—the recommendation of UNESCO for the 'long' abstract service: they are in the English language although the original language of the paper is noted on the abstract together with the name of the abstractor. In addition the address of the author(s) is given in detail to facilitate contact in order to obtain further detail or request an off-print. **The journal is published quarterly and contains approximately 750 abstracts per year.**

A scheme of classification has been developed for the abstracts that is flexible and facilitates the transfer of code numbers to punched cards. **A unique aspect of this journal** is that the pages are colour-tinted according to the main sections of classification. This method of colour-coding the pages provides a distinctive and powerful visual aid in the identification of abstracts in whatever manner the journal is filed for reference.

<i>Annual Subscription</i>	£5 (U.S.A. and Canada \$16.00)
<i>Single Number</i>	30s. (U.S.A. and Canada \$4.50)

SANKHYĀ

The Indian Journal of Statistics

Contents of Series A, Vol. 25, Part 1, 1963

Foreword.....	P. C. Mahalanobis
Large sample sequential tests for composite hypotheses.....	D. R. Cox
On asymptotic expansions for sums of independent random variables with a limiting stable distribution	Harald Cramér
A sequential procedure for the best population.....	Irwin Guttman
Long-chain polymers and self-avoiding random walks.....	J. M. Hammersley
A simple stochastic model of continuous culture of microorganisms in several basins.....	Jaroslav Kožešnik
Theory of an experiment on the replication of DNA.....	P. A. P. Moran
On finiteness of the process of clustering.....	Jerzy Neyman
Effective entropy rate and transmission of information through channels with additive noise	K. R. Parthasarathy
A stability theorem for the Binomial law.....	B. Ramachandran
The limiting distribution of the virtual waiting time and the queue size for a single-server queue with recurrent input and general service times.....	Lajos Takács
The capacity of an indecomposable channel.....	J. Wolfowitz

The subscription price per volume for each of the series is: USA and Canada: \$10.00; Other Countries: £3. The subscription price per volume for both the series taken together is: USA and Canada: \$18.00; Other Countries: £5-6s.

Subscription is payable in advance to:

The Secretary, Statistical Publishing Society,

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

OFFICERS

President:

T. W. Anderson, Department of Mathematical Statistics, Columbia University, New York 27, New York

President-Elect:

Z. W. Birnbaum, Department of Mathematics, University of Washington, Seattle 5, Washington

Executive Secretary:

G. E. Nicholson, Jr., Department of Statistics, University of North Carolina, Chapel Hill, North Carolina

Program Secretary:

Dorothy Gilford, Office of Naval Research, Washington 25, D.C.

Treasurer:

Gerald Lieberman, Institute of Mathematical Statistics, Sequoia Hall, Stanford University, Stanford, California

Editor:

J. L. Hodges, Jr., Department of Statistics, University of California, Berkeley 4, California

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS OF MATHEMATICAL STATISTICS are \$15.00 per year for residents of the United States or Canada and \$7.00 per year for residents of other countries. There are special rates for students and for some other classes of members. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

Membership in the Institute of Mathematical Statistics is not required of authors of papers in the *Annals of Mathematical Statistics*, and the fact of membership or non-membership is given no weight in the consideration of submitted manuscripts.

Contents (Continued)

Post Cluster Sampling.....	SAKTI P. GHOSH	587
Estimates of Location Based on Rank Tests	J. L. HODGES, JR. AND E. L. LEHMANN	598
On the Efficiency of Two-Sample Mann-Whitney Test for Discrete Populations	K. C. CHANDA	612
Tests and Confidence Intervals Based on the Metric d_2	JUDAH ROSENBLATT	618
Small Sample Power and Efficiency for the One Sample Wilcoxon and Normal Scores Tests.....	JEROME KLOTZ	624
On Moments of Order Statistics and Quasi-Ranges from Normal Populations	ZAKKULA GOVINDARAJULU	633
Conditional Distribution of Order Statistics and Distribution of the Reduced i th Order Statistic of the Exponential Model.....	ANDRE G. LAURENT	652
Logistic Order Statistics.....	ALLAN BIRNBAUM AND JACK DUDMAN	658
On the Line—Graph of the Complete Bigraph.....	J. W. MOON	664
Notes		
A General Version of Doebelin's Condition.....	RICHARD ISAAC	668
A Test for Equality of Means When Covariance Matrices Are Unequal	T. W. ANDERSON	671
Correction Notes.....		673
Book Review.....	GEORGE HADLEY	674
Abstracts of Papers.....		678
News and Notices.....		696
Publications Received.....		703

MEETINGS OF THE INSTITUTE

TENTATIVE SCHEDULE

- EASTERN REGIONAL MEETING—Cambridge, Mass., May 6-7, 1963.
- CENTRAL REGIONAL MEETING—Madison, Wisc., June 14-15, 1963.
- WESTERN REGIONAL MEETING—Eugene, Ore., June 20-21, 1963.
- EUROPEAN REGIONAL MEETING—Copenhagen, July 8-10, 1963.
- ANNUAL MEETING—Ottawa, Aug. 27-29, 1963.

Abstracts should be submitted in duplicate to the Editor, on abstract blanks which can be found in the back of every *Annals*, beginning with the March 1961 issue, or can be obtained from the IMS Secretary. Abstracts must be received at least 50 days before the first day of the meeting at which they are to be presented, indicating whether presented by title or in person. (Only one contributed paper may be given in person at any one meeting.) They may be printed prior to the publication of the report of the meeting. Those received by April 30 will appear in the September *Annals*, by July 31 in December, etc. Abstracts should be limited to 200 words or the equivalent, and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if introduced by members. Abstracts must follow the stylistic requests on the abstract blank, or they may be returned.
